Meek's memo to CIO:
 This is a copy of a memorandum from Mr. H. W. Baker, Director of Security, dated May 11, 1952, concerning the investigation of a break-in at the FBI Laboratory. The memorandum states that the investigation was conducted by the FBI Laboratory and that the results of the investigation were forwarded to the Bureau of Internal Revenue.

Enclosed is a copy of a memorandum from Mr. H. W. Baker, Director of Security, dated May 11, 1952, concerning the investigation of a break-in at the FBI Laboratory. The memorandum states that the investigation was conducted by the FBI Laboratory and that the results of the investigation were forwarded to the Bureau of Internal Revenue.

11 Sept 67

1. Minsk is the capital as well as the economic and cultural center of the Belorussian Soviet Socialist Republic, one of the fifteen republics comprising the Union of Soviet Socialist Republics. It is situated at 53°34' N., 27°33' E., approximately 450 miles southwest of Moscow. Its population, as of 1959, was 569,000. The Svisloch River, a non-navigable tributary of the Berezina, runs through the center of the city.

2. Almost completely destroyed during World War II, Minsk has been largely rebuilt and today it is considered by the Soviets as one of their "show cities."

3. Minsk is an important Soviet industrial center; its chief products include tractors, trucks and other heavy automotive equipment, machine tools and precision instruments, radios, phonographs and television sets, leather goods, cotton and linen goods and lumber and wood products.

4. Minsk has several large institutions of higher learning including the Lenin State University of the BSSR, with some 7,000 students, a medical institute and a polytechnical institute. It also has a wide variety of technical schools. As the seat of the Academy of Sciences of the BSSR with its numerous affiliated scientific institutes, Minsk is also an important center of scientific research.

5. The city is in the midst of a generally flat marshy area 656 feet above sea level. The surrounding area is mostly woodlands interspersed with marsh lands. Its average January temperature is 23°F.; the average July temperature is 65.6°F. Precipitation averages 24 inches annually with the greatest amount during the months of July and August. Snow cover lasts an average of 111 days annually with the highest accumulation averaging 14 inches.

Platón. El que tiene la mayor parte de suerte es el que se ha reservado para el servicio de su Señor y que no ha tenido que vivir en la carne.

Let's go into it a bit more in-depth, as it's a key part of the game. The first thing you need to do is to identify what type of player you are. Are you a strategic thinker, or someone who likes to play by the numbers? Once you've identified your style, it's time to start thinking about how you can use it to your advantage. If you're a strategic thinker, focus on long-term planning and analysis. If you're someone who likes to play by the numbers, focus on short-term tactics and quick decisions. Both approaches have their pros and cons, so it's important to understand them both before you start playing.
