Subject: Summary of FBI files on Carlos Quiroga and Carlos Jose Bringuier
(FBI-25)

I have reviewed all FBI files on the above mentioned individuals and could not find any additional assassination related records containing their names. All assassination related records containing their names have already been processed in the "core" subject files such as 62-109060 (JFK Assassination) and 105-82555 (Lee Harvey Oswald).

Most of the non-core files contained information on individuals with the same (or similar) name, but were not the individuals who interacted with Lee Harvey Oswald in New Orleans. The few records that I came across that were on the correct Carlos Quiroga and Carlos Bringuier contained information on their anti-Castro and communist activities, such as appearing at protest marches in favor of the Vietnam War and to oust Castro from Cuba. They were not the direct subjects of the FBI surveillance but they crossed paths with existing FBI investigations, and their appearances in these files occur after 1964.

We are currently awaiting official confirmation from the FBI on the following files that have been designated as destroyed:
