DISPATCH	SECRET	UFGA-4322	

Documentation. A discussion of the documentation б. problem relative to agent infiltrations revealed that at the gement ACSI did not have any documentation problems which they felt warranted discussion at this session.

h. Coordination Forms. The discussion of operational coordination revealed that ACSI was willing for JEWAVE to coordinate locally those operational proposals which might be received from Lt. Col. Causes. Once this coordination was effected and if there were disagreement, then the operation could be referred to the Washington headquarters of both ACSI and JMWAVE. Maj. Watlington stated that the forms for effecting coordination in accordance with procedures which had been agreed upon at Washington would be sent to both JMWAVE and the ACSI unit in Miami in the near future. In view of this Maj. Watlington suggested that we not initiate the coordination mechanism until these forms were on hand circa 1 July 1962.

i. W/T Assets. The discussion of the use of W/T facilities in terms of PBRUMEN operations revealed that the Miami ACSI unit did not have any W/T assets in PBRUMEN at this time. On the other hand, Lt. Col. Causes was interested in establishing W/T assets in PBRUMEN. In view of This he asked if JMWAVE would continue to assess, polygraph and train those individuals that ACSI thought wore suitable W/T candidates. It was indicated that we were certainly prepared to review all appropriate cases and would render whatever support was required. This then resulted in a discussion of whether JMWAVE would be willing to monitor ACSI V/T transmissions from PBRUMEN in those instances where the W/T operator had not been assessed. polygraphed or trained by KUBARK. We indicated that we would be glad to moniter, such transmissions if we were told in advance of the date, time and frequencies on which the broadcasts were to be made. This then led to a discussion of whether JMWAVE would be willing to transmit C/W messages for ACSI agents. Here again, we stated that we would favorably consider any requests for C/W transmissions providing that we knew the content of the message, the identity of the agent who was to receive it, and the agent's location and equipment which he might be using. Lt. Col. Causes stated that in view of this discussion we could anticipate that he would be levying requirements on us in the near future for support in the W/T field.

Secret Writing. A discussion of S/W techniques revealed that if a request for the issuance of S/W were received from their Miani representative it would be reviewed, and if ACSI approved the operation KUEARK would be asked to issue a system. If JMWAVE agreed via local coordination that the operation in question required the use of S/W, then this recommendation would be cabled to our Washington Headquarters where coordination would be effected with ACSI. Once this was accomplished, KUBARK Washington would cable to JMWAVE the number of the system which was to be issued. JMWAVE would then issue the system to the ACSI representative in Miami.

COMMENT. At the conclusion of the above discussion arrange-3. ments were made for lunch, but Lt. Col. Causes chose not to participate in the luncheon session. During the luncheon conversation Eaj. Watlington indicated that he did not believe that Lt. Col. Causes would cooperate within the spirit of the DCID's. As a result he asked that JMWAVE be extremely patient with ACSI until such time as Lt. Col. Causes retired and could be replaced. Maj. Watlington

14-00000. DISPATCH SYLSEOL AND NUMES CLASSIFICATION 4 ontinuation of UFGA-4322 DISCATCH SECRET indicated that the retirement was scheduled to take place at the end of September 1962. At the end of the luncheon session arrangements were made for JENTONS to take Maj. Watlington on a tour of Opa Locka. Based on this tour additional discussions were to be held with Maj. Watlington particularly in regard to the development of procedures for referral of agents to ACSI from the Opa Locka flow. OPA LOCKA. Maj. Watlington and JENTONS subsequently 4. went out to the interrogation center at Opa Locka. Here they had an interview with Col. Kail, the tenor of which was, on the part of Maj. Watlington, to assure himself that the ACSI repre-sentative, Francasi, was having adequate access to operational leads. Col. Kail said that operational leads were shared according to their abilities between the KUBARK representative and à the ACSI man. However, there were occasional difficulties in assuring that the men best qualified received the body in question. In addition, he said KUBARK occasionally pulled a man out of the Center without his completing the full treatment which precluded the ACSI representative's getting his hands on someone who might be well qualified for their operations. Maj. Watlington believed that assurance that the ACSI representative got a fair deal might be achieved through a more complete briefing of Col. Trudencio Ulibarri, who is in charge of the preliminary screening so that he would more fully understand what was needed. JENTONS said that this would be a very good idea, but that it would be better if it were a dual briefing with a KUBARK representative being present as well. Maj. Watlington said that he would ask his headquarters for permission to have such a briefing given. Col. Kail expressed his opinion that the assignment of JENTONS

to formal liaison with the ACSI representatives would do much to eliminate present difficulties and all present echoed this pious thought. 5. AGREEMENT. When JENTONS turned Maj. Watlington over to Lt. Col. Causes after the meeting at Opa Locka, the two ACSI

representatives said that they believed that, for the time being, it would be better to continue the system as at present, pending JENTONS' permanent arrival at the beginning of July 1962. As Lt. Col. Causes is obviously skeptical about the outcome, this was agreed to as a stopgap measure.
