Mrs. Gayle Nix Jackson
203 Mesawood
Glenn Heights, Texas 75154

Dear Mrs. Jackson:

It was a pleasure to speak with you about your grandfather's camera and film. Your cooperation is helpful and important to the Review Board as we try to find the original film. Your dad was also very considerate when we spoke about the possibility of his donating the camera to the John F. Kennedy Collection. I sincerely hope his donation will become a reality.

The Review Board's task, in part, is to keep the public and the media informed of our work to locate and declassify assassination-related records. I think you and your father will find the enclosed materials about the Board informative. Thank you for sharing this information with him.

On behalf of the Review Board, I appreciate your interest in preserving important assassination-related records such as your grandfather's camera and film. The JFK Records Collection at the National Archives would ensure the camera's proper care. Additionally, it would serve as a central location for the public to learn of the important role your grandfather played in preserving the history of this tragic event. The National Archives will provide you and your family with a Deed of Gift for your donation of the camera.

Thank you again for your time. If you have any questions or concerns, please feel free to contact me at ext. 258. I look forward to speaking with you again in the near future.

Sincerely,

David R. Montague
Investigator
