BUILT: Treliminary Debriefing f Anita THURIA LT

Tuke: 13 May 1950, 2030-2130.

- 1. Frior to my departure for New York to handle the preliminary debrtefing of THERIATIA, I discussed the following subjects with CNEA-5:
 - 1) In view of the fact that THEMIAULT's expenses on her recent trip to India have been greater than was anticipated, 11,000 additional funds have or are to be shortly deposited to her bank. This will be done by sterile check. It is to be accounted for under the terms of the original contract.
 - 2) CNEA-5 suggested that I take her reports up with me for possible annotation and expansion. Doon examination on 14 May, this appears unfeasible in view of the fact that there are CIA compound indicators and RI symbols attached directly to the reports.
 - 3) CNEA-5 surjected that I pursue with THERTAULT the possibility of developing an interest in Krishna Menon, utilizing a cleared publisher who could request Menon to write a book. This a preach to be based on Menon's acute susceptability to flattery.
 - 4) CNEA-5 suggested that TIERLAULT be asked to review the areas of her influence in order to lay the groundwork for an official invitation to visit this country being extended to the trime Minister in the future. He suggested Sen. George and Chester Bowles as possible points of departure.
 - 5) THERIAULT is to be informed that her reports have been of inneasurable assistance to the Ambassador and to the U.S. Government vis-a-vis policy planning for India.
 - 6) THEFIACIT is to be asked to come to Washington for a day or so in the very near future for further debriefing. This is to be arranged at her convenience.
 - 7) In view of the fact that THERIAULT has been unwitting of the Agency's role in sponsoring her trip, I suggested that I now make her witting in terms of the security involved. It seemed advisable to me since it is likely that there will be future contacts with THERIAULT. CNEA-5 agreed to this.
 - 8) THERIAULT is to be advised that she is at liberty to discuss any and all aspects of her trip with anybody with the exception of the Agency's role in sponsoring it.

SECRET

ENTUBE CARD REPRODUSTIONS

- o) In view of the vast amount of work that must be done, I suggested that I plan to spend two days 16 and 17 May if it becomes necessary. On previous trips to discuss I ENIATET's mission with her, I found that she frequently had other commitments which made it difficult to cover sdequently the material which I had amassed. If this is the case on this trip, I should prefer not to press her. One day's latitude seems the better part of wisdom. CMEA-5 agreed. We shall see, however.
- 10) In the event that it becomes necessary to reach me, surgest that my wife be asked to get in touch with me, (JAckson 7-7018)) and that I be asked simply to call my office. I will then call on the sterile phone. For the record, my telephone number in New York is TELEAM 8-2530)

03

joneral Cornents.

I have no talked with many Ford Foundation seople and same To people. Al incressed by their quality. They ere working hard and are doing it in a colf-effecting manner. I have not heard one criticism of them from anybody. There are a few duing of cour i have not yet met them. They are here to help India carry cut her projects and her ideas as one put it. And they seem to do do not only denocrationally but with a very real warmth and eyapathy - yet they stay quietly in the background and take none of the credit. But I feel nore trougly each week I am here that the work is solid and is having becausely good effect in relieving tension and hostility between the two countries. The results of the notual work are apparent now and hope has recently

increased among Indiana; also their am self-confidence. When

From all I have picked up, the feeling is widespread that ambresador allen did a good job out here. As one put it, the was exactly right for the period he was here; just as Boules was right for the special personal problems of his two years. Both Indian and Americans highly raise both men.

confidence incremes, sensitiveness decreases, of course.

- We have a prize in Evelyn Hersey and somebody should thank Cod every night that she is here. She and Dro and Hron Black are Evelyn Hereey is known throughout India. She was Social Welfare attrohe at the Tabresy beginning I think in 1943. The only cas attached to any embrasy anywhere, I understand. Her work was to interpret the social changes taking place in india; to become aware of the needs and problems and how these needs and problems were being set; and to offer her services and her experience whenever or wherever it was asked for. When the administration changed, she was dismissed by Republican on the grounds that this was a new idea; mobody else had ever done such a thing, that is no other foreign service and so why should the U.S. A. At Hr. the negio of Tel- She is, however, doing the same job. Eer influence is very wide; she is admired and loved by liverally thousands of Indians from the high echologis down to the ewespers and ther harijans. the is called on for saviou is mineral fields and by very high officials. She works behind the scenes and feels that her work would be ruined were she given credit for what she has actually done. She is vavid and full of lafe and one would hardly all her self effecing; and yet her work is done almost anonymously. I have been around her emough to ace how wide her circle of Indian friends is; and how completely and continuously they stream through her house. She goes all ove India. Has travelled much more than 100 thoughed miles. She say in reocat wonths she hat felt absolutely no antagonica toward her re on American. She is chrewd, has shorp eyes and cares is knowledge blo politically; is nobody's fool; is strongly enti-communist; is werehearted and intellectually flexible. One of the best sinds I have run into since coming out.
- I wish we had five times the people in TGH. They corefully would politice. I think it is wise. They are doing a

General lomments. (continued.)

