Date: April 18, 1968

Re: MURKIN

FBI File 44-38861

Lab. No. PC-A5530 BX GH JV

Specimens received

4/8/68

CLOTHING FROM MARTIN LUTHER KING, JR.

Q76 Shirt
Q77 Necktie
Q78 Suit coat
Q79 Trousers
Q80-Q81 Pair of socks
Q82 Undershorts
Q83 Undershirt
Q84-Q85 Pair of shoes

Results of examination:

There is a large hole in the right front portion of the collar of the Q76 shirt. The Q77 necktie has been forcibly torn apart in the right front neck portion also. The object or objects causing the damage were larger than a bullet of .30 caliber size and irregular in shape as all of the yarns were broken, not cut. One or more segments of bone could not be eliminated as the cause of the damage.

The right lapel of the Q78 coat has three damaged areas on the surface of the fabric. These areas have been torn by some object or objects, but the damage does not extend through the lapel. The torn areas vary from $\frac{1}{4}$ " to 1" in length and the condition of the yarn indicates the object or objects struck the coat from above and probably glanced off the coat.

Due to the sizes and ragged edges of the damaged areas of the Q76 shirt, Q77 necktie and Q78 suit coat, it was not possible to recognize any bullet holes or to

FEDERAL BUREAU OF INVESTIGATION

determine from visual examination whether or not a bullet or any bullet fragments had passed through or struck these items.

No bullet holes were found in Q79 through Q85.

The edges of the hole torn in the Q76 shirt collar, the edges of the three tears on the collar of the Q78 suit coat and the material near the ends of the Q77 necktie were contaminated with traces of lead which could have come from a bullet or from bullet fragments. The lead contamination of these items could not be associated with a particular bullet or lead source.

Lab. No. PC-A6530 BX CH JV

Memorandum

Dated 4/8/68

Re: Bureau - Spectrographic - Microscopic

Examination Q76 through Q85 are being temporarily retained in Lab. Inventory.

As an integral examination of the Q76 shirt collar and Q78 suit coat was indicated.

A microscopic examination of the Q76 shirt collar and Q78 suit coat was made on 4/8/68. The Q76 shirt collar was found to have three tears in the collar area, two of which were located on the right side of the collar, and one on the left side. The Q78 suit coat was found to have three tears in the collar area, two of which were located on the right side of the collar, and one on the left side. The material causing the damage to the Q76 shirt collar and Q78 suit coat could have also caused the damage to the Q77 necktie at the same time due to the type and location of the damage.

SUBJECT: UNSUB, aka
John Willard;
MARTIN LUTHER KING, JR. -
VICTIM
CR

(OO Memphis)

Submitted herewith in separate enclosure is the clothing Dr. KING wore at the time of the shooting. This was removed at St. Joseph Hospital in Memphis and brought to the Memphis PD by Det. E. S. BERKLEY, Memphis PD, and turned over to SAC ROBERT G. JENSEN. Preliminary examination indicates what appears to be bullet entry in collar of shirt and collection of large amounts of blood on clothing. This being submitted to Laboratory as possibility exists it may determine point of entry at which bullet entered KING's body. Laboratory also conduct serology examination and any other examination deemed appropriate by Laboratory.

Specimens received 4/15/68

Q173 Change of Address Order, bearing signature
"Eric S. Galt" (Card indicates change is temporary
until 4/25/68)

Result of examination:

It was concluded that the "Eric S. Galt" signature on Q173 was prepared by the writer of the signature in this name appearing on other specimens previously submitted in this matter.

The typewriting appearing on Q173 is the same style as that appearing on other items, but the lack of identifying defects precluded a determination as to whether the same typewriter was employed in preparing this item and other specimens believed to have emanated from Eric S. Galt.

Specimen Q173 has been retained. Photographs were made.

CARBON COPY

Enclosed is one (1) change of address order bearing signature of ERIC S. GALT. This change of address order was obtained on 4/12/68 at the St. Francis Hotel from ALAN O. THOMPSON, manager of the Hotel St. Francis, 5533 Hollywood Boulevard, Los Angeles. It should be noted that GALT stayed at the St. Francis Hotel from 1/21/68 through 3/17/68 and on departing the hotel executed the change of address order.

This change of address order was obtained by SAs THOMAS G. MANSFIELD and DENNIS C. LE MASTER. The Bureau is requested to compare the signature of ERIC S. GALT with the handwriting samples previously obtained in this matter.

Information copy being furnished Memphis inasmuch as that office is origin in this matter.

