Anusch for Achievement, Service, or Performance: State character of service during period for which recommended. (One complete description of adminintroduce, tecimical, or professional duries and responsibilities of net covered in Section C. Infinite dates of assignment and reboals. What did the Individual de that marins the award? Why was this outstanding when compared to others of like grade and experience. In timber periods or exception of statement of appropriates, include production records and assistance rendered by other periods or away. What obstactes were encounted or exceptions functions rewith of actionsment, service, or performance. Include reference to Flance Reports, Letters of Commandation at other decompatibility on the which supports the recommendation. Becker enclosified chartes.

Mr. (Charles E. Flick,) who plans to retire 30 June (1973,) has been assigned to Mexico City Station for the past thirteen years as an operations officer under nonofficial cover. During this entire period his primary responsibility has been the supervision and technical maintenance of afjoint telephone intercept center. Although Mr93Flick has performed his personnel supervision and operational financial responsibilities in a thoroughly capable manner, his outstanding contribution to the success of this joind telephone intercept operation has been in the area of technical maintenance of the equipment used at the intercept center. The equipment (which finally is being replaced in July (1973) for which Mr. (Flick was responsible has been used continuously for over (ten rears. Yet during the entire tenure of Mr? Flick) at Mexico City Station there has never been a period when the intercept operation had to be suspended because of equipment malfunction or outage. In the narrative of a fitness report dated 7 December 1971) Mr. (Flick's supervisor stated--"the equipment, which he maintains is for the most part at least ten years old and requires constant maintenance and the use of improvised parts. Subject has used his ingenuity and scuse of responsibility to improvise and keep the operation going. There has yet to be, to our knowledge, a moment when operations have been suspended due to his d_{α} inability to keep the equipment going." In another fitness report of January (1971) the rating officer stated that -- "In his day-to-day performance Subject continues to save us a great deal of money not only by being economical in the way he purchases and uses supplies but additionally by keeping equipment in operation which is not used

Section D Narrative Description Continued.....

any longer in the Agency operations. Visiting technicians are always amazed to find the equipment in use and functioning substantially as it was on the day it was installed." The reviewing official for the same fitness report commented that---"The Station needs him, cannot do without him and cannot find any fault in his performance."

In addition to the comments in various fitness reports as noted above, the DCOS, Mexico City Station, submitted the following summary re MrSFlick's performance of duties in support of his recommendation for an award for Mr. (Flick)

(Flick's performance has been consistently evaluated at strong to outstanding level. Ills many rating officers over the years have each reached the conclusion that it would be all but impossible to find a replacement that would be able to deal with all aspects of his job as well as (Flick) some concluded that Flick , was irreplaceable? 3(Flick) has successfully maintained a highlevel rapport and an excellent working relationship with the (COM > 4officials) concerned with the intercept center's operation for ≥4 (thirteen)years - a unique achievement in itself - despite circumstances that would not have been tolerated by others of lesser ability and dedication. Through personal initiative and perseverance Flick has enabled the Agency to accrue substantial savings of funds by maintaining obsolete equipment in excellent operating condition. Because of Flick's exceptional capabilities. and efforts, the center achieved an outstanding record of on-line time and production despite the age and condition of the equipment and facilities available. By consistent application of diligent and unselfish professional efforts; (Flick) turned a relatively routine technical assignment into a highly productive/joint) 24 operation of sustained operational and intelligence production value to the Station and to the Agency."

In summary, Mr. (Flick) has performed his duties at the telephone intercept center in Mexico City for the (past thirteen) ≥ 4 years in a truly dedicated, professional, and outstanding manner. This outstanding performance of duty over such an extended period of time is a credit to Mr. Flick and certainly worthy of the award recommended herein as he retires from the Agency.
