MEMOPANDUM FOR: Chief, CI/Project SUBJECT: Luis TEDESCHI

 This office is extremely interpsted in obtaining all available information on one Luis TEDESCHI, who was reported to be residing at Pichincha 969, Duenos hogenized.
Aires, Ain the early part of 1943, at which time he allegedly was of interest to the PIS. The attached document refers to a Luis TEDESCHI residing at this address in 1942 and to an individual by the name of TEDESCHI who had resided at Estados Unidos 0366 in 1942. Apparently the information as shown on the attached document was obtained

2. We would appreciate having you tell us if you know of any way we might locate referred to and possibly any other firected to TEDESCHI while the U.J. Office of Superior has in Station.

REPORT No.350

Results of our first conversation with a young man from TOPREL VEGA, SANTANDER, about 28 years old. At the beginning of the war he was in the army in KOROCCO and spent the whole war in Franco's army. He comes from a family of small garage-owners. Noither he mar any of this family have belonged to any political party or syndicate although his sympathies have always been on the left.

SPANISH ATTITUDE TO THE RECIES AND THE WAR. - He says that the immense majority of the Spanish people is against Franco and the Falange, workers, peasants, exployees, bourgeois, big and small and a large proportion of the soldiers and the Raquetes. He says that everyone hopes for the victory of the Allies. In it there is a blind trust, especially when the U.S. entered the war as the U.S. and England are the most powerful countries in the world, especially with the assistance of Russia. Only the Falancists desire and plan for the victory of Hitler, even though "there are many Falangists too who take a very black view of him". He says the majority of people sympathise with England. They have complete faith in the bictory of the Democracies. There are sup orters of the USSE, but the immense majority, according to our informant, do not like "communism" and prefer Democracy. Be is obviously rather muddled by the Falangist processeda against the U.S.S.R. Be says that the entrance of the U.S.S.R. into the war gave rise to happiness all over the world, although there had been a great deal of confusion before, through the "Treaty of Aid between Russia and Germany." But this confusion disappeared with German aggression against the U.S.S.R. He says that the Gorman defeats on the Russian front raised morals and renewed everyons 's confidence in victory. Hitler's admission in his speech of how much they had suffered in Russia in winter, and that they use on the edge of catastronic. produced great joy mone the people. He says that the entry of the U.S. inte the Ter cannot a very good impredator; and increased peoplets confidence in wictory although Pearl Harbour caused some demoralisation. He says that no one wishes Spain to enter the war, except the Falangists. Franco does not wish it

and desires neutrality out since those who command are Serrano Sunar himself: and the Falangists, Franco has no choice but to do what Hitler orders him, and there is serious danger of war for Spain. He says that the Anglo-Soviet and the Soviet-American pact are known through the Palan ist press which has spoken of them. They made a very good impression on the people. Asked if he knew that the said pact stipulated that after the victory mations would have freedom to decide their destinies without foreign interference, he cays yes, the press published it. About the Second Front he says that everyone thinks of it, and is hoping for it to 0 en if pussible through Spain. That the day they disembark, all the people will rise. Asked what the people would do in case of a landing in France, he said that his o indon was that if that happened the Spanish people would rise, even though the invasion was not on their coasts. The agreement about the Second Front is also known. He says the people who are most fervent supporters of the Nazis are Sorrand Sumer, Primero de Rivera, and a certain Count whose name he does not anow. He often says that he knows nothing of politics, because he only read the sports news in the papers and did of want to know anything about the Falange. He says that there are many preparations for war; they are making fortifications on the coasts of Galicia and placing a considerable amount of artillery there. He says that the political force of the Falange and the syndicates is "artificial"; everyone hates them. The people belong to the sindicate because they can't help it, but they do not pay their dues or take them seriously. Discontent has even reached the ranks of the Falange. Many clerks, students, and people who joined it thinking they wave going to steal the music" are now very discontented, and do not pay their dues, and when they are threatened with being expelled they say that is what they are waiting for, for the Falance to play at "fisticuffs". There are many officers in the army wto are not in agreement with the Palange or the idea that Spain is to go to war. The most violent op osition comes from queipo de Llano and Yague. No one knows where Queipo is going and Yajue is thought to be in exile in the Prov. of Pontevedra. Both were cashiered, Queipo for protesting against food leaving for Germany and Yague because in a speech at Zaragoza, he said - wwe do desire a great and free Spain, but without any Plue Shirts, Red Shirts, or prisoners."

All the sergeants say that they are very discontented, because they earn 5 pts. w ich keeps them very snort and of the soldiers he says-min a word they are hungry, many years in barracks, and then the danger that they might be sent to war". He says that they are well-uniformed, just as well as before the war. They have dismissed the 1941 Dmart. He thinks that there was very little sympathy for the Division Asul and the people laughed at those who volunteered. 40% were forced to go, others went because they were hungry, and there were/volunteers. He says that survivors came back in a state of panic, there was a lack of food and equipment, several of them mutilated themselves in order to escape from this inferno. All say that the Russians are very well-armed and fight with great courage.

HELP TO THE NAZIS. - He says that his opinion is that a great deal of food is taken to Germany, although he can give no details, but if there is no food and olive oil in Spain where is it? He says that in Torrelavega the "Fabrica Continental" is working at high pressure, making tyre covers, while in Spain transport is held up for want of them.

THE CHURCH. — He says that it is not true that in the Church there are anti-German and Anti-Falangist groups. The supporters of the Regime are the Falange, the Germans and the Clergy, in that order. The Church wishes for the triumph of Germany, in spite of her anti-Catholic policy because they believe that in that case they will be able to preserve their position of influence. He says that English and Russian news can be heard alth ugh it is very difficult and is forbidden although there is no watch or inspection. He says that everybody is against the Falange and submissione to Germany, including the monarchists and the rich on whom the Falangists inpose large fines for racketeering. Many of the monarchists, bourgeois etc. are on the side of England. Democracy is considered as a possible substitute for the Regime. A democratic Republic like there was before the war. A Regime of peace and work. Speaking of the solution of the present situation, he says that they want a regime of peace and not a revolution. The he contradicts himself by saying t stit will not be achieved by peaceful means. He says that this would be the best but that the deaths, the betrayals, the crimes must be avenged.

C. S. S. Statisty

The people are very united and there are not the old differences between the parties of the Frente Popular. The policy of National Union is unknown, he has heard no one speak of it.

DETAILS F THE PEOPLE IS STRUCCEE - He says that he thinks that secret organisations function, especially in Bilbao and he says particularly "It is a city of brave gen". He says that notices rainted on the walls are aften seen there. He only remembers one "Less Franco, more white bread". Asked if the nitices were signed by any party he says no, because it would live away the people who had done it. He says that he knows, because he was told, that in Bilbao there were illegal pamphlets and even a newspaper in circulation. but he does not know their content. He thinks that there ust have been a clandestine press, but as he was hever an idealist the people who did thuse things would not trust him, and as he is out of everything he does not know any details". He says he thinks that the people working in "ilbao are nationalists and communists, especially the latter. That a few muchs are two Italian submarines, badly damaged by English planes, came into Santander. Two hundred persons were arrested for discussing this, and many people thought that the second front has already begun. He gives no more details. He says that Serrano Suner was the object of an attack in Madrid when he met Arress, and when the latter tried to protect Suner he was seriously wounded and had to undergo a critical o eration. Isked if he thought there was sabotage etc., he says no - the disorganisation of the train services is due to all the employees being new and not knowing their business.

GUERILLEPOS -- He says that "El Carinoso" was working in Santander and "The Railwaymen" too; that "El Carimoso" cane from Herrenes and had his headquarters in Santander. That he was recently killed through quarrels and imbroglios caused by his girlfriend who was from the J.C. and nad another lover, and it was he who was arrested at the same time as El Carinoso. It was he who informed against them all. Many people love the Juerilleros, although there are many people who help them through fear, as for example a relation of his from whom they took his only fig, but in general the Guerilleros behave excellent ly. "El Carinoso" was once in Barcelona, where he went in a cab to get his testh fixed. El Carinoso was not a politician but took to the mountains in order to avange the death of his cousin who was assassinated by the Falange. That they often, like the guerilleros of Asturias, disguised themselves as Civil Guard, went down to the villages, and arrested the Falandsts. But where there are war most Guerilleros, and the most active, is in Asturias. Six months ago, about three hundred guerilleros were ready to embark on the coast in order to leave Spain. But there was a quarrel and a terrific fight between these guerilleros and the forces of authority, with many dead, and after that they retreated to the mountains. He says that the politicians knimexrams who are most po ular are Prieto and Azana. Some speeches of Prieto's have been cir-culated through Bilbao, but he does not know what they say. here is also in circulation an article, reproduced from an English paper, reprinted by an employee in the Real Comp. Asturiana, de Ins. Republicana. The article refers to the powers and resources of the Allies and their chances of victory. He says he does not know of any activity of the compunists, that this is obviously the activity of other p-ople who are not communists; that for example the man who reprinted the article and those who read it were all on the Republican Left, and if there is any communist activity it is so camoufla ed that no one knows who is the author. He says that during the crossing they were detained by the English in Bermuda and in Baltimore by the Americans. That the English made a short examination, they did not interrogate them in front of everybody and left them the letters they carried. In Baltizore they were interrogated one by ine and were asked about fortifications, food, if they sent it to Germany, etc. When our informant said he had been in Franco's army up to the war-they asked himwhy he did not desert to the Republican army.