Specimen received 4/13/68 from FBI, Memphis (PC-A5656 KS)

K30 Soil from approximately twenty feet from site where gun
and bedspread abandoned

Specimens received 4/16/68 from FBI, Memphis (PC-A5693 KS)

K44 - K49 Soil from parking lot and area between curb and
sidewalk near Unit 34 of Rebel Motel

Specimens received 4/16/68 from FBI, Memphis (PC-A5695 KS)

K50 - K59 Soil samples from area in rear of 418 and 423 $\frac{1}{2}$ South
Main Street

Results of examination:

The previously submitted bedspread, specimen Q13, is composed of brown cotton fibers, green cotton fibers and green rayon fibers. Brown cotton fibers, green cotton fibers and green rayon fibers that could have come from the Q13 bedspread were found on Q93, Q97 through Q104 and Q106 and in the Q117 sweepings. No such fibers were found on Q89 through Q92 or in the Q114 through Q115 sweepings.

Caucasian head hairs like the hairs previously found on the Q13 bedspread, in the Q15 zipper bag, on the Q26 towel, on the Q29 and Q30 socks and on the Q38 hairbrush were found on Q93, Q97, Q99, Q100 and Q103. These hairs could have come from the same person. It is pointed out that hairs do not possess enough individual microscopic characteristics to be positively identified as originating from a particular person. Caucasian head hairs were also found in the Q114 through Q117 vacuum sweepings. Some of these hairs are like the Q13, Q15, Q26, Q29, Q30 and Q38 hairs and could have come from the same person. Some of the hairs from Q114 through Q117 are different from the Q13, Q15, Q26, Q29, Q30 and Q38 hairs and did not come from the same person. No hairs were found on Q89 through Q92, Q98, Q101, Q102, Q104 or Q106.

The Q89 through Q91 floor mats are composed of translucent red plastic. No brand names are indicated on the mats. The letters "HIS" are hand printed on the back of each mat, apparently with a felt tip marker. The significance of the letters is not known.

Specimen Q92 is a black and gray plaid rubber mat. No marks were found on Q92.

Specimens Q94, Q108 and Q109 are standard items furnished with Mustangs.

Specimen Q95 is a dark blue short-sleeved sweat shirt of medium size. No labels or laundry marks were found on Q95.

Specimen Q96 is a black and white rubber sandal for the left foot. A label on the bottom bears the following: "MEN'S - M SHOE SIZE 7-8½ JAPAN"

Specimen Q97 is a twin-bed size, fitted, white bed sheet. Specimen Q99 is a white pillowcase. A white laundry tape is present on Q97 and Q99. The following is printed in black on each tape: "2-02-3" It was concluded that the marks on these tapes did not originate from the machine which prepared the laundry tapes on the Q69 shorts and the Q70 T shirt.

Specimen Q98 is a black and white shirt jacket. The following is present on the label of Q98:

" H RN19788 65% DACRON 35% COTTON
15-15 1/2 MONTICELLO SHIRT JACKET TAPERED"

Specimen Q100 is a twin-bed size, fitted, white bed sheet. The sheet is in two pieces. The two pieces are stitched together with yellow thread and white thread. Inquiry at a department store in Washington, D. C., developed the following information concerning Q100: It is a #3 grade irregular seamed sheet. Most such sheets even if manufactured in the United States are sold in other countries. If sold in this country, they are sold in low class "illegitimate stores." Such sheets do not bear the manufacturer's name.

Specimen Q101 is a black short-sleeved shirt. The following is present on the label of Q101:

"ASTURO ROSETTI CUSTOM TAILORED -L- 100% COTTON
MADE IN U.S.A. RN15722"

Specimen Q102 is a pair of olive green walking shorts. The following is present on the label of Q102:

"HONG KONG DIPLOMAT CUSTOM TAILORED 65% POLYESTER FIBRE
35% SUPER FINE COTTON WAIST 34"

Specimen Q103 is a light pink, looped pile cotton rug that measures 24" by 56 1/2". No labels were found on Q103.

Specimen Q104 is a feather pillow that measures about 18" by 24". The pillow has a specification label. The back of the label is stamped "9 1967."

Specimen Q105 is a container for a Polaroid camera, possibly a model 230. No label was found on Q105.

Specimen Q106 is a pair of men's stretch socks with no label.

Other than the laundry tapes on Q97 and Q99, no visible laundry marks were found on any of the cloth items listed above. No invisible laundry marks were found on any of these items.

No buttons are missing from any of the garments listed above.

The Q107 hunting knife has a blade that measures 3/9/16" in length. The blade is rusty. The words "GESCO JAPAN" are imprinted on one side of the blade and the number "45" is imprinted on the other side. The word "GESCO" is stamped on the sheath.

Specimen Q110 is a flat-tipped Stanley brand screwdriver.

Specimen Q111 is an "ANCO" brand windshield wiper blade. Part of the rubber has been torn off.

Specimen Q112 is a "Personna" double-edge razor blade. No hairs were found on Q112.

The K30 and K44 through K59 soils from Memphis are different from the soil found on the previously submitted Q13 bedspread in physical characteristics and composition. Therefore, the soil from the bedspread did not come from the sources of K30 and K44 through K59.

No soil similar to the soil from the bedspread was found in Q113, Q143 through Q158, Q160 and Q161 or on the Q163 tire and wheel. None of these soils from the car originated from the source of the soil on the bedspread.

