

## MEMORANDUM

July 18, 1997

To: File

By: Michelle Combs

Subject: Directorate of Intelligence, Miscellaneous Records

On June 24, 1997, Michelle Combs and Bob Skwirot requested that the Directorate of Intelligence (DI) search for records based on keywords supplied by the ARRB. The DI database is searchable only through general subject headings assigned from a master list and coded to particular documents. This database is not searchable by keyword. At the ARRB's request, the DI has supplied all raw intelligence reports (as opposed to finished analytical intelligence documents) coded for particular countries and subjects. I examined all the raw intelligence reports for the period November 20 - November 30, 1963 for the following countries and subjects and found no information relevant to the assassination of President John Kennedy.

- USSR and Cuba
- Mexico, Cuba and USSR