SOLIDARITY. - He says there is no organisation for solidarity, that this only exists between groups of friends who have a relation or acquaintance in prison. They are not allowed to visit the prisoners more than once a week. He says that the killing goes on, and that in Weg, a few days before he left, a lightenant of the Civil Guard was shot for having gone for a walk along "at his own risk".

REPORT No.351

MARIA RODRIGUEZ, about 29 years old. Comes from a confortably-off peasant family in the Province of Orense. She is very sluggish and at every question repeats that she does not know and that women do not understand many thin s. She had only a little more than an hour to spare as she was busy in the evening and had to leave for the interior in the morning.

S/4612

<u>WAR</u> — She says that she was surprised when she arrived in Havana as she thinks there is more enthusiasm in S ain than here and more confidence in an American victory. The peasants "like everyone else" would like the "American" to win, even those on the Right are sure the dermans will lose. She cannot explain the nature of Franco's assistance to Hitler, she says only that "as it was the Germans who won, Spain owes them more than it has". She cannot be explicit, either, about the dangers of war, but she says that Franco's soldiors, the young men in general, and as a concrete instance a unthar of here who served five jutimes in Franco's gravy mult go up into the mountain and shoot before going again to the war. About the Division Azul she knows only that when it was first formed a volunteer left from her district. He was an outlaw who had committed crimes and she says that he went through fear of the consequences. The people do not like the Blue Division. They were not asked for anything for the "volunteers".

FUTURE PROSPECTS - She insists that there is great confidence that it will soon change. So much so that a Republican who was hidden for years and afterwards discovered told her to tell her husband "Do not leave because things will soon change" The village has a hundred inhabitants, and she says that they all hope it will change; but from what we can gather this confidence is based entirely on an Allied victory. She says that if the English opened a second front in Spain the people would revolt, but she says she has heard no c; inions on this point. The people speak mithout fear. She relates that the Falangists tried to take a pistol from har father and that he hid it. They threatened him, they took him in a car telling themesteredereder him that they were going to knock his head off, but the old man remained firm, telling them to do what they liked. They did not do anything to his nor dia they get the pistal. As an example of solidarity against the Falange the old man said he had sold the pigtol to a man who was going to America. They told him to prove it, the old brought as witnesses two peasants who lived more than a league away, without having agreed on a story first, but being quite convinced that the peasants when they saw the Falangists, if only for the sake of contradicting them, would say that what he said was true. A little later they sent him a notice for a Falangist meeting and he refused to go. She does not know if the other peasants did.

<u>ARMY</u> — She knows t at a short time are they discussed the 36 (1936) Draft. Her husband was on service in Orense and deserted and went to Cuba. Immediately the Captain of the Company and a lieutenant went to him house to make inquiries. His brother told them "In his circumstances I do not know what I would have do ne", and the captain and the lieutenant went away saying - "He is right".

PRASAMTS. -- As we have already said, she belongs to a family which is comfortably off, they have several labourers in their employ. She says that the day la bourers, and the farmer are equally gainst the Gevernment and the Germans. To illustrate the situation she says that the daily wage is 20 pts. without food, and 5-mith-food. They all prefer the 5 and food, because otherwise they have nothing to eat. The peasants are very discontented, and show it openly to the Falangist officials when they come to inspect the harvest and when they Fir the prices, saying - "They have no right to do it, it is an abuse", but it appears that it go es no further then this. They have not requisitioned anything but theyforce them to sell to the official buyers who issue permits to authorized buyers. These individuals take the produce to large shops and amass recal fortunes. A quintal of potatoes, they have to sall at 30 pts. and they are sold afterwards by the dealers at the standard rate of four or : ive ptas: the kilo, that is to say at a 800% profit, to private people who require them. And if the peasants take their produce to the market they have to sell it at the standard rate to the dealers. Bo peasant takes any rye to the market, they prefer to run the risk of selling it to private peo le. This is the only way in which they can

1. 15. 9

get other products. They have imposed a new tax; they have to pay 15 centimes for each vinestock. They have given up the "one-dish meal" and they are not forced to contribute to Auxilio Social. She saws that the Dovernment does not know what is woing on in the country. They distribute the sulphate, not according to the number of vineyards, not even according to the number of inhabitants, so that her district which is wine country, gets less sulphate than the next one and produces very little wine, alth ugh it has more inhabitants. A kilo of sulphate is worth 59 ptas. - before it was worth 50 centimes. She says that they ware taking a few things to America and they made them pay in Fielato, in Grense, and in Vigo, and if they had passed through nore provinces they would have had to pay again.

REPORT No. 352

Information volunteered by three Galician easants, bot members of political parties. They remained throughout the war in Franquist territory, although only one of them fought in the array. Very backward politically, anti-Franquist, and more anti-Falangist. ⁹ith the exception of one who was in Asturias as a soldier, the others never left their village which is a hamlet in Galicia.

SPANISH ATTITUDE TO THE WAR AGAINST HITLE: - The majority of the Spanish people with the exception of the very rich and the Falangists are against France and the Falange. They explain that Falangists see what is coming to them through the crimes they have committed, and they are the people who really wish for a Oerman victory, with the object of saving their skins, and the money they have stolen from the people. In Spain, in general, no one wants the war, since they are exhausted, according to our informants, except for the Falangists. It is said that France is a partisan of neutrality, and doily visits the British Ambassador at his private residence and has interviews with him. In spite of this they say there is a danger of Spain being rushed into the war against her will, because in Spain the Germans are the masters. All the world believes that the Allies will be the victors except the Falange. Before the stack on Russia many people were demoralised by the German alwances and began to "think them invincible". When Russia entared the war, enthusiasm and confidence in Hitler's defeat increased enormously, but that was especially when the Russian victories began.

They say: - I do not know what would have happened to us but for Eussis; the Maxis would be masters of the world. They also say that the Maxi army will not stand another winter of war, that they have suffered such losses that the next Russan winter offensive will defeat them although there is no talk of a Second Front. They are sure that the Democracies will win the war. They admire the resistance of the U.S.S.R. They say that Germany has already lost the war as a consequence of the losses suffered in Hussia. The entrance of the U.S. into the war contributed to increase the already existing confidence in victory. They do not know of the Anglo-Soviet and Soviet-American agreements, nor the agreement about the second front. One of our informants asked us what "O Hitler 1942" meant and when we told him he said that they also said it in Spain, because in order to achieve it it was necessary to open a second front. They think that if there was a landing in France the people would rise. They also say that there are rumours that they land in Galicia and in this case thewhole of Galicia would revolt to help the Allies. The same thing would happen in any part of Spain.

The "DIVISION AZUL" is hated by the majority of the people. They say that the majority have been forced to volunteer, and explain how the recruiting is done. Anyone who does not want to go and fight Communism, take a step forward. Some enlisted because of the desperate situation they were in. Some enlisted, too, bec because they were stalwart Falangists. When the recruits left the province a great many people went to see them off, calling them "sons of bitches" and insulting their mothers. When one contingent of "Volunteers" came back from the Russian front at Trun they had to leave the train because the people were stoning them. Many people kent the Oermans and the horrors of the war. They say the Russians are very brave and fight with great courage. That they have large supplies of an unition, and that things on the Russian front are not like the papers said they were. They said that the food on the Russian front was very scarce and bad. It was sent to them from Spain and they suffered many hardships. They all wished to return to Spain as soon as possible; they repented of having enlisted.

""Sero hour for Hitler in 1942 ".

HELP GIVEN BY THE FRANQUIST REGINE A'D THE FALANCE TO VITLER. - How and then they send reinforcements to the Division Apul in groups of a thousand or one thousand five hundred. They say that/in order to r-place the casualties and tho those who return crippled. Even the Falanzists themselves say - "the Russian front is a very serious matters. Those who are recrited to replace losses in Russia are recruited by force, by the process already mentioned. All airmen have to serve some months on the Eastern Front as "training". They say that lately they were training about 130 pilots to send thes to Russia. The war factories are workingat high pressure. The Germans are directing the erection of an aerodrome in the province of Lugo. In Gal cia very few Jermans are to be seen. Military instruction is obligatory for boys and y withs in the "Frente de la aliventud". They also train youths from 15 onwards to serve in aviation. A friend of the informants told them that there passed daily through a city in the North fifty card loaded wit war material in the direction of the French frontier. German submarines refuel at Redondela and Vigo. He says that Enclish meroplanes often make recornaissance flights over the percours of Galicia. They describe Serrano Sumer as the most subservient to the Maxis and in general to the Falangists who have crimes behind them or who have become rich through roubing the people.

3,4012

Those who go to work in Germany are those workers who have nework, or even if they have any live in the greatest poverty. They believe that by going to Germany they will be able to solve their economic situation and that of their families. The groups agent are not very large, according to our informants, at least in Galicia. This is understandable because the Germans prefer specialists. According to our informants, three workmen came back from Germany who say that in Germany the situation is terrible. They hardly eat, there is great poverty. They have the impression that Germany will not resist long in consequence of the situation there is in the country. They also say that a group of Spanish workmen were thrown out of the country because "they caused trouble".

