

Memorandum

August 30, 1995

To: Jeremy Gunn

From: Joe Freeman

Subject: HSCA interview of Richard Lipsey, autopsy attendee

Just FYI, for reading material on a slow (!) day, see attached HSCA document and selection from HSCA Vol. 7. It's interesting how absolutely certain Lipsey is that there were three, not two, bullet entrance wounds. As an aside, Lifton cites Lipsey in *Best Evidence*, re: decoy ambulances and casket identification, but not on this issue.
