Dr. John Newman
1019 Summerhill Drive
Denton, Maryland 21113

Dear Dr. Newman:

As you know, the JFK Assassination Records Collection Act requires the Assassination Records Review Board to identify and review, inter alia, federal records that relate to the assassination of President Kennedy. In order to help us fulfill our statutory obligation, we are requesting knowledgeable persons to forward to us background information that will help us fulfill our statutory obligation to create a comprehensive documentary record of the assassination.

From my conversations with Jeremy Gunn of the Review Board Staff, I understand that you possess some unclassified information about the National Security Agency and the Department of Defense that may be able to assist the Review Board in its work. The Review Board and I would be very appreciative if you would be willing to forward to us copies of those

documents.

We continue to appreciate your helpfulness to the Board and the staff.

With best wishes,

David Marwell

Executive Director