FRICTION BETWEEN THE RULING CLASSES - He does not know of any dissension in the army except the case of Mague and Queipo, and gives data which is already known. The soldiers in general are against the entry of Spalm into the war... They live in very bad conditions, badly fed, badly clothed and ill-reated by the officers, especially by the recently recruited Falandists. They all wish to be demobilised as soon as possible. They have demobilised the '39 draft. By their conversation we observe that the soldiers from the "national" and the "Red" zones receive different treatment. In Galisia there are rany soldiers from Cataluma who have already spent several years in the army. They do not take it difficult for youths of military age to leave Spain; they cited their own cases. One of them is 18, the other 24 years old.

THE PEOFLE'S REET STANCE TO THE WAR AND THE FRANCE ST REDIKE - They say that there is no resistance there at all, because no one can act, and passivity is the opinion and state of a nd of the people. Then we insist they say there have been various train smashes and some derailments which they think were due to sabotage as well as to the defective material. Everyoody knows the British and Soviet war communiques and they are discussed in private conversation. Some people take them down in shorthand and later circulate them. He says that in Vigo there is a secret transmitting station, but it was discovered by the police and all those connected with it shot. They were said to belong to the republican Left ("Isogierda Republicant") and mong those shot there was one doctor and other intellectuals. He does not know any more details. Women corplain loudy in queues of the shortage of foodstuffs. He knows because the rundur went round there that Prieto made a speech in the White House before Roosevelt, and that Roosevelt embraced him saying that the Americas were behind the Spaniards. This speech too is circulating in clandestine copies, but he never could see one. He says that there is no organised political activity because this is impossible. He tells several jokes which are going the rounds, and quotis this one: - Recently they made a film called "We Thieves are Hanest Men". Beneath the announcement of this film in Vigo, someone wrote "The Caudillo's Own Words". He says the press give most space to the English War com-uniques and the U.S. war news bulletins.

WHAT IS THE ATTITUDE OF THE PROPLE TOWARDS NATI NAL UNION. - Talking of Unity they way textually "There, there are no parties, there are only anti-franquists, and all the differences between sections of the Popular Front have disappeared.
Lister is known and has a following in Galicia. The politicians with most prestige are Prieto and Asana and Negrin, although Negrin is the most hated by the Falangists".

FUTURE PROSPECTS. - He thinks of the Republic as the Regime to substitute for Fascism, but without a revolution, and he immediately adds that the Republic will come because when the Germans are at their weakest the whole people will revolt and avenge the crimes of the Palangists. The people's blood rises when they see those who assassinated their relations dressed up in blue shirts. The Falange consists only of professional assassing and robbers. Those who wear the shirt can be recognized by their faces. Those who joined the Falange at first now do not want to know anything about it, and do not want anyone to mear the shirt. There is friction between Requetes and Falangists. The people hate the Requetes less than the Falangists. They say that the schools teach only militarism and religion. There are many little boys who can hardly read, but who can speak of military operations with maps, artillery and aviation. A teacher who was dismissed and came back to his post, told our informants that the Ministry constantly sents these books of military tactics, so that they could teach them to the children. The summer camps for children consist of conding boys to camp and teaching them drills

GENERAL SITUATION OF THE PEOPLE. - They spoke of the terrible poverty endared by th the people, and the high price of food; wages have hardly been raised in comparis son with those paid under the Republic. The Committees of Supply get hold of agricultural products and only leave a small quantity per person for the whole year's supply. Already in their village the Falange had listed the crop although they had not yet requisitioned it, which they had already done in other parts of Galicia. Falangists speculate in foodstuffs, selling them at high prices and so get rich. He says that in Figo a large quantity of rice went bad and had to be thrown into the sea because they would not sell it to the people at lower prices. The rationing is quite inadequate. They were a whole year without seeing olive oil. Naturally on the Black Market it could be bought at 50 pts and more. In a year they only had bread twice. A very small meal in a restaurant costs 16 pts. Two courses and dessert 25 pts. One of them was charged 75 pts. for eating and sleeping in a pension in Vigo one day. A pair of shoes costs 25 pts., a poor suit 500, a dosen eggs 18 or more pts. The people hate the Conmittees of Supply used by the Palangists to make themselves rich. They say that there is the greatest immorality in all official organisations and everyons steals.

In the prisons there are still many people. They treat the prisonars very badly. In the prison of Oviedo, which has a capacity for 600 there are more than 5,500 prisoners. There are batallions of forced labour (workers they call them); they grant some people conditional liberty but they send them to districts where they know no one and where they die of hunger.

Generally these three young men have great confidence in the victory over Ritler, and say Germany may break up this very year.

REPORT No. 353

SITUATION OF THE FRANDULST REDING - 80% of the Spanish people are against the Franquist regime. He mays that to assess accurately the solution desired by this misely percent is very difficult. Some wish, specifically, for the restorall is of the Republic, but he saintens that what everyons is longing for change in the Resign, emothing to relieve the really chaotic situation is a change in the Reside, Simething to relieve use story inder the Republic, and therefore then be talked with people they always underlined the enormous difference there was between that life and life under the present regime). The Falancial waity to a posse of is a north. Division in the Franquist Camp grous daily. The Falcasiata wite impecas in the streets and so do the Requesses, but their electric are contradictory. The Falancists accuse the rest of being ours and wallers to the goetrine of the Falange. For example, he talked to a Falanziat liquitance - the new case from Cuba to fight at Franco's side in the cafe El Cate Degree in Marrie, a fee days before enbarking. He seemed to be ashead of the present attuition in Spain. He excused himself by repeating the Palencial the that the Falance had been betrayed. (This must refer to the incarchicle, Requeses, and ether resets carles). The Palangists are evers of the present situation in Sala. Barbapa that is the reason may they are seeking a solution which will pressrve their class privileges. In his own phrass - the Presidiat regime have from a very this thread, which sust map very soca. (Perhave this is we only the right of our informati, but also of some ailitary and civil leaders with then he was closely connected). For this reason, be says, they have tried to give the impression of a change, whing advantage of the Cause Corporativa", and, if it is true, with the restoration of a Falengist-Spacetory.

ON THE HORANCET. - There is, he says, no public achivity with this goal. There does not exist what we might-call psychological receptivity for this measure; but undoubtedly angetiations in this direction are being earried on by high officials of the Francist Regime. He was in Eadrid on the 22 - 23 June 1942, at the time of the visit of Den Juan. His visit was not given any publicity, but there uses aldespress police precautions. The streets nearest to the palace were closed to the public and a strict watch was kept. There were also arrests of suspicious persons, those who had been in prison etc. But the press gave m sign. The presence of Don Juan was public property. The people seemed completaly indifferent. The monarchists displayed no activity either. Perhaps, he added. they took processionary measures with some people characterised by their adhesion to the Monarchy. His impression is that if the monarchy were restored in Spein it would be in alliance with the Falangists, but the peorle would still have the impression that the situation had changed. E9 maintained that there would be the semblance of a coup distat, apparently directed against the Falange, but Franco would remain head of the army. If so, hhings would, fundamentally, remain men as they are; that is, the Spanish State would still be entirely subordinated to Eitler, and mithout changing the policy of "partiality" they now maintain, to one of "meatrality" in the war. They would take this step, in his opinion, only in the last resort, if faced with a second front in Burope, and on the appreach of Ritler's defeat, which would, naturally have an immediate repercussion on the countries subject to the Namis in Europe.

ON THE COMPLETE SUBSERVIEW OF THE FRANQUIST REGIME TO HITLER. -- In Spain the Falangists do not speak of their position of "Neutrality" in the war but of spartiality". This is their attempt to justify the help they give to the Ards. There are German submarine refuelling stations in Vigo, Reiondela, and on the Galician coast. This is public property, but every now and then the press publishes a complete denial that Aris submarines refuel in Spain. These demials are very frequent but they do not give much proof. Those who can see tenker-launches carrying on this work langh at these ridiculous denials. Also on more than one occasion German submarines have been repaired in Spanish dockyards. In Calicia it is quite impossible to get a pot of jam. All the production, which is enormous, goes to the Germans. There are places on the frontier, through which trains pass with produce for Hitler. There are fortifications and artillery on the coasts of Galicia, where the Germans are in command. There are also new acrodromes; some already finished and some under construction by German technicians. They fear an Allied invasion in Galicia. Hitler is assisted not only with food and primary materials, but also with men.

There is continuous propaganda for the sending of volunteers as workers to Ovrmany. Unwilling contingents of soldiers have left for the Blue Division.

THE DIVISION AZUL was a Falancist manoeuvre to give political importance to some Falancist leaders. The manoeuvre turned out very badly. This Division is the most unpopular innovation of the Falance. Our informant talked with 11 survivors of the division, who had returned from the Russian front on account of their wounds. One of them was 18 when he left as a volunteer, without the consent of his family. He asked if he would return to the front again and he answered categorically My eyes have been opened. I will never return². They all speak of the bad food they are given - mainly vitamin pills and pots of jam. They speak of the courage and fighting spirit of the Russian army, but above all of the contempt with which the Ogrmans treated them. They regarded them as inferior beings and they also said that when they caid compliments to the German women, a Spanish custor, they answered them distainfully as if they despised them. There were cases of self-cutilation in the ranks of the Elue Division. At any rate their panic was obvious, and they refused to return. Everybody speaks ill of the Division Jaul.

Its commander Munos Grande, is the most despised of soldiers. Countless jokes about this division circulate in Spain. Our informant knows several, but cites the following as an example which came from the Chib Benevente-Arniches etc. "KI Gato Negro" in Madrid. Munos Grande sent a telegram to the political address of the Blue Division at the front - this was the address; F.E.T. URSS M.G. The telegram arrived and no one could decipher it, but finally a soldier said - "This is quite clear", and read the following words - "We were all deceived. Serrano Sumer is the only one responsible. Many thanks". ("Puimos enganados todos. Unico responsable S.Sumer. Mychas gracias").

ON THE DARGER OF WAR FOR SPAIN AT HITLER'S SIDE. - His impression is that Spain wil will continue to assist Hitler as she is doing now but that she will not enter the war. Some of the Generals are in disagreement with the present policy among them Varela, Aranda, Yague, Queipo etc. Among the soldiers the feeling against the Pascist Regime is very marked. They complain of bad food, treatment, clothes.... too much time spent on marches etc. Queipo, on his returning Italy was rule to Serrano Sunar and struck him for which he was seat back to Italy. General Aranda spent a sonth at Oljon and talked to our informant. They had an interview. Our informant has a real admiration for Aranda, who, he says, is a gentleman. He says that Aranda appeared to be lightist. Among his remarks he remembers the following words. We Spaniards are robbers. He are, and We have been for some time. If you walk through the Castellana of Madrid you will see the susptuous palaces owned by Wesler (?) and Prâmo de Rivera, etc. built wi with the blood of the Cuban people and the poor Spaniards who went to defend the Spanish colonies. The colonies were lost but the military leaders, whose duty it was to defend them, enriched themselves. How it is the same thing over again. We made a revolution in order to bring progress to Spain but we have spilt blood in torrents uselessly. The result was not worth the expense of so much blood and so much repression ".

In his conversation, although he said nothing against the Germans, he showed contempt for the Falargists who are enriching themselves; he shewed particular fear of the treatment meted out to the soldiers in barracks. His impression is that it was a result of the seriousness of the situation through which the Franquist regime was passing and fear of what the outcome might be. He said nothing about the state of the war, and whether he was a partisan of England. In the conversation he had with the General 1t is possible that there was another aspect, which through discretion he did not repeat.

HUNGER SITUATION. - The situation has become noticeably worse during the last months. For several months already the rationing has been practically mil. The rich buy everything on the Black Market. Our informant, with his wife and five children spent from 9.600 to 10.000 a month on food alone. He says that during the year his expenditure on food - he does not drink nor moke - was 180.000 pesetas. Of course he had a special clothes budget - 600 pesetas for a suit and 180 to 200 for a pair of shoes. When asked how the workers live who ears 19 to 15 pts. salary or perhaps less, he says very badly. They do not eat, and adis that besides they cannot earm more. Is the workers and the people in general had a greater purchasing power, life wild be impossible in Spain as they

would also buy on the Black Market and no one would eat. Therefore the privileged classes can eat, and they can only do it if they have a fortune. They accuse the Falangist leaders and the Government of racketeering on the Black Harkets. Desense fortunes have been made in a night. "They go tobed poor and wake up millionaires? This is the only explanation of the fact that one is allowed two packets of tobacco at 0.90 per person per week, and in the Compania Arrenditaria de Tobacos, which is a state monopoly, one person can buy from 100 to 10,000 packets of the 0.90 at 7.50 a packet. He also relates the following instance. Petrol is scarce in Spain. A litre costs 15. pts. Cars frequently stop in the streets for lack of it. He cites a case which happened in the spreet of Gijon. A distinguished military personage had no petrol He saw a tank-convoy of Campsa pass and asked the chauffeur for a few litres, and when he refused, he ordered them to give it to him, as a superior officer. The chauffeur refused again, and in a panic explained that he could not do it because he was not carrying petrol but olive oil, without being able to explain which military leader or leaders it was destined for, although he know it was to be sold/contraband.

- He cannot calculate the number of prisoners there SITUATION OF THE PPISONERS. are actually at the soment although he asserts that it is at any rate enormous. By reason of his position he has vis ted prisons and fortresses, and is terrified at the terrible treatment in the "Comisarias" Civil Guard barracks etc. On more than one occasion he says he has saved more than one Republican from ortain death. The prison that he knows is the Coto at Oijon. It is at the moment completaly full. The treatment is inhuman. They do not give the prisoners a call number but allocate them only a square meter for sleeping, standing sto. That is to say that when a prisoner arrives he is given a metre of ground. Nor do they give them a mess. Lately they agreed to give them a peseta daily for maintenance. He does not understand why there are not more deaths, as with one peseta a day in the prison canteen one can only buy bread. They gook the miners who were prisoners to camps so that they could work in the mines. They gave them 50 www. day wages for bachelors and a peseta for a wife and 50 cts. for each child, to the married ones. They keep then working ten and twolve hours estly in the mine. The number of shootings has distinished. It is imputed to the fact that "almost all must have been tried".

<u>THE CLERCY</u> — He says that the clergy have never intervened in politics from the pulpit as much as they do now, sometimes inveighing against the Franquist Gevernment, and at other times, naturally, defending the policy of the Falange. Numbers of the priests and monks continually excound their view on the political regime and the points on which they differ from it. As a characteristic example he relates that about two months ago in Gijon there was a house used provisionally as the Church of San Jose, which was destroyed during the war. A priest, "professor at Salamanca, gave five lectures. In these lectures he spoke almost exclusively on political Questions, and attacked the Franquist Government for their method of supply and distributing the foodstuffs smong the people, saying that what was wanted was more rationing and less Franquist regulations. He also advocated the necessity of a pardon for all condermed people and other things that our informant does not remember. 500 people went to the first lecture, but im the second one, when they heard what the subject was, was attended by literally all (H jon.

<u>RECONSTRUCTION</u>. — Reconstruction is only done as a matter of private enterprise by proprietors and churches. In Madrid, the Montana barracks, the prison, the workers districts, damaged by the bombardments, remain as they are. Nothing has been rebuilt. The Arguellos district has been partly rebuilt. Every owner has taken in hand his own property. The Franquist reconstitution policy is a mythe The people mock at it and make jokes, among them the following - In Gijon they moved a erected a building marked "Reconstruction Office"; in the hallway there were two doors, one marked "for partial destruction" and the other "for total destruction" So a well-known Asturian who was visiting the office about his house which had been partially destroyed went into that department. Once inside, there were two more doors - "for those who have some resources, and for those who have not". He went through the first door, there was another room with two doors - "for those who are Falangists, and for those who are not". He want through the second door and found himself in the street.

PACTS ABOUT PESISTANCE. - In Spain acts of sabotage are carried out on the railways, factories, etc., although he cannot decide whether these are organised actions decreed by illegal organisations of Spanish Republicans or are spontaneous acts of workers who are enemies of the Falangist regime. He does not know any concrete instance of the activity of the workers organisations, C.P.S. ste., but when he was in Madrid on the 22nd and 23rd of last June, there was a film on called "We Thieves are Honest Mans, There were thousands of Lampoons done on that, some very claver and suggestive which were scattered throughout Madrid. According to our informant, one day the lampoons appeared printed in the same type lettering as the poster, with the following - Pwords of the Caudillo, from a recent speech". For this reason there were arrests and a number of beatings in Medrid. He also saw how the people had lost their fear. In the Oran Via in Madrid a man cried out that he was not only red but communist, and he could not endure this any more. Apparently the people told him to be silent out he did not take any notice. The R.A.F. bombardment of Cologne, which was known in Spain from the English beaadcasts, was celebrated almost all over Spain by the people who stayed up much later than the usual time in the streets, drinking in bare, etc. He says that even the police took part as they are largely Anglophile.

GUERTILEROS — He says that there are many in Asturias; there is a state of war. There are more and the 'Tercic'. The guerilleros appear occasionally in the villages and avenge the deaths of anti-Mascists who have been murdered by the Falange. They take food and clothes. Once his car was stopped by a group of them in the street of Llames. They were dressed as Falangists. Ethen he showed his papers as Consul of Cuba and proved he was not the previous consul Pena, a known Falangist, they saluted him and said - "Long live the people of Cuba". He says that although they behaved correctly he was rather afraid. He knows that a short time ago the guerilleros of Campocase had Might with the Civil Guard and killed several people, among them some well known Flamgists in the district. It appears that the Guerilleros are magnificently armed.

