- 3. Due to the above mentioned restrictions on A-14's activities, and to his strong motivation to continue actively to participate in fighting Castroism/Communism, it is felt that his greatest contribution could be made in the student field in Latin America. Subject studied almost four years at the University of Havana, aiming for a law degree. It is considered that he would need at least two years more of study to obtain his degree at another university. Subject is of white Sminish extraction and might pass as a native of another Latin country. He comes from a formerly well-to-do educated family from the upper class of Cuban society. Transmitted as Attachment #5, Under Separate Cover, is a copy of PRQ Part I on Sub-
  - 4. AHICE-14 has received the following training at JLWAVE:
    - A. FI Tradecraft. Two 3-week full-time sessions with TDY KUROAR instructor from Headquarters.
    - B. Basic Pu to include map and compass, caching, weapons (Browning 9 mm. pistol, 23 cal. revolver, M-3 SLG and Swedish "K" Pistol, and FAL rifle), patrolling, etc. Original wwo-week course early 1963 and frequent refresher assistes since. (Note that Subject was not trained at (ISOLATION) or (ISOTROPIC).
    - C. Maritime. Navigation, clandertine Maritime reception techniques, use of metascents, beacons,
      safety equipment, etc., small boat handling (from 13'
      Boston Whaler with single silent outboard to 17' Whaler with twin 75 hp. outboards to V-?0). Initial two-week basic course in early 1963 and frequent refresher sessions since.
      - Secret Writing. Initial course of instruction lus refresher sessions prior to each infiltration attempt.
      - E. One-Way-Voice-Link (OWVL) radio communications. Basic course plus refresher prior to each infiltration.
      - F. Ground Photography. One week course mid-1964 with Pontax camera.
      - G. First Aid. Dasic course early 1963 plus several refresher sessions.
      - H. In addition, prior to his recruitment for the ANYRUNK project, ALICE-14 received some basic dastruction in demolitions in late 1931 while a member of a revolutionary organization which was at the time receiving assistance from HUDARH. Transmitted as Attachments #1, #2 and #3 are training reports on AMICH-14 giving evaluations on his capabilities, porsonality and leadership.
- ......... 5. The following is a brief synopsis of AMTCD-1's operational activities at JiMAVE.

From the first successful running of the APT AR operation in July 1903 through the fifth in Earth 1964 (ther, were numerous postponements and abortive attempts because of monther, alerts, difficulties with the Intermediate Craft, etc.), MMCD-14 has performed the following tacks among others under actual operational conditions inside Cuba: recruited two high-level Principal Agents in Havana as well as numerous emplort agents, both . : Havana and in the AMT. LNK infil/emfiltration area; the ht .../d to two of those assets who are still reporting; extrated to of the above-mentioned P/AS for training who the JIMAVE area thandled the successful clancoutine re-infiltration of this

1:00 00

agent; curlingrated four JEMAVE/FI agents who were being actively sought by the Cuban security services (and since the group was forced to enfiltrate prenaturely, navigated a small boat 125 miles from the northern coast of Cuba to the U.S. using only a hand compass); exfiltrated one of the above-mertioned P/As and family which included 3 small children; and brought in to the ANTAUNK infil/exfiltration area a cache of appro mantely 200 lbs. of weapons and explosive devices and arranged the onward trans-portation of the cache contents to Havana. During this operation, the team was fired upon by a patrol boat at the infiltration channel. The team returned the fire, killing two erew numbers a the patrol boat, and escaped unharmed through an alternate channe. where they waited out the subsequent area alert and exfiltrated after emplacing the cache. To accomplish the above, AMCZ-14 has had to make contact and re-contact arrangements, clandestine personal meetings and to coordinate the efforts of a variety of internal support elements. AMCE-14's principal duties as P/A in the JEMAYE area have been: spotting and developing new agent candidates; debriefing of refugees from the AUTRUNK infil/emfiltration area; assisting the C/O to prepare S/W messages to existing AMTRUNK internal assets; assisting in the training of AMTRUNK team members; and assisting in the planning of subsequent AMTRUNK operations.

