

## MEMORANDUM

December 18, 1995

To: File 4.0.1.6

From: Kevin G. Tiernan

Subject: Federal Register Notice of November 28, 1995

The Federal Register Notice of the Board's decisions at the November meeting was inaccurate in its listing of FBI records. FBI HQ document number 62-109060-667 is an administrative memorandum which accompanies a longer letterhead memorandum. In the headquarters version it was given two NARA RIF numbers, one for the administrative memorandum (1241001810489) and one for the letterhead memorandum (1241001810490). In the Federal Register Notice of November 28, 1995, the administrative memorandum was listed as having two releases, and the letterhead memorandum was listed as having nine releases. In two field office duplicates of this document, the administrative memorandum and the letterhead memorandum were only given one NARA RIF number. Dallas 89-43-527, 528 is 1241007910122, and Buffalo 62-1827-9, 10 is 1241014510290. In the Federal Register Notice of November 28, 1995, the duplicates were listed as having only two releases (as the administrative memorandum of the headquarters version was listed) when they should have been listed as having eleven releases, combining the number of releases of both the administrative memorandum and the letterhead memorandum.
