ALIEN REGISTRATION FINGERPRINT CHART

UNITED STATES DEPARTMENT OF JUSTICE

IMMIGRATION AND NATURALIZATION SERVICE

INSTRUCTIONS

To obtain classifiable fingerprints:

1. Use printer's ink.
2. Distribute ink evenly on inking slab.
3. Wash and dry fingers thoroughly.
4. Roll fingers from nail to nail, and avoid allowing fingers to slip.
5. Be sure impressions are recorded in correct order.
6. If an amputation or deformity makes it impossible to print a finger, make a notation to that effect in block.
7. If some physical condition makes it impossible to obtain perfect impressions, submit the best that can be obtained, with a memo stapled to the card explaining the circumstances.
8. Examine the completed prints to see if they can be classified, bearing in mind the following:

Most fingerprints fall into the patterns shown below (other patterns occur infrequently and are not shown)

1. LOOP

THE LINES BETWEEN CENTER OF
LOOP AND DELTA MUST SHOW

2. WHORL

THESE LINES RUNNING BETWEEN
DELTAS MUST BE CLEAR

ARCHES

ALIEN REGISTRATION FINGERPRINT CHART
UNITED STATES DEPARTMENT OF JUSTICE
IMMIGRATION AND NATURALIZATION SERVICE

OFFICIAL STAMP

INSTRUCTIONS

To obtain classifiable fingerprints:

1. Use printer's ink.
2. Distribute ink evenly on inking slab.
3. Wash and dry fingers thoroughly.
4. Roll fingers from nail to nail, and avoid allowing fingers to slip.
5. Be sure impressions are recorded in correct order.
6. If an amputation or deformity makes it impossible to print a finger, make a notation to that effect in the individual finger block.
7. If some physical condition makes it impossible to obtain perfect impressions, submit the best that can be obtained with a memo stapled to the card explaining the circumstances.
8. Examine the completed prints to see if they can be classified, bearing in mind the following:

Most fingerprints fall into the patterns shown below (other patterns occur infrequently and are not shown here):

1. LOOP

THE LINES BETWEEN CENTER OF LOOP AND DELTA MUST SHOW

2. WHORL

THESE LINES RUNNING BETWEEN DELTAS MUST BE CLEAR

3. ARCH

ARCHES HAVE NO DELTAS

- (a) A delta (Δ) is the point at which the lines forming the loop or whorl pattern spread and begin going in different directions. All loop prints have one delta. Whorl prints have two.
 - (b) Loop prints cannot be classified unless the center of the loop and the delta, and the lines between them, are clear.
 - (c) Whorl prints cannot be classified unless the two deltas and the lines connecting the deltas are clear.
 - (d) Arch fingerprints can be classified if a sufficiently clear impression is obtained to permit identification of the pattern as being an arch.
9. If, upon examination, it appears that any of the impressions cannot be classified, new prints should be made. If not more than three impressions are unclassifiable, new prints of these fingers may be taken and pasted over the defective ones. If more than three are unclassifiable, make a new chart.

ALIEN REGISTRATION FINGERPRINT CHART
UNITED STATES DEPARTMENT OF JUSTICE
IMMIGRATION AND NATURALIZATION SERVICE

OFFICIAL STAMP

INSTRUCTIONS

To obtain classifiable fingerprints:

1. Use printer's ink.
2. Distribute ink evenly on inking slab.
3. Wash and dry fingers thoroughly.
4. Roll fingers from nail to nail, and avoid allowing fingers to slip.
5. Be sure impressions are recorded in correct order.
6. If an amputation or deformity makes it impossible to print a finger, make a notation to that effect in the individual finger block.
7. If some physical condition makes it impossible to obtain perfect impressions, submit the best that can be obtained with a memo stapled to the card explaining the circumstances.
8. Examine the completed prints to see if they can be classified, bearing in mind the following:

Most fingerprints fall into the patterns shown below (other patterns occur infrequently and are not shown here):

1. LOOP

THE LINES BETWEEN CENTER OF LOOP AND DELTA MUST SHOW

2. WHORL

THESE LINES RUNNING BETWEEN DELTAS MUST BE CLEAR

3. ARCH

ARCHES HAVE NO DELTAS

- (a) A delta (Δ) is the point at which the lines forming the loop or whorl pattern spread and begin going in different directions. All loop prints have one delta. Whorl prints have two.
 - (b) Loop prints cannot be classified unless the center of the loop and the delta, and the lines between them, are clear.
 - (c) Whorl prints cannot be classified unless the two deltas and the lines connecting the deltas are clear.
 - (d) Arch fingerprints can be classified if a sufficiently clear impression is obtained to permit identification of the pattern as being an arch.
9. If, upon examination, it appears that any of the impressions cannot be classified, new prints should be made. If not more than three impressions are unclassifiable, new prints of these fingers may be taken and pasted over the defective ones. If more than three are unclassifiable, make a new chart.

INSTRUCTIONS

To obtain classifiable fingerprints:

1. Use printer's ink.
2. Distribute ink evenly on inking slab
3. Wash and dry fingers thoroughly.
4. Roll fingers from nail to nail, and avoid allowing fingers to slip.
5. Be sure impressions are recorded in correct order.
6. If an amputation or deformity makes it impossible to print a finger, make a notation to that effect in the block.
7. If some physical condition makes it impossible to obtain perfect impressions, submit the best that can be obtained, with a memo stapled to the card explaining the circumstances.
8. Examine the completed prints to see if they can be classified, bearing in mind the following:
