: Comments on NEP Plan for Anti-Castro Operations

TET

1. The Hoviniento Revolucionario del Pueblo (MCP) has substitud a plan for the conduct of anti-Castro operations. The original was received from the MCP Chief, Hunuel Antonio Ray y Sivero, in Hiami on 17 June 1961 and a copy of it hundcarried to Scalquarters on 19 June 1961. It is our understanding that cortain (to us unspecified) elements in the United States Government view the Ray plan with from, feeling that the "take" in the way of information and the maintenance of a resistance organization in Cuba would be worth the price.

2. We have been asked to comment on the NEP plan. Attached are the comments of Mr. (Michael Taylor, forwarly of this Section, and several members of the Mi/M/PH staff. Paragraph 6 was submitted by Nr. Dave Phillips, Chief, MI/M/Propagands. I might add that no one is in agreement with the entire paper. We all agree, however, with the conclusion that the plan, as submitted, is not one moriting support from this or any other U. S. Government agency. We see little chance for a reasonable return for even unless real control by the provider of the funds is built into the plan.

E

Robert 3. Noore Chief, WH/4/PK

14-00000

1. The HFP plan presented by Manolo Ray proposes, in brief, that the HFP be provided with funds in the amount of \$2,343,000 for a six-month period, with which to mount anti-Castro operations. It is assumed that additional financing would be provided, at a rate encoding \$2,000,000 per year, until the objectivos were achieved.

2. No where in the plan is there any statement as to what return, if any, the providers of the finds vould receive for their appart, other than the incolledge that the money had been provided for furtherance of the desirable goal of bringing about the damise of the Castro regime.

3. It is noteworthy that the plan insists that the HRP retain complete and sole control of all the operations contexplated. Thus, it states, on page 6, that:

"Contributions will be received without compromising the responsibility for decisions and organization of the plans. This does not rule out our search for commelling and coordination with other factors present, but without ever surrandering the responsibility and absolute control of the operations. (Universiting added)

It also appears to be the MEP view that its position should be enclosed to that of a government-in-exile which has been recognized as the rightful regime of its country. Thus the plan states that:

"..... with the poversments willing to support us we should establish high-level contact which will make it possible to discuss questions of basic policy of events and plans opportunely, on a mutual footing." (Underlining added)

4. The operations contemplated by the MPP are not too dissimilar from those proposed by the MI/4/PM Section for FY 1952. They include the operation of maritime assets capable of reaching all Cuban consts; the operation of maritime assets capable of reaching all Cuban consts; the operation of maritime assets capable of reaching all Cuban consts; the operation of maritime assets capable of reaching all Cuban consts; the operation of maritime assets capable of reaching all Cuban consts; the operation of serial supply craft (from two bases); the training and infiltration of W/P operators and intelligence agents, support of internal guerrillas, and the training of eight or ten 150-sam groups for introduction into Cuba at the right time. (There is also considerable stress given to the mounting of extensive psychological variars). The 12P plan would pose many of the problems that any PP program does -- the when, where, how, and how such questions involved in procuring and operating air and maritime bases and the polley questions relating to actions which include sabotage and active resistance. -2-

5. It is our view that the MRP plan should not be supported in its present form for these reasons:

a. The MEP socks exclusive control of the anti-Castro resistance. The plan itself states that the best hope for the Onean people is offered by the set of ideas and aims of the denocratic left. Aside from the truth or falsity of that statement, the MEP is in no position to claim effective lealership of the anti-Castro resistance. There have been, and are many groups in that field. The MEP has no record of action of which we have reliable evidence which would argue for giving them preferential status. In specific instances their claim to certain capabilities have been tested and found winting. It is our view that reliance upon groups as such, with no control, is detrimental to operational achievement.

b. The HTP seeks "blank-check" financial support while retaining complete control of operations. So for us we are aware there is no provision in either Agency or U.S. Covernment policies and regulations which would perait the handing over of the substantial sume enviseded by the HTP plan without retention by the dama of the same measure of control over the use of the funds. The MTP plan, e.g., almost containly would involve operations sounded from bases within U.S. corritorial jurisdiction, yet these operations would remain under HTP "absolute control". We don't that the F.B.I., (hustons and Isalgration Service, Coust Guard and other concerned agencies would ever agree to any such arrangement where U.S. territory is concerned, and we would certainly be in no position to wouch for the HTP operations. Anti-Cestro operations monited from any there ditails of Cuba are going to be attributed to the Ented States. Since that is the case, the U.S. Government must control these operations as effectively as it cam.

c. The MP socia to operate on an equal footing with the providers of funds. While governments, including in some instances governments-in-exile, can be treated as equals by the U.S. Covernment, there is no precedent for extending such treatment to a private organization. To do so in this case would result in the arcusing of the bitter smalty of the anti-Ray resistance groups, of which there are many, without any corresponding benefit.

d. The this from MC operations would not justify the cost survised. The MC take, to date, whother in intelligence or in robistance activity, has been negligible. There are many news stories which refer to the MC as the largest and best organized of the robistance groups. The MCP plan claims organization down to the township level and states that:

The MRP has an extensive communication net and is competent in obtaining indispensible elevents of intelligence.

This may be so, but we not move of any extensive valid information from the 157 of any insolutions resistance activity conducted by them. The entire history of Somey operations bivolving groups suggest the inedvisedility of hamling over substantial sums in the hope of a future

619315

"taks". Aside from certain testod liaison arrangements, our "taks" is taken by agents serving under our direction, regardless of the groups to which they do or do not belong.

6. It should be pointed out that from a political standpoint the MRP organization and plan have elements worthy of consideration. The most important is that the MP program is one that is attractive to the Cuban masses because, of all the exile programs, that of the HTP is the nearest to the originally stated but bacrayed platform of the Castro revolution. For the same reason the 1977 is acceptable to many liberal Latin American governments which do not consider supporting other exile groups. The MTP offers the people of Cuba a positive program of social and economic reform. (Whether such a program would be compatible with U.S. interests is, of course, a patter of controversy.) However, in the political sphere the HPP program appears to break away strongly from the 1940 constitution. In other words it may be "Fluelismo sin Fidel". There are other Cuban exile groups who propose social and economic referrs similar to the MAP in which they attempt to base those reforms on some legal continuity of government; that is, a return to the 1949 constitution as a basis for a democratic government in Cuba.

7. In short, we believe that the iTP plan is unrealistic and unworthy of further consideration in its present form. Developments within internal resistance in Cuba indicate that the HTP is becaming part of a unified resistance and the 122 personnel inside Cuba have denied Fanolo Ray as an external leader. Our review of the 17P position inside Outs does not indicate that the 122 has the resources for as extensive a plan as presented nor can the internal ISP hope to direct such a plan in conjunction with other resistance elements. Even if auch a plum were reasible, we do not see any possibility of securing a reasonable return for the tremendous amount of money required for this plan unless some real control is agreed to by all and made a part of the plan. Taking into account the consolidation of resistance elements presently taking place in Cuba, it is the Agency's conception that we can best accomplish action operations against the Castro regime by dealing directly with this unified group or its representatives in other groups. Laterie: and financial support would be furnished these groups as they reveal they have the assets to accomplish specific operations and Agency-trained agents and comminication equipment vould be introduced to the various groups in an effort to have some control and direction of all efforts undertaken. It is presently planned that the APP, as one of these groups, would receive essistance and direction in the future as specified above. However, it is felt that the present situation among the resistance closents within Cuba rate any support of this granitosa plan sumsitted by the MP impractical at this time.
