Robert J. Groden is the infamous high school dropout who rose from lowly photo lab technician in 1968 to become the world's leading expert on the Zapruder Film of the Kennedy assassination in 1975. This is the same Robert Groden who PROVED that the photographic images of Bruno Magli shoes were FAKES during the O.J. Simpson Trial. Groden's portfolio uniquely qualifies him to write the exposé of the century on the mysterious "three tramps" and their continuing influence on our collective understanding of the Kennedy assassination. *The Three Tramps and the ARRB* is a book that you must read -- it is a book that you will be unable to forget. -- Thunder's Mouth Press