FUTURE PROSPECTS. - He believes firmly that Hitler will be defeated this year. No has great faith in the people of Spain and Prance, sto. Hasi-dominated Europe will arise, since this lafe cannot continues "even one winter more". He is confident that the U.S.S.R. will not be defeated; on the contrary the Soviet battlefronts will be the end of Hitlerism. He believes that England and the U.S., in opening a second front, will count on the help of peoples eppressed by the Masis, in France or in Spain, and things will move rapidly. The Spanish people are waiting for the invation of the Allies in order to take arms in the streets against their rulers. The Spaniards trust in the Allies and hope that the Second Front will not be long delayed. Soviet and English broadcasts archistened to; they follow the progress of the war. They hate the Germans and the Italians. These who before supported France are now his ensuries and partisans of the defeat of Hitler. The Spanish people hope to escape from this situation by the defeat of Hitler and trust in the Restoration of the Republic.

Cuba. -- 28.7.42.

REPORT No.355

ANCHI MARTINEZ, 26 years old, is a student from Bilbas. He is not a consistent Fascist or anti-Fascist either, as his opinions/Fither confused.

SPANISH ASSESSME TOWARDS THE HAR. - He says that no one speaks of the war because they take the view that Spain will not enter it. All the world thinks that Germany will lose the war because her enemies are very strong. He says that nothing is said about the second front. About the Hume Division he says that the people are against those who went to Russia, chiefly because they think them mad. He taked to a friend of his who came backfrom Russia, who was thoroughly glad to be back. He said that our entire war was child's play compared with this one and the way the Russians fight. He says that some faftists werein the Division through hunger, and some were Falangist adventurers, and in spite of its being said that all are volunteers it is obvious that many were forced into it. He says that in the Gibraltar demonstration, there were

N

only four Falangists, who do not know what war means".

In general he pretends to be slow and tries to get out of the questions with trifling answers. We think it is because he feels constrained by a Falancist who is with him. He declares that he is against Serrano Suner, but he says he is quite favourable to Franco because he promulgates laws which favour the people and is a partisan of neutrality besides. When we give him examples, especially that of the Blue Divison, to shes him what Franco's neutrality mounts to, he maintains that they are all volunteers. He says they are always speaking in favour both of Germany and the Allies, because Franco wishes to stand well with both sides. Es says that when the state of "non-belligerence" was established the people were content because before that they were afraid of being involved in the war. This fear, he says , is not so strong now. Then asked what he would do if he were in Spain and the Spanish people were involved in the war he answered - "Iwould go to the mountains or spend a bulles on the first officer who tried to force wes. He says that many Spaniards would do the same if Spain were forced into the war, because it would be so terribles

SUPPORT GIVEN BY THE FRANUIST REGIES TO HITLER. - He does not know the proporations of this assistance but he says that volunteers continue to leave for the front. In the same way he thinks that if the Ogrmans did not take provisions from Spain all the needs of the country would be supplied. With this idea he complains against the Ogrmans and against Serrano Sumer above all. Falangists in uniform are now only seen in parades.

WORKERS FOR GERMANY - He says that a few months ago they sent a great quantity of workers to Germany. They were almost all Galicians, and very few from Bilbac. A little later they were returned because "they were being deceived", "getting into difficulties". Ethen he was asked to be more precise he said that when they got to Germany they asked to be returned to Spain, and so they did with almost all of them.

<u>TERROR</u> — He says there are no persecutions or executions. Then the execution of Larranaga was mentioned he said that the people had no knowledge of these crimes. About the refugees he says that the people talk of their syturning to Spain when the war is over.

<u>FRICTICN</u> — On this point, without being questioned, he says that the Equetes and Falangists cannot meet, because when the two parties were amalgamated the Exquetes were pushed into the background, and that is the reason they prefer the monarchy. On this point he says that he has heard nothing about the restoration nor about the differences between certain leading factions in the armys

<u>RESISTANCE.</u> — At first he said that no one speaks about the war or any other problems because the people are afraid. But afterwards he said that people remember the Republic and how well they lived them. May does not report any example of resistance to the war. He says that the Mationalists have a lot of influence, but not so other parties, among them ours. Prieto has no influence d ther. In general it is obvious that he is ignorant of many things or does not dare to speak of them.

UNITY - All the anti-Fascists are united, but he gives no details.

<u>FUTURE PROSPECTS</u> — When the war ends with the victory of the Allies Franco will fall, and he thinks that the Republic will return. He thinks it will happen soon because the situation is unbearable, although "there is no need to think of Revolutions" He says that if the Germans invaded Spain the people would rise. As we said, he is studying for his bachelors degree. His matriculation costs, including the price of books, about 500 pts; before it used to cost 200. He says that studying has become very difficult. He says that all students halong to the S.3.U. although it is not obligatory, but they are coerced, and they join in order to be in a good position.

ON CONDITIONS OF LIVE - He explains that in the rationing they allow a K. of polatoes per person a weak, a quarter litre of live oil, 200 gr. of vegetables etc. He one can live on that except those who have a let of money; the rest ge hungry. The workers, who are paid the same salary as before, cannot afford to deal on the Elack Market and he says that there have been cases at Altos Hornos where workers have fallen dead from hunger at work. This causes discontent although it is not openly expressed. Now they have appointed wardens in the factories in Bilbae, and the workers receive larger rations. Here he is contradicting himself, because sometimes he says that these wardens ware demanded by the workers (which would be a demonstration of resistance) and sometimes he says that the directors asked for them. He says that in spite of everything he cannot understand why when food production is on the increase the workers are so badly fed. Later he says that they watch these closely and force them to work without ceasing. He relates (althoug) we know no details) that the middle class does not feel the pinch like the workers.

FORULAR ORGANISATIONS. - They exist just as they did before. He cites the Club Andauchu which organises excurations. These organisations are not controlled by the Falange. Young people are as gay as before, and dance and go to the mountains.

<u>ARMY</u> — He refers above all the discontent of the families because their sons have to spend four years in the army. He says that they demonstrate their discontent and that they all want to be demobilised. But this open discontent is confined, he says later, to private conversation.

REPORT No.356.

LUIS FRUMENT - a Maxican student, who has always lived in Oijon, Spain. He Tabily is confortably off and he is going to Maxico to join his father as he lived on what his father sent him in dollars and when this was forbidden he decided to leave Spain. He is an ardent Falangist. He is ignorant of all problems of the working and middle class. He only associated with people who were very well off, and especially with Falangist students. He is very cultured.

We says that he was in Oljon at the beginning of the war and remained there till now; as he was a Maxican he was molested by neither party.

HUNGER - He roundly asserts that there is no hunger, only a scarcity of certain articles. That with rationing "there is not enough for one mouthful" but that he never felt the want of food. That the olive all ration is 1/8 of a litre every 15 days, and so on for all other commodities. That the rationing of bread (black bread, since white can only be got on the Black Market) is arranged in three categories, and for that there are three classes of fards - poor, middleclass, and rich. That the ration of the poor is larger, as they have less money for buying on the Black Market. That at Belmonte, Asturias, the rations are double what they are in Oijon. That rationing is different in each province, and even in different places in the same province. He says that no one is interested in politics, that everyone's daily preoccupation is food. He save that "it used to make him laugh to see well-to-do old people who in all their conversations spoke of nothing but the price of beans and bread etc. " When he was asked for facts he says that it is obvious that the poor (by which he means the workers) who earn 10 or 12 pts. cannot buy anything contraband and live on their rations, which causes them to suffer somewhat from hunger and be very discontented. He says that the fix hunger is caused by the war and the blockade. because as soon as the Spanish war was over there was abundance of everything and free exchange, and as soon as the European war began there was scarcity and rationing. He also says at the same time that the cause of the scarcity is that the Government has bought thousands and thousands of tons of food in case the situation gets any worse. That this is good policy of the "Generalissino's" and that the Falange is doing a lot of propaganda, saying that it is much better to keep the food now, whan a lot is coming from Argentine and the U.S., than to eat it now and then if the situation gets worse, have nothing. That the people who are "good stuff" accept it, but most people protest and complain. He says that mother cause of hunger are the Provisions Committees, which, like those of Gijon, are composed of bandits who sell as contraband the articles they are supposed to divide among the population.

ENTRANCE INTO THE WAR --- He says that Spain will not enter the war, that this is the opinion of everybody. That all approve the foreign policy of the Government, which is very intelligent, as it knows how to maintain a balance in the situation and remain neutral. He says that the Spaniards are very favourable to Germany because they could have penetrated into Spain and taken Gibraltar, thus closing the Mediterranean to the English, but that it is "a German idea that one must be pleasant". After arguing a little with him I said that Germany might not have invaded Spain because she was not interested in dispersing her troops, considering that she needs them all for fighting against Russia. Later he confessed that all the Spaniards would fight against the Germans in case they invade Spain because the Spaniards are very fond of their independence, and would fight anyone who wished to enter Spain. The Spanish Government is a partisan of neutrality and the immense majority of the Falange think that Spain should send volunteers to Russia but "not enter the war"

- 14 -

PRIPARATIENTS FOR TH3 WAR, - He says that in Spain much petrol has been stored and that now tanks are under construction. He says that this too Fis that being kept for the britisms", and in case snyone tries to invade Spain the '39, '40 and '42 drafts are mobilised. The '41 draft has been sent home. The '42 draft was called up with a three months' delay. They spend two years in military service. There is also a pre-military service for Youth Ofganisations. This is not obligatory but it is sounted as time spent in the service and for that reason every one does it.

