## THE PRESIDENT'S INTELLIGENCE CHECKLIST

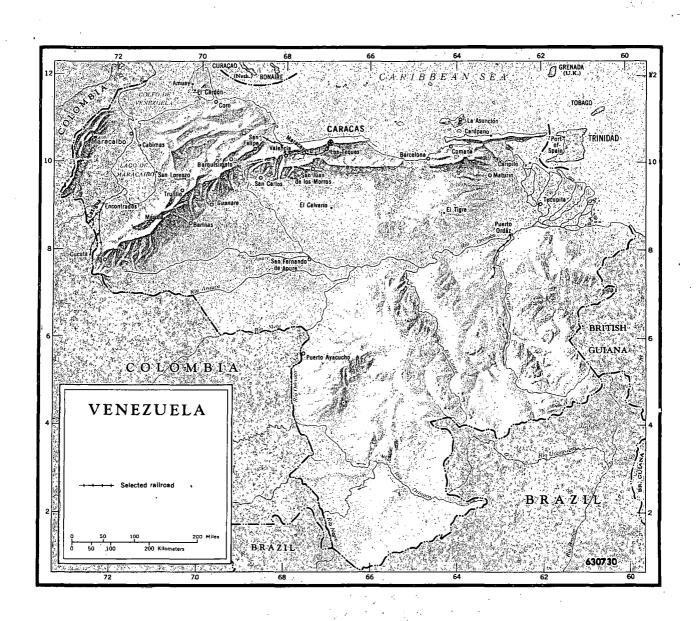

ISSUED BY THE

CENTRAL INTELLIGENCE AGENCY

23 NOVEMBER 1963 TOP SECRET

#### 1. South Vietnam

- a. Vietnamese Communist efforts to discredit the new Saigon regime stayed in high gear this week.
- b. The number of armed attacks was off from the high of the previous week but still some 50% above the year's weekly average.
- c. These attacks have been, for the most part, small-scale efforts directed against the government's paramilitary forces in the villages. They have been designed more for their psychological impact than for immediate military gain.
- d. A high volume of messages on Viet Cong military and political communications nets indicates a probable continuation of this effort.
- e. The new government is responding by stepping up its own military operations. It is also setting about the hard job of revamping the Diem government apparatus and harnessing broader popular support for the war effort.
- f. The generals have been dealing fairly effectively with

their new responsibilities. There are, however, a few signs of dissension within this group and between it and civilian politicians.

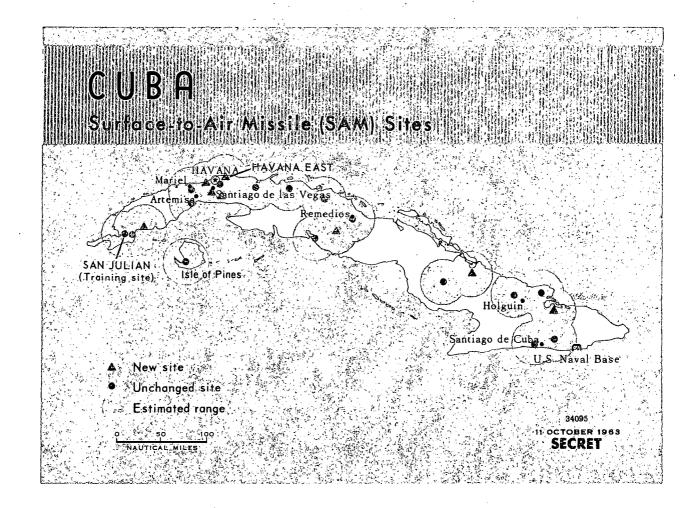

- g. One of the more ambitious and troublesome figures is the able but opportunistic General Ton That Dinh, the new Minister of Security. He has been travelling about the country spreading the idea that the coup was largely his doing and seems bent on developing his own independent base of power. He is a man to watch.
- h. The new regime has also embarked on a purge of high military officers who sided with Diem during the Buddhist crisis and failed to get on the right side soon enough. (INTERCEPTS)
- 2. Venezuela
- a. The death toll from the terrorist outburst in Caracas last Tuesday and Wednesday now stands at about 30.
- b. This is the high water mark thus far in the campaign of the Castro-supported Communist extremists to disrupt the national elections a week from tomorrow.

(Cont'd)

For The President Only - Top Secret

c. The Betancourt government
has struck back hard. Its new unified command over the security forces,
passed this
initial test with flying colors.

- d. At least 500 extremists were arrested and the round-up is still going on. Their removal will hamper the Communist drive against elections in major cities like Caracas.
- e. We now expect the elections to be held on schedule, a considerable achievement under the circumstances. The elections will be followed, however, by a Communist effort to prevent the March inauguration of the victor.
- f. The rub here is that none of the presidential candidates commands President Betancourt's considerable assets for dealing successfully with the harsh realities of Venezuelan politics. The constitution prevents Betancourt from succeeding himself.
- g. In the background, as always, looms the military, which could intervene if the president-elect shows signs of being soft on communism.

