

Master Set of Medical Exhibits
Public Distribution Copy List of Exhibits
Assassination Records Review Board

Updated July 20, 1998

The Master Set of Medical Exhibits includes the records collected and used by the Assassination Records Review Board during the course of its work on the evidence related to the emergency medical treatment and autopsy of President John F. Kennedy.

The Public Distribution Copy of the Master Set includes "Meeting Reports," "Call Reports," and other records created by and through the Review Board staff regarding medical and photographic evidence. The only exhibits contained in the Master Set that are not being made available in the Public Distribution Copy are audiotapes, videotapes, plastic skull models, transcripts of interviews or depositions of some witnesses that are otherwise available, and other voluminous documents that have been published or are otherwise available. The original Master Set of Medical Exhibits, which includes some original documents, will become available at the JFK Collection at the National Archives upon completion of the Board's work.

The only information that has been redacted in the Public Distribution Copy pertains to individual identifying information such as current addresses, telephone numbers, and Social Security Numbers.

- MD 1 Autopsy Descriptive Sheet (commonly called "Face Sheet") [NMS PATH-8 (1-63)] (dated 11/22/63)