<u>INVANTON</u> — He says that there are no Cormans in Spain. He has seen none and so on. If there are any they are disguised as peasants. He is not certain that they are making fortifications in the north of Spain. IN for is in fact defended by two ships, one of them a "sulta-taces" and if there was an English invasion there "they would be the masters".

HEP TO THE MAXIS. - He says that it is not a fact there are more factories in the north of Spain which were not there before, and they do not work for the Germans. That the Germans say in their propagends that they mean to suspend armament manufacture, befause they have enough. That Germany is selling a quantity of war material to Turkey, which is a proof that they have no need of it, therefore armaments are not manufactured in Spain nor exported. But he takes the opposite view, that figsin receives material from Germany; there are frequent consignments, mostly tanks. What Spain does send, not, was some say because the Germans take it", but because the Gevernment gives it bery willingly, is food. Every day many loaded open cars leave Spain and the people talk of it and are dia contented, but those are only those who "think with their stomachs".

DESPATCH OF WORKERS. - He cannot be accurate about the quantity but many thousands have gone, all volunteers. He says it is quite natural for a man with no food or job to go there wherethey sat well and can send monsy home and because all the "poor" are like that. That is the reason they "go as volunteers and are glad to better their position".

DIVISION AZUL - 40,000 went, all volunteers, among them some guite well-known people and distinguished Falmgists. The number of volunteers was so great that they had to close the lists and there are many thousands still w siting for their turn to go when they send reinforcements. In April 5,000 who had been r relieved came home, that they were all very happy. He had many friends who had gone and others who were ready to leave Our informant asked then if they had had many losses but the legionaries said that this was a lie, they had had very few deaths. There had been many wounded, to the point that not one of them had not been-wounded-at-least-once. All those the come home have been wounded. They say that it is very cold but they stand it very well and are much congratulated by the Germans. They wear the German uniform and the red cap. They say they behaved servellously in Russia and gave the Russians a beaution. That the Russians are brave, that is why they attack them from behind, but that they do not know how to fight and do not have good efficers, although they have an abundance of material. They attack in mass formation and do not care about thear losses, so that very few reach the trenches." That men of the division always fought in a numerical superiority of ten to some and caused the Bussians many losses. They were congratuated by the Masis and often appeared in the German war communiques. That on occasions they established a salient on a river and resisted for more than ten days, that as they fought they sang and sing and that many Spaniards

Our informant thinks that they had been decorated with the iron cross. have more losses than they confess to (all toose he spoke with were Falangist students), and that in the casualty lists published only the names of the most important are given. In Spain everynne admires the courage of the Legionaries and praises them twice as such as the G_rmans do. He insists that they are all volunteers, and says in his own words - "a few idealists and the rest, the immense majority, because they were in a bad resition in Spain and could get not work or food. They went into the Div. Arul in order to earn a good living because they are paid at the German rate and a war bonus, plus an allowance and large indemnity in case of deaths. Besides, if they are brave they can desert, when they go on leave they have millions of pts. in their pockets and can "put on airs and pose as heroes in their uniforms and their iron crosses in Spain". He says that although the lists are closed, there are thousands who are ready to leave at a day's notice, and that he "knows several. " They said they celebrated Christmas very happily in February as they sent them tobacco and food from Spains

Es says that in Spain there is a lot of talk about the war, although no one bothers about politics at all now, and only gout food. There are all sorts of parties, partisans of the Allies and the Germans, and among his friends the people are mostly partisans of the Germans; he also thinks the majority of Spaniards are on the side of the Germans and among the 150 in his priversity hall only two were partisans of Democracy and they had fierce arguments in loud voices until the director case. The partisans of the Maxis maintained that anyons who wanted England to win was not a Spaniard because if the Democracies win Prieto will come back and all the Reds of the Republic, and there will be a government of Leftists and in this fashion they attack the defenders of England. The students say - we are very fond of Germany, because she helps us to be free of communism and is now defending us against it. " H says that this appeals to many people who also hate communism.

SECOND PRONT, - He says that no one believes it will be established. The Germans cannot invade England, nor can the English invade Europe. All Spaniards would unite to defend themselves from the English. Theywould do the same if the Germans invaded Spain.

ON THE MAR. - He said that the Spanish idea was that it would last five or six years and that when they were all exhausted there would be an armistice or negotiated peace. This is the opinion of the people on the Right and the Falangists; he does not know the views of the rest. France said in a speech -"If the Russians make a breach and arrive at Barlin, he will send two million men to fight communism". They do not attack the Republicans much, but blame the Russian agents and the Communists for all that is happening in Spain. He says that in Hendaye there are hundreds of aero lanes and many fields full of tanks. The Germans have war material on the frontier in fantastic quantities. He thinks that is in order to be in a position to assist either France or Spain if it ware necessary.

<u>FRICTION</u> — He says that there are no disagreements between the Requetes, Falangists or Catholics; they are all united, and if there were any friction there are no scenes or quarrels between the "Ceneralissino" would shoot them.

FRENTE DE LA JUYEBTUD, - He says that it was a failure, that at the beginning many people ware excited by the propaganda, then they got tired and practically the Youth Front does not exist.

RESISTANCE OF THE PEOPLE — There is none at all. In Spain there is a totalitarian Government favourable to the Germans. In totalitarian countries there are no protests or any resistance because anyone who resisted would be shot. There are discontented people but they are silent, they do not speak because they cannot. I have seen no inscription the walls of Gi Jon, the only thing there are a few robbers, the so-called Guerilleros, who rob, kill

and assassinate. Three months ago at the Puerto de Somiedo, they machinegunned a bus with travellers in it and the Civil Suard retreated. They are assisted by the discontented peasants and their families. If they came to Franco, with their hands free of blood, he would pardon them⁶.

<u>TERPOR</u> — At the beginning they shot many people, especially to pay off personal scores. Now it is done through the tribunals. It is a fact that shooting continues, but only for those condexned to death.

BUTURE PROSPECTS - Perhaps the end of the war will solve all these problems, The Governments of Spain will impuse peace, law and order as soon as the war is over.

<u>RESTORATION OF THE HUMARCHY</u> - All a lie; all respectable people support Franco and the disagreements there are between the parties do not constitute a problem.

DISACREEMENTS IN THE ARMY - He says there are none. Quelpo was sent out side Spain diplomatically, as a drunkard and a rescal, as all the army is with France and Hitler, who have saved Spain and Europe from Communism.

<u>RECONSTRUCTION</u> — He says there is a lot being done in the way of reconstruction. In Oijon they have built hundreds of new houses and the town is very much changed. The people who have money are afraid it will lose its value, daily, and either build or use the money for bubiness. 4.3.42.

JCSE FAGOS, a peasant, resident in Cuba for 11 years, returned to Spain in 1940. At that time he was a Franquist. He is very backward and extremely suspicious. At first he refus ed to speak, especially when he was told that he must talk to a journalist. He knows very little, since he lived in a small village in the district of Estraic and only laft it to embark. He often mys that he knows nothing, and can only give information about his village that is not political. Is a moderate anti-Falangist, and continues to defend Franco, of whom he has a high opinion, in many instances. The first thing he asserts is that in Spain there is not so much hunger as they say here. There is a scarcity caused by the war but it is just the same as it is everywhere, those with money eat and those without go hungry. It is not true that they requisition the peasants' crows, at least in the part of Spain he knows. He says that everyone says in Spain that they control the crops, and even if they force them to sell at the standard rate they leave the reasants enough to eat. It is obvious that everyone makes fun of the order and hides the produce mout it is not that they requisition them, but that the Government controls produce and they have to sell it at fixed rates." He says that he has a brother in the gray and the soldiers are very well fed. The fixed is well prepared but rather scarce. In Estrada they get the innest two regulation loaves just as before the war, but in Coruna tread is scarcer in the barracks. What everybody wants is for the war to end, anyhow, what is wanted is peace and tranquillity. When asked about the second front he says everyone is hoping for the English to come and give orders in his house but when the people are so anxious they want something to happen to change the situation and see if it improves . On further questioning he confesses that 90% of the population are against Franco - not on his own account but on account of the hunger and misery there is.

FUTURE PROSPECTS - He says that any regime will do as long as it is not this one. No blood to be spilt and "those in the wrong" to be pardoned. There are many people in the wrong who joined Franco, but have now repented. He says that those people fear the fall of Franco because there would be retribution, and many people would be killed, but if the Republic could come without bloodshed everyone would be delighted.

