MEMORANDUM

July 30, 1996

To: Jeremy Gunn

From: Joe Freeman

Subject: Referred Material in Miscellaneous HSCA Record Series

After several conversations with Kris Wilhelm of NARA and a review of the copied referral sheets in our office, the following is a quick overview of non-Numbered Files record series in the HSCA collection which contain referred material:

Record Series	Current Status
Security Classified Files	Housed in ARRB SCIF, have never been physically referred to originating/equity-holding agencies
	Housed in ARRB SCIF, have apparently been ally referred to originating/equity-holding agencies
Immunized Executive Session Testimony	Housed in ARRB SCIF, have apparently been physically referred to originating/equity-holding agencies
Photographic Materials	Referred parts of this record series are housed at Archives I; there are some referral sheets to the CIA for records from this series, none for the FBI; theoretically the CIA has had "their" material physically referred to them
Briefing Books	Housed at Archives I, there are referral sheets in both the FBI and CIA referral notebooks for portions of these books; these portions have apparently been physically referred to these two agencies (as an aside, Rep. Stewart McKinney's briefing material is listed as a separate record series by NARA for some obscure reason; for purposes of this memo, I include his along with the others)

Security Violation Case File Blahut file) has ap Record Series	This one-box record series is housed at Archives I and parently been physically referred to the CIA Current Status	(Regis
Register of Numbered Documents (HSCA card file) ARRB SCIF;	The original cards are housed at Archives I; an unredacted set of copies are housed in the both the FBI and the CIA were sent a copied set; the CIA has returned its set to NARA with requested redactions (this set is housed at NARA I); the FBI has never returned their set or gotten back to NARA; thus, there is no version of the card file at NARA II (even a redacted one)	
Audiocassettes and Other Sound Recordings	There are a limited number of audiocassettes (perhaps half a dozen) for which no transcripts exist and which have yet to be forwarded to NARA II; these are effectively in referred status; these cassettes contain CIA equities and have been listened to by Frank Most, et al; am seeking to ascertain exact current status it may be that NARA has yet to hear back on what CIA wants redacted; in addition, there are audiocassettes being held at Archives I which reflect interviews, depositions, etc., for which there <i>are</i> tran- scripts which are themselves currently referred; these latter audiocassettes will be forwarded to NARA II in the event that the transcripts are opened in full; if postponements are upheld in the transcripts, NARA will make arrangements to have copies made of the audiocassettes and then excise postponed portions before sending the copies to NARA II
