Subject: Anna Nelson's Recent Publication about the Review Board
:
Date: July 25, 2017

I am attaching:

1. Anna's article (which I found when browsing in a bookstore yesterday).
2. Anna's original ethics request, which advised that the article would not come out until the Board was out of business. (On p. 228 of her article, Anna notes that the Board's life had been extended by Congress for an additional year.)
3. My letter to Anna noting that, *inter alia*, she should include a disclaimer (which she did not do) and that she should not publish any non-public information (which she did). [I note that in 1995, when Anna had been told, incorrectly, that I was writing a book, she said that the staff should be required to sign a non-publication agreement because the Board members had been required to promise that they would not write about the Board's work.]

The comments she makes about the agencies with which we deal will not be helpful. I believe her comments about the Zapruder film are unhelpful. There is another issue of concern that I will discuss with you orally.

I will, of course, leave it to you to decide what, if anything, should be said to other Board members.