(He refers to the Requetes and in guantx general to the partisans of England who are very muserous). The entry of the U.S. into the war was not considered very important, because Garman propaganda, which is very widespread, save that the submarines sank all the ships which campe to Burope and that there was very little use in producing a quantity of war material if it never reaches Europe. He adds that the people realised that the Garmans were

exaggerating, since in the Russian Campaign they said that the Russians were defeated already and nevertheless months passed and the war went on. Our informant did not know the existence of the Anglo-Soviet and Soviet-American pacts, although he heard some agreement spoken of, but he never knew exactly what it was. There was a lot of talk about the second front, and it is thought it will be in Prance. When asked what, in the event of the English landing in Spsin, the attitude of the people would be, he says he thinks the Requetes would units with them. When I told him I thought they had sent a brother of mine to the Div. Asul. he made a face as if they had sent him to the devil. "I am sorry, because those who go to Russia in general do not return, and those who do come back are crippled for life". Не зауз that is the Div. Axul was joined by the unfortunates sho are, with their families, dying of hunger, and adventurers and robbers; some too because they were soldiers already and did not dare say no because they would have cut their throats if they had. He says that in the beginning a group of 40 left Santander and a few zonths ago ten came home, araless, legless or tubercular, the restdied of it. One of them, a captain, and tubercular, told some of his family and friends that all the Gyrman propaganda on the Russian war was an absolute lie. That the Russians never retreated until they were killed or received an order to retreat. That it is a lie to say that they have no leaders, and similarly that they have no material. He know better than snybody what the war in Russia had already cost the Germans.

- 18

During the winter they had lost millions of men and a great deal of material. It was terifying what went in there. He says that those who come back from Russia are forbidden to speak of what they see there and therefore it is impossible to get more details. However they tell their friends in confidence.

ASSISTANCE GIVEN BY THE FRANCO-FALANCIST REGIME TO HITLER. - The reinforcements they send to the Div. Asul grow less each time. No one wants to go because the stories of the survivors are gradually passed round. He adds that the Germans pay them very highly. They give them 5.000 pts. just for crossing the frontier. A few months ago a few left Santander to concentrate in San Sebastian. It is there that they train. While before, they made propaganda out of those who were going to Russia, and saw them off at the Station, now it is done secretly.

All foodstuffs are sent to Germany, that is why there is famine in Spain. "I wish you could see all the things they send. Imagine that one can! get olive oil, which used to be so abundant in Spains. They say that in Bilbao and in Reinosa (?) and other places the factories work for the Germans. According to him there are no Ogrman soldiers in Spain, only technicians. Germans in civilian clothes are particularly common. He added that the Ogreans spend millions on propaganda and there are many newspapers, reviews, pamphlets etc. which are distributed gratis. The people, as a result of so such propaganda, do not know what to think on some points. They say - "If what the German's say of Russia is true that country is doomed to disappear; there is nothing but savagery there . He says that some German propaganda postcards show Roosevelt and Churchill dressed as prostitutes, and Stalin in the middle embracing them. The people do not like this kind of propaganda. As for the German infiltration into the country, he limits imself to saying that they are the masters in Spain. He gives no data. He says that the Falange is very much weakened, that only timeservers and those who do business, thanks to the positions they occupy in it, are its supporters. Thereas, then it began, everybody wished to be Falancists, now no one takes any notice, and some people are careful to conceal the fact that they are Falangists. They say that the Requetes appear very upset. They were the ones who fought hardest in the war and new the Falangists are taking advantage of the victory. He says they do not give positions to the Bequetes, and when the Falanzists control the syndicates they do not give then work either. There is a great deal of discontent among the Requetes, and they have already begun to speak openly against the Falangists and those whom they blame for the present situation in Spain. They accuse them of being rebbers. Re says that they have printed broadsheets about the Falange, which they scatter on the streets and stick on walls at night. He adds that the syndicates have many members, because membership is colligatory, but if it were not so no one would belong. They obligs the young set to enter the "Frente Buju de la Jumentud", although many are already losing their fear, and do not join, or, if they make them members against their will, do not pay the duss. Referring to the despatch of workers to Germany, he says the numbers were high because they offered them a good salary and food as well, but he has the impression that they were deceived, like the members of the My. Asul. He does not know any more details.

FRICTION PETWEEN THE RULING CLASS IN SPAIN. - In the army there is a group h headed by Lague and Queipo, who are opposed to Spain enterin: the war, and the Germans and Italians controlling Spain. He says that in conjunction with the Requestes and other individuals in the army, they were preparing a coup against Franco, and principally against S. Suner, who is the worst hated of all, but it was found out and no one knows what hap Silve Yague, and Queipo. General Espinosa de los Monteros also had samething to do with it, but he does not know exactly what his part was. Referring to Yague, he says that he was dismissed from the Air Ministry when he made a speech in favour of releasing the prisoners. Queipo refused to allow the Italians to have any olive oil. The situation of the soldiers is very bad. They hardly sat at all, and are wery badly clothed. It is pitiful to see thes. They all wish to be demobilised as soon as possible. The '39 draft has been demobilised and he thinks the first reserve of the '40 draft as well. He thinks it is because they cannot keep them in barracks for want of food.

THE POPLE'S RESISTANCE TO THE WAR AND THE REGIES - According to our informant the state of mind of the people is one of extreme hostility towards the present state of affairs, although it is not obviously shown. The Reds are in hiding. He says that the only people who are openly fighting against the Falange and the Regime in power are the Requetes. That besides the pamphlets we have referred to above, there often appear on the walls, lampoons and posters against the Falange. He remembers one which said more or less -"Famine and Theft, that is the Falange". There appeared another very like it, but he does not know what it said because they rubbed it out at once. He says the Requetes also accused the Falangests of being cowardly assassing who are only useful for doing mass assassingtions ("dar Pascos").

The people take a sympathetic view of these actions of the Requetes. In the queues people interactions speak against the Government and the Falange. There are many prisoners. When the "nationalists" first entered Santander they killed people in thousands. The Falangists held many "passes". They went on killing, only less than at first. The prisoners died of their harsh treatment, many were tubercular. He does not incw if they give them organised assistance. Probably relations and friends. He does not now of any activity of the party, or the J.S.U. The Reds are very carefully watched. The only ones who do anything are the Requetes. In general our informant does not know any of our organisations because he was very young when the war began. The only thing he says is "the Falangists are like those they used to call the F.A.I. They go to a house, steal, take a man, take him and shoot him, and then it is finished". We could not get my information about the Union Nacional, although he gives the impression that he does not know anything about it.

He has no ideas in the futurg prospects. He thinks that this depends on England; there is talk that the Requetes wish to set up a King who is not a Bourbon. He does not now anything/the restoration of Don Juan. The Falangists are enemies of the Monarchy and the people do not worry much about this problem. Referring to the attack on S. Suner; Espinosa de los Monteros, Ambassador in Berlin, had on one of his visits to Madrid, a violent Quarrel with Suner and in consequence resigned. He reports that then he was aprointed Captain General of the Sixth Region, Burgos, and on taking over the post he made a speech in which he attacks the Falange. He reports that as a consequence be was violently dismissed. A few days later a sone of the general who is a lieutenant in the army, shot at S. Suner several times, he thinks in Madrid. Arrese was wounded in consequence. The press said nothing about it. They published a notice that the Secretary of the Party was undergoing an abdominal operation.

The Italian submarine which entered Santander was danaged in the Caribbean. A few miles from Santander, and in full visw of everybody, it was attacked very near the coast by two English aeroplanes which all but sank it. He says it entered harbour; listing over on one side. The English aeroplanes were not able to finish the sinking because German pursuit planes forced them to retire. Then asked where the (German) planes came from he said Irun. (He gives

the impression that he does not know really where their base was).

REPORT 371

A young Basque 24 or 25 years old. By profession a metal-worker. Up to the beginning of the war he was working with an uncle in Zaragoza. He remained in the battle some throughout the whole war and was mobilised in Franco's army. Is a Basque nationalist, like almost all his family. Although a workman by profession he always worked with his relations, almost always as foreman, or at least as manager. He has no political point of view nor are his class feelings very developed. He has never belonged to any syndicate. After the war was over he worked in Bilbas in a wire factory where there were about a thousand workmen. He finally left work in order to devote himself to the Elack Market because, acording to him, it was impossible to live on what he was graid; at the factory. He lived in Nationalist circles, they were the only ones with which he was con ected. For this reason his report is rather incomplete, and in some cases lacks objectivity. He is rather reserved.

ATTITUDE OF THE SPANIARDS TOWARDS THE ANTI-HITLER WAR. — In the graphic words of the informant, 30% of Spaniards are partisans of England. The workers, peasants, petit-bourgeois, capitalists, and some of the clergy, (later he told us the majority of the Basque cures) are on the side of England, although in a passive way, and against Germany and the Falange.

The general opimion which is expressed in conversations between groups of friends, and lately also in the street, is that the defeat of Germany is inevitable, due, according to our informant, to the fact that the Allies have more economic resources and more primary materials. It is thought that the United States will be a very important factor in theredisation of victory. Also the defeats suffered by Germany on the Eastern front contribute to stressing this opinion.

In Spain everyone is tired of the war, and no one wishes Spain to take part in it. There people are in a real panic on this score. Our informant thinks that if France should decide to fight, in view of the terrorist nature of the Regime, the people would have to obey. Later in another conversation he said that there were people who, in that case, would hide in the mountains.

The defeats suffered by Germany on the Eastern front were well known there and contributed to increase the people's confidence. He says that they said there that, in spite of their resistance, it was obvious that the Russians ware not sufficiently prepared to face a power like Germany.

The entry of the United States into the war was received with joy by the people who interpreted it as an event destined to shorten the war, of which they are all very tired over there.

