

...now data. And, while an
 official signal could be expected
 to come in at a high frequency
 where interference from natural
 radio noise is lowest, the signal
 often come strongest below
 megacycles. At that frequency
 competition from galactic noise
 great.

Moreover, Drake calculates,
 energy required to generate
 signals is 10 billion times larger
 than all the power produced
 earth put together. It is unlikely
 that any civilized people would
 set up such a powerful beacon
 and then use it with such in-

out an explanation that does not
 do violence to our physical laws."
 One idea is that a heavenly body
 known as a neutron star may be re-
 sponsible. A neutron star is an
 ordinary star like our sun, or big-
 ger, whose internal source of en-
 ergy has burned out, causing it to
 collapse into a mass of such ter-
 rific density that one cubic-inch
 could weigh 100 million tons.
 Such stars could not give off
 none could be seen,
 never expected
