Subject: Chain-of-Custody Study of Autopsy Photographs and X-Rays

This cover memo forwards the requested chain-of-custody study of President Kennedy's autopsy photographs and X-Rays.

The study is arranged in tabular format so that different categories of photographs (color, black-and-white, and miscellaneous) can be tracked from document to document. Pages 1-49 of the document concern the photographs; pages 50-54 concern the X-Rays. Supporting attachments are numbered 1-34.

Should the author discover documents at a later date which he was unaware of during this study, this document will be revised accordingly.
