

MEMORANDUM

March 4, 1998

To: Jeremy Gunn
Executive Director

cc: Bob Skwirot
CIA Team Leader

From: Michelle Combs
Special Assistant for Research and Review

Subject: CIA-IR-17 DS&T Records on Castro Assassination Plots

In ARRB's informal request for additional information and records CIA-IR-17, CIA was asked to search the records of the Directorate of Science and Technology (DS&T) for possible records on the Castro assassination plots not included in the CIA Sequestered Collection. CIA did not locate any documents concerning the Castro assassination plots. CIA did produce one 1965 document dealing with AMLASH. I reviewed this record on February 20, 1998. This document contains no information relevant to the assassination of President John F. Kennedy and was not designated an assassination record.