#### 3. USSR-Cuba

a. In the past week Cuban military

that Cuban interpreters are now posted at several surface-to-air missile (SAM) sites on the island.

- b. We think this means that on-site training of Cubans has begun on schedule. Field training is to last six months, after which the SAM system may be turned over to Castro.
- c. In the past month some 1,500 Soviets arrived in Cuba. Most of these were probably SAM experts, sent to monitor the training.
- d. Prior to their coming, we had detected no more than a few hundred Soviet military personnel entering Cuba since the October crisis last year.
- e. We estimate that at least 15,000, and probably closer to 18,000, have been withdrawn in the intervening 13 months, leaving, very roughly, 4,000 to 7,000. Those remaining are for the most part advisors whose main functions are to train and supervise Cubans in the use of weapons turned over to them.

- f. All Soviet weapons introduced into Cuba last year have been withdrawn or turned over to the Cubans. The only significant exception is the SAM system. (Includes INTERCEPTS)
- 4. Berlin
- a. We have had an indication that Soviet harassment of Allied access routes to West Berlin will shift this weekend to the air corridors.
- b. The Soviet man at the Berlin air traffic control center told the Allied representatives yesterday that Soviet transports would be using the air corridors for brief flights during the next five weekends.
- c. Moscow has tried on a number of past occasions to assert its right to restrict Allied use of the air corridors. In early 1962, the Soviets attempted to reserve "blocks" of air space for their own use. They have since demanded that Western flights stay between stipulated altitudes, that we file flight plans in advance and provide prior notice of border-crossing times.

- d. This sort of harassment stopped in the spring of 1962 when Soviet leaders became convinced that the US was interested in a serious discussion of a Berlin settlement. Moscow may hope that the threat of more of this sort of harassment will jog the US into talks on Berlin.
- 5. Iraq-Syria-UAR
- a. It now appears that President Arif's role in last Monday's coup in Baghdad may have been virtually that of a bystander.
- b. According to our latest information, Arif was wakened early that morning and given five minutes to join up. Tahir Yahya, now prime minister, was reportedly the organizer.
- c. Whatever Arif's role may have been, the coup was primarily an effort by the Iraqi Army to curtail the activities of the extreme wing of the Baath Party. The Baath is an Arab nationalist political organization, active throughout the Arab world, which has been ruling Iraq and Syria.

- d. The coup group has not thrown all Baathists out of the government; there are party members in the new cabinet.
- e. Syrian Baathists have welcomed this retention of their Iraqi brothers. Their attitude springs from the recognition that the Baath in Syria cannot stay afloat without support from Iraq. Even so, we hear talk of coup plotting in Damascus.
- f. The reaction of Nasir's
  Egypt, which passionately desires
  to see the Baath go under, has been
  exactly the opposite. Cairo has been
  backing off its all-out support for
  the coup ever since the new cabinet
  was announced.
  (Includes INTERCEPTS)

# SOVIET EXTENDED RANGE IMPACT AREAS APPROX. 4900 NM APPROX. 6500 NM NORTHERN IMPACT AREA TOP SECRET DINAR

#### NOTES

- A. USSR New activity involving Soviet range instrumentation ships in the Pacific appears to be forthcoming. Three instrumentation ships left Petropavlovsk 12 days ago and are apparently headed for the more distant Pacific impact area, 6,500 miles from Tyuratam. We are looking for extended range ICBM tests but we do not exclude a space event. There has so far been no announcement closing the area. (INTERCEPTS)
- B. Congo-USSR Soviet embassy personnel have not yet left Leopoldville, but their departure is expected momentarily. They were ordered out of the country after the Congolese turned up good documentary evidence of their complicity in anti-government plots. One of the items taken off a Soviet diplomat the other day was a letter from an anti-Adoula leader now in Brazzaville asking for funds and arms to overthrow the Leopoldville government.
- C. Britain The Labor Party scored again in the Dundee West by-election Thursday, increasing its 1959 majority of 719 to a thumping 4,955. Heartened by this, Labor is now pushing for general elections at once. Prime Minister Home is not likely to accede.
- D. Ecuador The military junta which has run Ecuador since July may be about to come unstuck. We have a report that one of the less savory members of the group, air force Colonel Freiles, will try to take over full control this weekend. We are not sure of the reliability of this report, but Freiles is known to have been making motions in this direction.

F. USSR Cosmos 22, launched a week ago, was recovered yesterday. It is the eleventh unmanned satellite to be recovered. All recoverable satellites have been launched from Tyuratam, the main Soviet missile test center, and recovered after three to ten days aloft. A series of non-recoverable satellites has been fired from Kapustin Yar. (See Chart) (INTERCEPTS)