The Ratification of the Anglo-Russian Pact and the American-Russian agreement is known there, although the range and content of the pact and the agreement were not known. He says that the Falangist press; only said that these nations had promised not to make a separate peace.

He does not know the agreement about the second front, although this subject is very often spoken of, with the idea that it would be the final blow to Germany. Over there they think that the opening of the Second Front will result in the rising of the French people, perhaps the Spanish people too. With the idea in mind the people often discuss possible landing places. It is thought that the will-take-place-in-France, although some say it might also happen in Spaine The opening of the second front would be received with joy by all.

The attitude of the people to the "Division Asul" is frankly hostile. It has no sympathy from the people, even from the very moment the recruiting was begun. He says that in the beginning a few volunteers gave their names, mainly Falangists who w.shed to earn merit in order to improve their position in Spaine Others went because their position in Spain was desperate and they thought it might improve if they left it. Some, who went in the army, found themselves in the position of not being able to refuse, because if they had they would have got into trouble. But they all went in the belief that they would see the war from a distance, and that they were really being sent as a symbolic deputation for the Moscow parade. He says the press made propaganda, asserting that the Boanish soldier could fight in all climates, as they had shown at Terreel. He says that when the names of the first casualties arrived, the people were flad and said that will teach them to interfore in what does not concern them³. The survivors came back disillusioned. They repeat of having gone. The majority of them come back ill or crippled. He adds that the war in Russia is worse than the Press reports.it; the Spanish war was child's play compared with it. The Falangists are more reserved and make no public criticisms like the others but among their friends they also say that it was terrible. They went into action in fact just before the Russian conter-offensive began, and received the full brunt. They had many losses through bullets and the cold. Some of those who came back crippled have German iron crosses for which they get a pension, our informant does not know the am unt, from the German government.

S/1612

SUPPORT OIVEN BY THE FRANCUIST RECENT AND THE FALANCE TO HITLER. - Our informant does not know in whatquantity they send reinforcements to the Blue Mivision. He thinks that there is some exageration on this point on the part of the Falancist Press which tries in this way to encourage enthusiasm among the young men. He knows that the place they report to and train is San Sebastian, and that from there they leave for the front. He thinks that they are still sending people, but they are only Preliefs⁶ for those who come home. He adds that those who go to the Division ASul today, with very few exceptions, do it against their will. They get the majority of those who go from the barracks. He says that many workmen went to Germany on account of the lack of food and work. He does not know hom many but he thinks a fair quantity. He says that the people take these things calmly generally, because they cannot do anythg against them. He only heard that in Ipun there had been some scene with the Blue Division or with the workers who were going to Germany but he gives not actual details, saying that it is dangerous to try and know too much.

In Spain the flost fervent supporters of the Naxis are - Suner, Munos Jrande, Moscardo and other generals, and especially the "idealist" Falancists, or those who committed injustices or profiteered and are afraid of "the tables being turned".

He says that the Falange is only the shadow of what it was during the war. That at the beginning many people joined it for safety's sake, but now it is dead thing that no one takes any notice of. The same happened with the "Flechas", "Frente de la Juventud" etc. The syndicates have many members, because mambership is obligatory in order to get work. The workers would not join them if they could help it. He says that all the directors are Falangist bureaucrats who take a wantage of their position to steal all they can. He cites as an example the fact that employers are obliged to pay sometring as a contribution to the subsidy allocated to workmen with large families, but he says that the Falangists do not pay it to anybody, but spend it themselves. For these and other smaller reasons there is a lot of discontent among the employers,

Our informant says that they are still sending large quantities of food to Germany, also iron and other materials. The people know that if there is familie in Spain it is because the Germans and the "Black Marketeers"

Asked about the production of the metal factories in Bilbao, he says that they are working at pressure, but he does not know if it is war material. He knows that pig-iron is being sent to France, he imagines it is intended for Germany. Iron ore is also sent to France by sea.

FRICTION ANONG THE RULING CLASSES. - He knows that in the army there is a surge of feeling against the Falange, but he says that it has no outside representations. The only incident known there was the case of Yague and Queipo de Llanc. In general there is a great feeling against the Falange among the soldiers. The consequence is that they make life impossible for Falangists in the army.

He says that the majority of the Basque Priests are enemies of Garmany; of the Falange and of Franco. They are very indignant about the executions of nationalist priests carried out by France. Even today there are many of them in prisons. He says that the priests devote voluntary masses to praying that Spain may not enter the war.

He says that other members of the clergy, although they are opposed to the Gathelic persocutions in Germany and Poland, support Franco because they balieve that only with his help can they preserve their positions.

He adds that the richest and most influential people there do not wish to hold official posts because they feel that there will be a change in Spain and they do not wish to have the responsibility of the crimes committed by others. Official posts are occupied by a series of bandits. Ratred for the Falange is general in the majority of social classes. He says that even those who belonged to the Falange before, young students, employees or just rich people, do not wish to have anything to do with it now, and say that the Falange is going to the dogs.

Be adds that in general everybody hopes that the triumph of England will cause a change of government in Spain and so they confine themselves to waiting although there is talk of a possible coup distat by the soldiers,

RESISTANCE OF THE PROLE AGAINST ENTERING THE WAR AND AGAINST THE FRANCUIST RESILE - The people wish to see the situation change as soon as possible, but they believe that the solution must come from outside. According to our informant, there is no thought of fighting against dea regime. We mays that the workers in the factory in which he worked spoke openly against the regime but he does not know that there was any activity. (Given the character of the informant we may sup ose that even if there was he would take pains to ignore it). From time to time the women ficted in the queues; at first they shut them up, now they say nothing. He asserts that every day the people speak more openly against the regime. The contribution to "Auxilio Social" was obligatory before but now no one pays. When the young ladies of "Auxilio Social" beg for subscriptions in the streets and ask the reason for refusal, some people answer -"because I do not wish to".

He says that when Franco was at Bilbas the people remained in their houses and he was received only by four "chats bottes" in the offices of the Falange, At the end of Franco's grach not a soul applauded. Then some Falangist young ladies said, half in tears, "what we must do is buy a machine gun and shoot them all".

Assistance to the prisoners, according to our informant is given by relations and friends. There is no organized assistance, but he proceeds to tell us that cartainly there have been collections sometimes in the factory infavour of the prisoners, but "by groups of friends". He does not know of the activity of any organization, as such. The nationaliste, according to him (he is a nationalist) are the ones who have some organization.

• They distributed there a speech made by Aguirre in America. One of the Prieto's was also in circulation. He has no news of the other organisations although he admits that if they have any organisation they would not go and tell him about it.

When he is asked about the activity of the different organisations of which the Frente Popular is composed, and the attitude of the militant party members of these organisations, he asserts categorically that there the people are completely united, and there is now no talk of socialists, anarchists, communists, republicans etc. All treat each other as commades, and help each other as far as they can. In Spain, according to our informant, there are only now ensmises of Franco and the Falange, who maintain a strict unity among themselves; thay discuss the progress of the war together, comment on the situation etc. He says that the people wish for unity, repret the dismion there was before in Spain and the quarrels between different parties and anti-fascist organisations.

He did not know of the shooting of Larra or Disgues. The execution of Larra impressed him very much and he said that in order to do what Larra had done one would need plenty of guts.

<u>PUTURE PROSPECTS</u> — He repeats again that they believe in Spain that the triumph of England will cause a change in the situation. (He must point out that for some time there have been currents in the Basque nationalism which have been seeking for a "solution" of their national problem with the assistance of England, transforming the "Pais Basque" into an English protectorate or Dominion or something like that, and even during the Spanish war there were individuals who thought that at the critical moment the Basques would receive help from the English)

Our informant told us at the beginning that there people spoke only in favour of England, but after considerable circumlocution he confessed that the workers also sympathised very much with the Soviet Union, although conversations in this direction were much more restrained. He added that the people were quite well informed about the course of events as they listen daily to the bulleting of Radio London, and some also listen to those of Radio Mescow.

The people in general are in favour of a solution on the basis of the Republic. Others are afraid that the fall of France will result in a revolution morse than the other and for this reason they are more hesitant. Those individuals are specially the rich. If they believed that the Republic would be established without bloodshed they would be in complete agreement with it.

というなどになっていたのである。

In Spain they balieve that Hitler may be defeated in 1942, especially if the Second Front is started. They also say that Russia is bearing the brunt of the fight.

Speculation about a monarchist restoration has no ither delighted cr depressed the people. The possibility does not arouse much interest.

The people, who, according to our informant, have most prestige in Enskadi (Basque national territory) are Aguirre and Prieto, especially the Sormer.

As regards conditions of material life he assures us that they are terrible and that is the fundamental reason why all the people have turned against France. There is much talk of who home without bread or a roofs, but that does not improve the situation.

All business is controlled by the "Elack Marketeers" of the Palange who, sheltered behind the Committees of Supply, requisition the crops from the peasants at the standard rate, and instead of selling them to the people at the standard rate they reduce rationing to almost nothing in order to compal the people to buy articles on the Black Market, at a price which will give them the profits. He says that these who have?"Boney to buy things contraband (and they are the majority since salaries have hardly been increased at all in comparison with pre-war standards) die of hinger. He gives prices which correspond with those for other regions of Spain".