Although nothing was noted which would aid in the determination of the original sources of specimens Q113, Q143 through Q146, Q148, Q149, Q151, Q152, Q154 and the soil from Q163, they are suitable for comparison purposes. Specimens Q147, Q150, Q153, Q155

through Q158, Q160 and Q161 are either too limited in amount or too mixed with miscellaneous debris to be of value for significant comparisons other than for elimination purposes.

The soils from the car were different from K30 and K44 through K59 in physical characteristics and composition and, therefore, did not come from the sources of K30 and K44 through K59.

No soil of value for significant comparison was found on Q89 through Q106 or in the vacuum sweepings, specimens Q114 through Q117. The mineral debris in Q114 through Q117 consists of typical car floor debris, a mixture of miscellaneous materials from numerous sources. No mineral debris of apparent significance was found in Q114 through Q117.

The scrapings from under the glove compartment, Q159, do not contain blood.

The Q162 liquid was identified as water. No traces of any alcohols such as used in windshield wash were identified in this specimen.

Specimens submitted for examination

ITEMS FROM 1966 FORD MUSTANG:

- Q89 Floor mat from right front floor
- Q90 Floor mat from rear floor
- Q91 Floor mat from left front floor
- Q92 Floor mat from trunk
- Q93 Air filter cartridge
- Q94 Wheel jack from trunk
- Q95 Dark blue short sleeve sweat shirt
- Q96 One rubber shoe, size 7-8 $\frac{1}{2}$
- Q97 One white fitted sheet
- Q98 One black and white shirt jacket
- Q99 One pillowcase
- Q100 One fitted sheet with yellow thread
- Q101 One black sport shirt
- Q102 One pair of size 34 walking shorts
- Q103 Rug from trunk
- Q104 Pillow from trunk
- Q105 Styrofoam container from trunk
- Q106 One pair of men's brown socks from trunk

- Q107 One hunting knife and sheath
- Q108 Spare tire mounting from trunk
- Q109 Lug wrench from trunk
- Q110 Blue-handled screwdriver from trunk
- Q111 Used windshield wiper blade from trunk
- Q112 One Personna razor blade
- Q113 Soil sample from spare wheel and tire
- Q114 Vacuum sweepings from front passenger side floor
- Q115 Vacuum sweepings from left front floor
- Q116 Vacuum sweepings from rear floor
- Q117 Vacuum sweepings from trunk

PC-A5627

4/12/68

Q113 - Essentially 100% 6/3 to 100% 6/4
 pale brown to light brownish brown lumps of
 soft, sd. Probable little to no clay. Colorless
 sd. to some shaly particles, some
 small glassy masses. Thin layers of
 gray silt or clay to above brown
 brownish and crumbling for removal from
 above lumps. Nothing to indicate specific
 source. 1st soil is inevitable - Diff -
 from soil in spread previously submitted.

Dark brown
 Q114 - Vacuum sweepings - mix. sd. sd.
 etc. plant fragments, colorless glass (some
 workshop) small lumps of carbonaceous lumps
 of brown etc. carbon particles paper matches

Q115 - Same type material as Q114 more rock in
 mass more material, brown red brown chert
 curved colorless glass fragments - do not appear
 very fresh. No clay or ash seq. No soil lumps

Q116 - plant mat
 mass - sd. fragments etc. portion of look fresh,
 dirty, cinders, insect fragments, mass of
 gray & soft blue-white lumps of material
 (thin) soluble in water. brown - probably detergent
 shell particles etc. Nothing of apparent
 seq. No soil lumps

(2)

PC-15627

4/12/68

Q117 - misc. deb. fibers, sh, salt, rock frags
 fresh plant frags - some water, coarser sh,
 rubber: nothing (spongy)

Q111 - few rocks and qtz grains Nothing of apparent
 sig.

4/13

Q110 - misc. cotton deb. sh - few misc. fibers
 sh. No soil lumps

*Q189 - Present on mat was small lumps of dark brown
 mat. hairline, with v. thick of way and phosphate.

*Q91 - Some tiny lumps of soil - gen. seen in color but
 too crushed to mix with. misc. deb. No value

Q92 - misc. deb. typ. car floor mixture sh salt
 rock frags, hairs, fibers.

Q93 - misc. loose sh, and deb, insects, etc

Q94 - No modern deb.

Q95 - Trace misc. salty deb. No value.

Q96 - No appreciable deb.

Q97 - misc. salt frags little. No value

Q98 - small amount misc. deb. No value.

*Q99 - Essentially featureless

(3) PC-A5627 4/12/68

Q100 - Small amount min. silty dol. N.V.

Q101 Trace of brown soil on felt collar, across rim inside, also trace of sandstone in middle of back inside. (Dol. min. silty N.V.)

Q102 - Trace min. dol. N.V.

Q103 - Trace min. silty dol. N.V.

Q104 - Scattered and traces min. dol.

Q105 N.D.

Q106 - Trace min. silty dol. N.V.
