Subject: Secret Service Issues

I would like to try to nail down some issues related to Secret Service records. Could you do whatever research is necessary to provide answers to the following questions:

1. Identify all Secret Service official reports on the assassination (whether to the Warren Commission, HSCA, Church Committee, etc.).
2. Identify all Secret Service officials who testified under oath to any commission investigating the assassination.
3. Describe the scope of the Secret Service investigation undertaken after the assassination. For example, how many agents were involved; what records remain; how long did it last; what cities did it visit; what information from the investigation was included in its official report(s).

In addition, could you start developing (with the assistance of Dennis, Tammi, and Doug), a chart identifying the physical evidence from the assassination that came into the possession of the Secret Service. Once we have a list of evidence that came into Secret Service possession, but that has since been lost, we will pursue it with the Secret Service.