- 6. Transmitted as Attachment #4 is an assessment of AMICE-14 written by his case officer in July 1991, shortly after A-14 was first approached with the idea of possibly moving to a VH country to work as a KUDARK agent in student activities. Then the general concept was initially broached to A-14, he was a suptive to the iden but asked to continue a while longer with the L. ARUM activity in the hope that he would be allowed so make one nowe infiltration. In September, A-14 re-opened this subject with his case officer, stating that he would like to be considered for a transfer into student activities. It has been made perfectly about as A-14 that if such a transfer were to be edwicted, he would not only have to go to whatever locality KUBARK chose, but that he could have to be entirely responsive to KUBARK direction at that locality. A-14 has agreed to these stipulations. It should be point: 64t here that when originally recruited A-14 wanted it clear that he was "working with, not working for" MUMMUL. This attitude has never created a control problem, alwayagh in the party months of his work it did necessitate accounts? work it did necessitate careful handling. The ser, for the past year this attitude on his part has failed into a backgre of, to the point that he completely assests MaDAMM dire and, as a strong basis of mutual trust and confidence has two betage him and his case officer. In the event that the Cabbre Coverment is overthrown and replaced by an anti-Communist Covernment, AMICE-14 can be expected to obtain a larray high appointment in any new government. It is not inducted by the largest reach a cabinet post within the first based 1 years, overnmental reorganization. It is hoped that an . gent r. laulbuship with Subject can be maintained and strongthened possing any such possible devolopment.
- 7. Although it night appear on the nurless that I byest from training and edge one is primarity a PH agent, this is not entirely true. Tungles is a counter-revolutionary. From the age of sixteen on, he has engaged in such activities almost constantly. However, his ability, training and experience make him a highly malified agent in almost any type of clandestine previous. He is well trained in the PH field as the PH. He is cutrerely surity concleus and has the ability, so generally lacking among his fellow countrymen, of being able to retain a scoret even among any closest operational associates.
- 8. It is rejusted that addressee Stations advise JN NVD at their earliest at vanience as to their interest in utilizing the normices of Subject in their area in student activities. Subject

PAG PAG

EAPOX/SECRET

7--- - NEWFGA-17794

would be equally good in overt propaganda activities, anti-Communist student organization, student goon-squad activities, or the direction of covert spotting and recruiting in the university. Subject could not possibly pass as pro-Castro for the purpose of himself infiltrating a Castro-priented student group; a check of his background in either Cuba or the JUNAVE area would readily indicate he was violently anti-Castro. However, the Station believes that Subject's employment by KUDARK is known to very fer other Cubans in this crea. These the colored are generally these agents involved in the ALTRUM operation, a handful of others who have been approached by A-14 but turned down the recruitment pitch, and some Jamave indigenous maritime assets. It is the Station's intention to have 4-14 pass the word among these witting elements that he has had a sharp falling-out with KURAK, is quitting completely, and leaving the area, at such time as plans are made to have him move.

- 9. Subject is now making a salary of \$400, per month from JUNAVE. He has no outside income. His father is dead, his mother still inside Cuba, and the family finances are at rock bottom. Considering that Subject has a family, it is requested that interested Stations advise the amount of salary which could be offered commensurate with area living costs and Subject's experience. Travel costs from JUMAVE to a MI area can be borne by JUMAVE. Subsequent expenses would have to be borne by the Station taking over the agent. Cover for Subject's source of income should be suggested by the interested Station. An edu-cational grant, "scholarchip", or similar mechanism, possibly combined with notional family wealth, would probably be feasible. Suggestions are solicited.
- 10. AMICE-14 can be made available to transfer on short notice. It is hoped that a transfer can be made by early 1965, certainly prior to the opening of the pehool year if the uni-Versity he goes to should start its year on 1 April, or to start at mid-semester at a university on the September to June school year. Comments are also requested on problems of enrellment at the university.