6. A very good project has recently been launched. It is called The Delhi fraining and Orientation Control for Poreign Technicisms in India. This is the second time it has been held, I think. It begins today, Jan. 24. Continues for two weeks. (The first one worked out a fine short bibliography on India; and a little brockure on "Foods evailable in North India.) This second course covers the Indian village, with visits out to villages; Indian art, prohitecture, dance; Indian history; religion; Islam in India; other religions and philosophies; Indian family life and customs; Health problems and resources; educational problems; urban problems; rural unemployment and sid; the role of foreign aid in India; discussion of the Five Year Plan.

It is the kind of briefing that every foreigner coming to Indie, should have. It is open to all of them, we were invited simply as gueste and shall attend many of the meetings. Films are shown; trips to art galleries and museums, etc. Miss Hersey has had much to do with this; slso Dr. Douglas Esminger. And probably others, too. Indians will do most of the briefing.

studying it. Shall have a number of interviews with the planners, or with a few of them. Shall also go cut on several of the projects. This seems important to me for social changes and how they are made breed politics. The political picture can certainly not be understood if the cultural and social pictures are not studied and analyzed carefully.

We are enclosing a few excorpts of speeches made by Mr. Nehru, Mr. Menon, and Mr. Dhaber this past week at the Congress Party big gathering.

4

end Ends of Information:

Hy Pick told me that the Communists are organising the dozestic corkers of New Delhi . Lest week there was a monting of agains at Emila Oato called together for this pur one. The week before the bearers (or the success) were called together. The Communists are going about it in a obresd way; making very reasonable demands, such as a half day off each week, a rise of perhaps 4 or 5 rupees a south in wages. A Comminist in every home will really be conothings

He trys there is little ectivity of Congress party or Socialist party among later groups. The work is being done by Gonzunists. They, somehow, have the money to do the organisational work while there is little money among regular corkers due to weakness of industry, small member and low wages of the corkers, & He is troubled over lack of activity emong the democratic groups in labor circles. Says he has been here only 3 months and emmot us yet see the picture clearly.

- The State Dept. s coldness about permitting functies to visit ٤. the -iraca in Ghina gave the U.S. a very bad press out here. It was very clover strategy on the part of China; it was bed strategy on our part to appear callous to the feelings of the faullies. Family affection rums deep out here. It is enother one of our many small blunders which somehow loom so large when viewed by the hundreds of alllions out here. If, comehow, everybody could count up to ten before openking, and think not ales to sern orige edt wed but the entire area of ania vill react. Those families could have been told quietly and personally that if they wanted to go they would not be protested by an American paneport; they could even have been accretly urged not to go; but the blatant press release. . . Forgive sy editorialising, I am sure I am not supposed to so it; too can in very close here to the mind and heart of asia and commot help boing reare of these reactions of the people. Anyone the loves the U. S. connot help but wish that men our epolicemen would epock core coftly and more thetfully. A braggert or bully to disliked by all busen beings. To have strength is fine, to brandish that etronith offends.
- 8. The Times of India (Jan. 28) has excellent editorial on the con coefaliatic society good so outlined by Hebra and Congress Party leaders. Boos avadi mark a revolutionary shift in Googress policy . . . All that it woomt was an acknowledgment of the impressingly important role of the public sector in the national economy - a role that was already defined with greater precision in the industrial policy resolution. There was nothing to indicate that there would be any new energed and the aphere reserved to private enterprise, and the fears expressed outside the Gorgeon on that acore were, therefore, unjustified. Beither vas there ery justification for the apprehension that the new objective motioned really was not the label that was given the rest creed and the extent to which in actual practice it would help in the production of greater realth and in its mre equitable distribution. . . What was dignificant . . . was that it abould

have been concelled at this steps to seek a more popular label for its commission and social policies.... If this commission to to be sore than a design to steel the opponents' electoral thunder, the Congress Covernments at the Centre and in he States have lanediately to set about the task of translating the new principles into policies. . . . The only way to make the policy of Congress Covernments scoord with Congress principles is self criticism and yet there was vere responsible Congression at Avadi who sew danger even in the condennation of nalpractices by Congressess. . . The road to full employment -- for which the Congress has for the first ting, laid down , time-limit - - is by no means easy. It demands a complete renovetion of life in the countryside on the one boad and apacay industrialisation making the country as salfsufficient as possible on the other. (etc.) Digest of Beshaukhis apasah on Inn. 20th.

He spoke of the unsuitability of totalitarianism in the democratic Republic of India and the ingdoquacy of capitalism, stating that there was left only a Socialistic approach open to the country.

He states that the acceptance of the Socialistic society as ideal meant the nationalisation of institutions that could be impediately nationalised with advantage. The presumation is so deing, daid Hr. Reshauskh, was that Socialised production would be more profitable. He, however, cautioned that if experience belief that view, the step night have to be retraced.

He stated that a Socialistic ideal which reserved the support of the people could achieve the two objectives of increasing national income and enhancing individual dividual.

He otated that India had established economic otability though at a rather low level of presperity during the first Plan period. He eads the credit for the achievement went not merely to economic management and planning but included other factory among them, accidence from friendly nations. The United States, he said, had contributed the largest share of foreign pil.
