Re Phila. airtel 6/2/64, enclosing FD 142.

By separate cover Phila. is forwarding one Western Electric 500MR-3 telephone set. It has been ascertained that a 500DR-3 Western Electric set is being installed in subject's office, as described in referenced communique. The only difference between the two sets is that the 500MR-3 has four conductor wires which will enable the desired alteration of this set.

It is requested that the 500MR-3 be altered so that a mite, mate or similar microphone will be installed in the network of this phone.

Arrangements are that the subject is to receive telephone service 6/9/64. Accordingly, it is requested that the altered set be returned to the Philadelphia Division by 6/8/64, noting that the installation is not in Headquarters City.

The above request is based on authorization requested in referenced communication. If authorization is this matter is not granted, it is still requested that this set be altered as it is contemplated it will be used in a previously authorized Bureau installation in the near future.