MEMORANDUM FOR: Chief, PM Branch, JMWAVE

FROM : Chief, Training Branch, JMWAVE

SUBJECT : Training Report on AMTRUNK Group

SEP 25 1964

I. During the period 4 through 15 March 1963, the AMTRUNK Group composed of four members was given two weeks training in Clandestine Methods and Techniques by Andrew S. PARMERS at Safehouse #164. All instruction was given in the Spanish language. The Training course included the following:

- A. Introduction to the Training Course
- 3. Instruction and Discussions on Personal and Operational Security; Cover and Compartmentation; Clandestine Communications; Agent Spotting; Selection; Investigation Recruitment and Management; Operational Planning and Reporting.

In addition, the trainees were given the "Introduction to Clandestine Operations," "Espionage Cases," and the functions and organization of "Soviet Security Services," for supplemental reading and study.

The training also included, group discussions and participation in a series of appropriate operational situations designed to teach operational planning techniques. Several live problems were worked out by the students themselves, to acquire experience in applying clandestine operational techniques. On Sunday, 10 March, an all day exercise in Agent Meeting, Casing, Selection of Dead Drops and Surveillance was held in the city of Key West.

The group eagerly participated in the daily physical training, which included calisthenics, volley ball, swimming and long hikes.

### II. Team Evaluation:

The team as a whole, were highly motivated, receptive, conscientious, energetic and cooperative. They participated eagerly in all training and social situations. No friction was noted among the group. Although there was abundant discursion and even occasional disagreement among each other, there was no violent argument noted. To the instructor they were polite, respectful, considerate and friendly. Based on individual performances of the team members, the team as a whole was satisfactory.

# AMICE/14 - TA - "David PARDO"

David's comprehension of material presented, as revealed in discussion and practical exercises, indicated that he is aboveaverage. In training problems requiring operational planning he readily devised realistic solutions providing for security and efficiency in the actions contemplated. He is highly motivated, interested in procedures recommended, and ready to analyze previous faulty operations and to relate new techniques to his present operational mission.

David is very discreet, tends to keep silent until called to participate in discussion. Subject is intelligent, serious, mentally and physically alert, non-aggressive in his relationships with teammates and resourceful in solving problems. He writes excellent reports in Spanish, has many of the earmarks of a professional individual. Politically he is very conscious, a keen observer and a good analyst of current Latin American affairs. Steady temper, seldom criticizes, performs his duties even when under stress.

Apparently, by his own and his teammates admission, he has had abundant experience in clandestine activities against present and past regimes in his country. These experiences have awakened in him a deep need to know how to operate more securely and with more efficient organization. Previous failures have apparently led to his exile on various occasions to Central and North America and have caused many of his close comrades to suffer arrest and even death. Now he hopes to accomplish more and still survive following instruction and guidance from KUBARK.

He is probably more objective than his teammates in analyzing intelligence targets in his homeland. He held a middlemanagement traveling position in the present regime and is personally familiar with many targets, in and out of jail.

Because he thinks clearly, shows some ability to plan operations and is not in a hurry to talk too much, David might be able to operate clandestinely. He is courageously translate appleadiscreet and committed to fulfill the present of the committed to fulfill the committed the committed to fulfill the committed to fulfill the committed to fulfill the committed to fulfill the committed the commi 11 1 100 EURET J. 1-307337

SUR : Completion of Truining Report on AMICE/14 - TA - "DAVID"

REF : (Melo from QOS/JMWAVE requesting training for Subject)

1. During the period 2 thru 21 December 1965, this Trainee participated in a course of training on Claudestine Lathous and Techniques confucted by Larrew 5. PLANIELD (on TDY from Mediquerters) in Safe site - 216 in the JUNAVE area. The course, which was conducted in Spanish by PLANIELS, who was known as Lagel LLATIN, included Sparational Security, Cover, Clamisatine Communications, Report Writing, Target Analysis, and Lyent Recruitment. Instruction methods used included briefings, discussions, field exercises, cases, live proctical problems, and essigned resting. Cthere in the training group were AMAGREE/1, AMAKA/1, AMTRUNK/8 and AMTRUNK/13.

This Trainee had porticipated in Pocurse shaller to this one and also presented by Parmins in Morch, 1963.

