Subject: Earlier Garrison Boxes Memos of 9/8 and 9/11

- **Fenella Farrington lead** - while not referenced in the 26 WC volumes themselves, Ms. Farrington is apparently mentioned (according to Mary Ferrell's index) in Commission Documents 49 (p. 32) and 75 (p. 573). These should no doubt be looked at and cross-referenced with the Mark Lane memo to Garrison cited in my 9/8/95 memo.
- **Raymond "Pete" Acker lead** - found a reference in the Ferrell data base for this guy, as well, which doesn't, however, reference Ruby/Oswald phone calls. Ferrell reference page attached, with -- presumably -- a more recent address and phone number [under the strange coincidence column, please note the two incredibly disparate tangents on which this Acker guy rides in and out of the assassination saga: 1) alleged Oswald/Ruby phone calls, and 2) casual reference in someone else's Warren Commission testimony -- attached -- as a guy who, by hand, reloads Mannlicher-Carcano shells].
- **A.P. Kimbrough lead** - I'm embarrassed to say that it turns out this guy has been an assassination researcher for 20 years, according to Ferrell (attached); moreover, he passed away in Jan. of 1989. Nevertheless, it might still be worth checking with his heirs (or someone in the research community) about what became of the photos he allegedly had. According to the Ferrell index, he is referenced in CD 1245; I'll try and run that down next time I'm out at Archives II.
