

# MEMORANDUM

November 22, 1996 (Revised November 27, 1996)

To: Jeremy Gunn  
From: Doug Horne  
Subj: Parkland Hospital Medical Personnel

In response to your request, the following information is provided:

A. Neurosurgeons who treated President Kennedy in Trauma Room One on 11/22/63:

<u>Name</u>	<u>Testified Previously?</u>
Dr. William Kemp Clark	Yes; W.C.
Dr. Robert Grossman	No

B. Additional personnel stationed at or near<sup>1</sup> the head of President Kennedy's gurney (who are not deceased):

<u>Name</u>	<u>Testified</u>
<u>Previously?</u>	
Dr. Robert McClelland	Yes; W.C.--head of gurney, assisted with tracheotomy surgery
Dr. Paul Peters	Yes; W.C.--right side, inserted right chest tube after assisting with tracheostomy by selecting tube

---

<sup>1</sup>Warren Commission testimony almost always indicates whether medical personnel involved in treatment were on the right side or left side of the President, but are often imprecise in describing whether Parkland medical personnel were even with the President's head, neck or upper torso. Personnel listed in this subparagraph meet two criteria: they appear to have been positioned somewhere between the President's upper chest and his head, and it has been documented that they were also able to observe the head wound; personnel who did not meet both criteria were not listed.

Dr. Ronald Jones	Yes; W.C.--left side, inserted left chest tube after performing cut-down on left arm
Dr. Charles Carrico	Yes; W.C. and HSCA--initially at head of gurney; inserted endotracheal tube and performed initial examinations prior to tracheostomy
Dr. Malcolm Perry	Yes; W.C. and HSCA--left side, performed tracheostomy and closed chest massage
Dr. Charles Baxter	Yes: W.C.-- right side, assisted with tracheostomy and with right chest tube insertion

C. Trauma Room One personnel (or other Parkland personnel) who treated or observed President Kennedy and who have never been interviewed by an official body of the Federal Government:

<u>Name</u>	<u>Remarks</u>
Nurse Audrey Bell	Head Operating Room Nurse (W.C. did not interview; HSCA staff wrote one OCR following a telephone interview, but she was only questioned about Governor Connally's wrist fragments); she has stated in numerous fora that she did observe President Kennedy's head wound and anterior neck wound.
Dr. Charles Crenshaw	Not interviewed by the W.C. or HSCA; two FBI interviews were conducted circa 1992, but he has not been interviewed by an official body investigating the assassination or records related to the assassination.
Dr. Bill Midgett	Observed President Kennedy's head wound in the limousine outside Parkland Hospital.
David Sanders	A Parkland orderly who helped wash President

Kennedy's body after JFK was pronounced dead and before his body was placed in the Dallas casket.

To the best of my knowledge, all of the above personnel reside in Texas, with the possible exception of David Sanders, whose residence we are unaware of.
