b. John McCone.   The Review Board staff examined CIA's index to DCI John McCone's files, reviewed files of possible relevance, and marked relevant documets as assassination records.   According to the box and folder index listings of McCone's files, McCone did not maintain files on the assassination of President John Kennedy, the investigation, Lee Harvey Oswald, or the Warren Commission.   McCone records do include memoranda, briefing reports, and a transcript which discuss the Oswald, the assassination and the investigation.   Within the McCone papers are several file folders with notations or sheets indicating documents on a wide variety of subjects which are missing or were destroyed.   Of the missing or destroyed documents, only two refer to the Kennedy assassination.   One document from a 1963 listing is described as "Date of Meeting - 26 Nov; Participants - DCI & Bundy; Subjects Covered - Msg concerning Pres. Kennedy's assassination."   The second document is described as "Date of Meeting - 19 May '64; Participants - DCI, J. J. McCloy; Dinner at Residence - Re: Oswald."   The second document is annotated "Destroyed 1-28-72."   Both documents were noted as missing when the files were reviewed by CIA historians in 1986.   All relevant documents from the McCone files were designated as assassination records including the notations on the destroyed and missing records.
