

Informant File Number

- Protect informant-specific part of the file number, except where entire symbol number or informant name would be released.

Foreign-Counterintelligence Issues

Technical Source: Protect all of asterisk symbol number, until 10/2017

Release all other information unless it clearly discloses use of technical source against establishment of “friendly” country.

Human Source: Treat like non-FCI informant; possible foreign relations complications if targeted against “friendly” country.

Foreign Relations Arguments

Re: “Hostile” Country: Will not, by itself, sustain postponement of any information other than file number or symbol number.

Re: “Friendly” Country: May carry more weight.

Foreign Liaison Postponements

- Postpone names of foreign officials if requested by foreign government.
- Will we postpone foreign government as source of information, if requested by foreign government, while releasing information provided?
