HSCA REFERRED DOCUMENTS

Categories of HSCA "referred" documents

1. In HSCA database and are easy to find

2. Perhaps in HSCA database but not easy to find

3. In open database

4. RETURNED OPEN: referred to agency, but have now been reviewed by agency,
    are open in full, and have been sent to NARA.

5. RETURNED FOR ARRB: referred to agency, reviewed by agency but are not open
    in full.   They are now ready for review by ARRB.

Questions:

Why is Steve Tilley's database more accurate than ours?

When will we get the most accurate information Tilley has?

When can Chet index HSCA database?

How many appx are returned open?

How many appx are returned ARRB?

<u>Procedure</u>

1. Data entry for FBI, CIA, and Secret Service referrals.

2. Edit "referred" on DB when document easily identifiable.   Put red check on top
     right corner of hard copy.

3. If not easily identifiable, turn document to side and go on to the next one.   We
     will process these when database is indexed.
