ONE LINE SUMMARY

REF ID: B

ACTION REQUIRED - REFERENCES

Action: None; for your information.

Presented below is a reporting of the operational and support activities Gregory D. PARSHUT for the above mentioned period.

1. GENERAL SUMMARY OF ACTIVITIES

Two photographic operational assignments were requested of PARSHUT during the month of October. Station support consisted of the following support. The servicing of three EURIOU requests for information and materials. MICHARI was supported on two audio operations at hotels in Mexico City. PARSHUT was requested by the Military Attaché Office and the Chief of Station to train Army personnel in photography. Station print production finished with 3,122 prints a good part of which was done by PARSHUT's trainee Louis P. KASNIKA. Outside support activity was high. Photographic basehouses covering Soviet and Satellite embassies produced normal coverage with the exception of the LIEDEKE basehouse which has the VLG-2 trigger device to cover the additional entrance at the Cuban Embassy.

2. TDX

None. Two trips are pending for November or December, one to Monterrey and the other to Veracruz.

3. TRAINING

A. On 10 October 1963, at the request of the Embassy Military Attaché Office, PARSHUT conferred with Colonel Hubay and the Chief of Station regarding the improvement of the army photographic laboratory. Colonel Hubay mentioned several serious problems concerning this facility, i.e., the general rundown

condition of their photographic laboratory, problems of untrained personnel maintaining this facility. The colonel gave an illustration the following: Their laboratory was given eight rolls of 35mm film taken by Wiley who used the Air Attaché plane [redacted] to Mexico for a report to be sent to his Headquarters. The professor, continuing his development procedure immersed the eight rolls of film first in the fixing bath then in film developer which destroyed the entire batch of film. The colonel posed the possibility of having his film developed and printed by the Station. The Chief of Station stated that the Station could not render photographic support to the Military Attaché Office on a regular basis but would agree to have PARMITH train one of his staff in photographic procedures. PARMITH began this training on 26 October 1963. Forwarded as attachment A is the training report on Sgt. P. Dell, U.S. Army.

B. Louis P. KARICKA completed thirty-seven hours of photographic training. Forwarded as attachment B is the training report.

4. OPERATIONS

A. On 11 October 1963, the Deputy Chief of Station instructed PARMITH to meet with the local U.S. Customs agent who was requesting photographic support. PARMITH, with the agent present, photographed documents at a hotel in Mexico City. The documents were to be used as evidence against narcotics couriers who were apprehended at Laredo, Texas by customs agents. The couriers had in their possession ten one-kilo bags of uncut heroin.

B. On 24 October 1963, Julian Y. HIGGINS requested PARMITH to photograph a meeting between LIEUT/1 and two BODOK agents who were to meet in the down town area of Mexico City. The box camera concealment device was used on this operation. Although the targets did not appear, one roll of 35mm film was expended on this operation as a practice exercise.

5. STATION SUPPORT

A. On 3, 4 and 5 October 1963, PARMITH was requested to assist Harvey C. MILFORD in monitoring a receiver at an LP located at a hotel in Mexico City. The purpose of this operation was to record conversations of Tito or his official party who might be staying at the target suite. This suite was not occupied by Tito or his staff during their stay in Mexico.

B. On 8 October 1963, PARMITH was requested by the Station to arrange a meeting with LIEUT/22 and an LCPLT/22 operator. The meeting took place at the LIEUT/22 safehouse on the evening of 8 October. The operator reported that there were no implications of deception on the part of L-22.

C. On 8, 10, 11 and 12 October 1963, PARMITH was requested to assist James F. RESCHER in monitoring a receiver at an LP located in a hotel in Mexico City. The purpose of this operation was to monitor conversations between a visiting LCPLT/22 case officer and his agent and possibly to record conversations between this agent and a Chiapas target if this target agreed to meet the agent at his hotel room. The agent was writing of this audio operation.

D. On 17 October 1963, PARMITH presented a one hour operational photographic briefing to the Station case officers. The briefing consisted of the following subjects: General photographic laboratory support done at the Station; clandestine photography using body concealment devices; photographic trucks; basehouse photography covering Soviet and Satellite embassies; airport coverage using both the passport camera and the LIEUT/22 team; copying devices which could be used by case officers to photograph material when it would be impractical to pass this material to the Station for processing; sorting of photographs which is done both at the Station and at MCICP for Station support operations. In addition, SW activity was discussed briefly including an explanation of the use of cartons and developers. The briefing was concluded with a demonstration on the development of a 35 mm negative using the spray method of application. Each subject discussed during the briefing, was supported by a display of photographic equipment and prints taken under operational conditions.

E. On 21 October 1963, PAYSON photographed 554 frames, using the Recordak to fulfill a monthly Staff D requirement for the Chief of Station, Mexico City.

6. PHOTOGRAPHIC SURVEYING

- A. Number of operational target surveys completed during the month: 0.
- B. Number of ZIN trips completed during the month: 0.
- C. Photographic equipment issued for operational use: 0.
- D. Photographic equipment required: 0.
- E. Number of people trained in photographic techniques/equipment: 2.

7. PHOTOGRAPHIC PROCESSING OR COPY PRODUCTION

- A. Black and White: 112 jobs.

1. Total prints: 3,102.
2. 35mm microfilms: 400 feet.
3. 35mm cassettes: 60.
4. 120 cine roll film: 2.
5. Sheet film (all types): 0.
6. Miscellaneous: 0.

- B. Color: 0 jobs.

- C. KODAK Station Support

1. Secret writing: 3 messages incoming using 37 developer.
2. Flags and seals: 2 letters opened and ressealed.
3. Chemical Harveryng: 0.
