

JFK ASSASSINATION SYSTEM
IDENTIFICATION FORM

AGENCY INFORMATION

AGENCY : CIA
RECORD NUMBER : 104-10126-10059
RECORD SERIES : JFK
AGENCY FILE NUMBER : 80T01357A

DOCUMENT INFORMATION

AGENCY ORIGINATOR : CIA
FROM :
TO :
TITLE : LIONION PHOTOGRAPHIC OPERATION AGAINST CUBAN CONSULATE
DATE : 07/25/1978
PAGES : 4

SUBJECTS : WITHHELD
LIONION

DOCUMENT TYPE : PAPER
CLASSIFICATION : UNCLASSIFIED
RESTRICTIONS : 1B 4
CURRENT STATUS : RELEASED IN PART PUBLIC - RELEASED WITH DELETIONS
DATE OF LAST REVIEW : 08/05/93
COMMENTS : JFK57 : F2 : 1993.08.05.19:27:58:000037

Released under the John F. Kennedy Assassination
Records Collection Act of 1992 (44 USC 2107 Note).
Case#: NW 65924 Date: 10-26-2021

[R] - ITEM IS RESTRICTED 104-10126-10059

MEMORANDUM FOR THE RECORD

Subject: LIONION Photographic Operation;
Targeted Against Cuban Consulate

SUMMARY

Available records show that the VLS-2, an automatic camera device, was in process of being installed at the LIONION basehouse on 27 September 1963. This device was to be used with the K-100 16 mm. movie camera or the Robot Star 35 mm. still camera. These systems were aimed at the gate of the Cuban Consulate. The first test pictures were sent to Headquarters as attachments to HMMA-22433 on 7 November 1963. One of the attachments, (A), shows the VLS-2 coverage of the Consulate gate. Obvious in this photograph is a sign indicating the hours of the Consulate (for visas). The hours are 10:00 to 2:00, Monday through Friday. The date this test photograph was taken is unknown. A later monthly report for 1 - 31 December 1963, (HMMA-22726), discusses the installation of a SEQUENCE camera on 17 December 1963 with hours of operation against the Consulate 0900 to 1400, office hours of the Consulate. Subsequent monthly reports confirm that the SEQUENCE camera was indeed the Pulse Camera. The record, then, shows:

- A. The Pulse Camera was installed, for the first time, on 17 December 1963.
- B. No coverage of the Consulate existed prior to 27 September 1963 when the VLS-2 and K-100 or Robot Star systems were being installed during the morning.

DISCUSSION

HSCA Researchers, Dan Hardway and Ed Lopez, reviewed Agency files on the following dates:

- 26 May 1978
- 22 June 1978
- 5 July 1978
- 20 July 1978
- 21 July 1978

SECRET

SECRET

These files contain materials cited in the SUMMARY, including sample photographs of the Consulate gate using the K-100 and Robot Starr systems triggered by the VLS-2. These systems are readily identifiable by nature of the resultant prints. The K-100 is 16 mm. format and is so marked on the reverse side of the print (although misidentified as Attachment A to HMMA-22433 when it should have been Attachment B). The Robot Star is 35 mm. format. None of these prints, which were sent to Headquarters as test results on 7 November 1963, has the distinctive mark of the Pulse Camera in the lower left corner. The Pulse Camera recorded a time-date image in the lower left corner from an internal Accutron movement. This can be seen in a sample picture sent to Headquarters on 22 June 1965 (HMMA-26414), entitled Details of LIONION Pulse Camera Operation. This report confirms, too, that the Pulse Camera did not begin operation until "mid-December 1963."

INFERENCES

The Warren Commission record concludes, from Duran testimony, that Oswald visited the Cuban Consulate sometime after arriving in Mexico City on the morning of 27 September 1963. That same morning, across the street at LIERODE basehouse, the new trigger device and K-100/Robot Star systems were in process of being installed. If the installations were to have gone smoothly, the systems may have been tested against the target at the very moment when Oswald is supposed to have appeared. However, the record of that morning's efforts shows that the K-100 had a malfunctioning part which had to be remachined. It is possible that this installation, begun in the morning, may have taken well into the afternoon to complete because (1) this was a new installation in a new room of the basehouse and (2) the technicians experienced problems with the equipment. The ultimate setup would have been tested on the target when it was complete. But the Consulate officially closed at 1400 hours, after which there would have been few, if any, targets (at the gate) for test purposes. It may have been likely, then, that the installation, when completed, was not tested against actual (and available) targets until the opening of business Monday morning, 30 September. Oswald is not known to have visited the Consulate after Saturday, 28 September. The LIONION photographic site did not operate on Saturdays.

I conclude that the probability of having taken a photograph of Oswald during his visit(s) to the Cuban Consulate on 27 September 1963 is remote.

SUPPLEMENTAL INFORMATION

The files reveal the following supplemental information:

- A. LITAMIL 7, LITAMIL 9, penetrations of the Cuban Embassy, were aware of and assisted in the production of LIONION. HSCA researchers have reviewed this item.
- B. LIONION 1 and 2 were terminated 1 November 1972. The termination report assumed that they were either doubled, or their operation was being monitored.
- C. LIONION 1 and 2 intended to resettle in Madrid on 1 September 1972. HSCA researchers have had access to this item.
- D. Seventy volumes (5 packages) of LIONION production from late 1961 through December 1968 were sent to Record Center, 12 August 1969 to Headquarters with a recommendation that they be forwarded to Records Center for retention of 10 years from date of information. (Thus, the earlier production may have been destroyed!) This item is HMMA-37684. Unknown if HSCA has seen.
- E. Photographs of Pulse Camera in operating position sent to Headquarters as Enclosure 3, HMMA-22881, 13 February 1964. Location of Enclosure or HMMA-22881 unknown to undersigned. Unknown if HSCA has seen.
- F. Photographs taken using Pulse Camera were sent to Headquarters as HMMA-22836, 31 January 1964. Location of photographs unknown to undersigned. Unknown if HSCA has seen.
- G. Pulse Camera removed for reconditioning during May 1964.
- H. All equipment removed from LIONION basehouse on 26-27 September 1964 for 6-8 weeks as precaution after release of Warren Commission Report.

SECRET

SECRET

I. LIONION basehouse partially reactivated,
25 November 1964 with only coverage of the
Embassy gate....Pulse Camera to be installed
in near future.
