Present evaluations and comment. Subject is industrious, should have no trouble living a cover in Latin America, speaks native Spanish, has firm area knowledgedy based on residence and study, has proved that he can work overrers under adverse conditions. He is a good teacher, and likes to teach, and would be qualified for training work as well as work as an agent manager. In short, subject is a fine agent and has long range value for the organization. He has proved useful in the WAVE office and is needed inside under present personnel conditions. His main weaknesses for inside work are fault knowledge of KUBARK procedures (certainly nothis fault and he is learning satisfactorily) and difficulty in using the written word in English. His Spanish is probably the best at this station, a very helpful asset since our communication with internal agents is almost exclusively in Spanish.