Q. Judging by David is related during the tiviling group discussions, by his solutions to the verious problems, in by his performance in protical live problems, it was appearant that he has increased his capability for and understanding of classisting eperations cause which 1963. The practical experience Subject has hid in planning and conducting operations in the past mine and a has given him a certain degree of professionalism and as a result, this Trainee was of great value in essisting the Instructor is conducting the source. Subject is sware of the codel and political reliably and operational environment existing in the target error, his apparent to have arrived in such sensitive conclusions on the operational limitations and possibilities preveiling in his native country.

MEMORANDUM FOR: Chief, PM Branch, UMNAVE

. FROM

: Chief, Training Branch, JMWAVE

SUBJECT

Training Evaluation Report on AMTRUNK Team

I. During the period 20 May through 5 June 1964, the AMTRUNK Team was given training by Alton T. PIRNACK and John K. TARTARILLO at Safesites #211, #216, and #116, in the following PM Subjects:

### A. Map Reading

1. Introduction to Map Reading

24 Marginal Information

3. Grid Coordinates

4. Measuring Distances

5. Azimuths

6. Intersection/Resection

7. Contour Lines and Elevation

8. Silva Compass

SEP 25'1964

### B. Caching

- 1. Introduction
- 2. Operational Uses of Caching
- 3. Steps Taken in Caching
- 4. Site Selection
- 5. Site Requirements
- 6. Site Locations
- 7. Methods of Caching
- 8. Packing
- 9. Recovery
- 10. 12 Point Report

## C. Weapons:

- 1. M-2 Carbine
- 2. 1918 A-6 LMG
- 3. FAL
- 4. Swedish "K" SMG
- 5. M3Al SMG w/Silencer
- 6. 9mm Pistol

D. Night Movement exercises consisted of observing and reporting on the Experimental Paint Laboratory, Farm Labor Camp, and the Princeton Packing Plant.

CONTRACTOR TO THE

20,-307337

E. A Daylight Observation and Reporting exercise was conducted against a Surface to Air Missile site.

### II. Team Evaluation:

During this period of re-training, the AMTRUNK Team performed in an overall satisfactory manner. Two team members did not perform up to the Team's overall demonstrated proficiency, however, the continued strong leadership on the part of AMICE/14 should raise the competence of the two weak team members. The team members are quite compatible, and espirit de corps is good. Their motivation and morale is high. The AMTRUNKS were safety minded on the range, practicing good security at the safesites and during night movement exercises.

### III. Individual Evaluations:

### A. AMICE/14 - TA - "DAVID"

David is a personable young man in fair physical condition, possessing above average intelligence. He has the ability to learn and retain material without difficulty. Due to a tooth extraction and subsequent complications, he was unable to participate in the following training activities: Class work; 20, 21, and 22 May and 3 June. Night Exercises; 22, 26 and 28 May. David possesses the ability to express himself clearly. During -the student lecture periods, he lectured and answered questions with confidence and knowledgeability. David has the further ability of understanding and executing detailed instructions with a minimum of effort. His approach to training was positive. His motivation and morale was good; his interest and enthusiasm outstanding. David performed very well in the map and compass phase of training. He can accurately ground navigate, read coordinates, measure distances, and locate unknown positions using intersection and resection. His report : the one night exercise he participated in, was too general, lacking important details on the target observed. With more practice, David's reporting capability should show marked improvement. In the night movement phase, David had no difficulty with terrain movement, having a good sense of direction. He was able to use all available points of reference to the maximum. In Caching theory he did exceptionally well, as indicated by his test score of 94%. This is a good example of David's ability of retention, since most of the Caching lecture took place while he was absent. David had little difficulty with assembly and disassembly of weapons. He demonstrated good marksmanship on the range, and is quite safety minded. As the leader of this Team he demonstrated initiative, common sense, self-control, and maturity. His overall performance during training was satisfactory.

14 July 1964

MEMORANDUM FOR THE RECORD

30

SUBJECT: Assessment for Future KUBARK Utilization, AMICE-14

1. AMICE-14 was recruited in March 1963 for the AMTRUNK project which is concerned primarily with MMAPRON activities. In October 1963, AMICE-14 became the P/A of the AMTRUNK team and concurrently Team Leader. He has 6 other AMTRUNKS under his supervision. AMICE-14 continued in this dual capacity until June 1964 when he was told that he would not be permitted to re-infiltrate in the near future. During the course of five infiltration operations over the past year and his dayto-day duties as Principal Agent between operations, AMICE-14 has become thoroughly familiar with the objectives and accomplishments of the AMTRUNK operation -- and concurrently, to a lesser degree, with a parallel MHAPRON operation (AMLASH) -- to the point where his capture inside could result in the complete collapse of both projects. This latest development in which his activities have been confined to the continental limits of PBPRIME is strictly against AMICE-14's wishes. As stated above, AMICE-14 has participated in five clandestine infiltration operations under KUBARK sponsorship and in another ten before he became connected with KUBARK. The five missions met with varying degrees of success but in each AMICE-14 showed an uncommon amount of personal bravery tempered with a realistic application of the principles of clandestine operations. His performance in these operations has also been marked with a resourcefulness and stick-to-it-iveness which testify further to the high degree of motivation and personal integrity which this agent possesses.

- 2. AMICE-14 is 27 years old, married, and has three children from four years of age to one month. He comes from a family of professional people and has himself completed 4 of the necessary 5 years for a law degree at the University of Havana. While still in Cuba, AMICE-14 was a student leader in secondary schools in both Matanzas and Havana Provinces and a member of the Directorio Revolucionario (DR), one of the most active of the anti-Batista organizations and probably second only to the "26th of July" in effectiveness. After the revolution, AMICE-14 held responsible administrative positions in the Provincial Government and in the Bureau of Motor Vehicles. For a person of his relatively young age, he has many close friends in high positions in the Castro Government.
- 3. The most remarkable thing about AMICE-14 is that he is mature far beyond his years. He has packed a lot of living into 27 years. He has been a revolutionary since his late teens and so much of his life has been occupied with clandestine activity of some sort that it is really the only "trade" he knows. (Although AMICE-14 may not admit it except to himself in his weaker moments, it may be next to impossible for him ever to settle down to any kind of normal life). Many of those young Cubans who have been fighting first Batista and then Castro with an honest zeal and dedication are either dead or serving long prison sentences. Few who have been as active as he are still alive or free. What has

KAPOK

art K to be from the

, ...

personally involved, in an active capacity, in the fight against Fidel. He is reluctant to leave the WAVE area and to cease active operations against Castro as long as his services are needed. He has said that he always intended to complete his education some day but that his own and his family's future will have to wait until Fidel is ousted. With his past experience in student activities and clandestine operations, he could be invaluable in the right Latin American university. However, he intends to think of student activities as child's play compared to the MHAPRON objectives of the AMTRUNK project. It is still problematical whether or not he will accept this proposal.

- 8. ANICE-14 speaks adequate English for operational purposes and for social conversation. He understands idiomatic English with little difficulty. His written English is poor but both his written and spoken facility with the language could be improved with some tutorial training. He wants to speak proper English and he tries his best to phrase his sentences gramatically but he, at least in recent years, is hampered by a lack of formal education in English. While he combined both P/A and Team Leader functions for the AMTRUNK team, his case officer did not press him to provide written reports. His reports were given verbally to his case officer who would then prepare them in English. He has since been given the use of a typewriter -- he had taken a course in typewriting -- and his first report (in Spanish) appears to be thorough and comprehensive. There is no reason why he cannot be developed into a good reporter because he is very observant and is a keen student of human nature. He will probably have to be prodded to continue to write but he has not yet objected to it.
- 9. In summary, AMICE-14 would be ideal for anti-Communist student activities in Latin America--if he wants to give it a try. This is still only a goal for the immediate future-he cannot be a student all his life. The biggest challenge is to find a way to continue to utilize his talents. It all depends on the Cuban situation. If Fidel is ousted, there is an excellent possibility that some day AMICE-14 may well be a very influential person in a free Cuban government. If the situation in Cuba remains status quo and if a way can be found to "internationalize" his thinking against Communism as a world menace rather than as the more localized personal cancer that Cuban Communism represents to him at present, he could continue to be of immense value to KUBARK in other Spanish-speaking areas for many years.
