Submitted herewith are additional items recovered in connection with the murder of Dr. MARTIN LUTHER KING, JR.:

- Q69
- (1) One pair of men's shorts. (Waistband in unstretched condition, one side, measures approximately 11 3/4 inches, which would be waistband of approximately 23 1/2 inches. Fully extended waistband measures approximately 17 1/2 inches, one side or a total of 35 inches.
- Q70
- (2) T-shirt, size 42-44, designated "Jockey Power Knit" T-shirt, large size. It appears on visual examination that lower portion of T-shirt has been cut.

Laboratory requested to examine T-shirt and shorts for any hidden laundry marks and any other examination that may help to determine origin of garments. In connection with the laundry tape that appears on both the shorts and T-shirt, the number Q2B-6 appears. Since a portion of the left side of each of these tapes is missing, the possibility that the "O" might be the remnant of the letter "D" or some other combinations should not be overlooked.

Inquiry of the Albany Office discloses that the Textile Marking Machine Co., Syracuse, N.Y., has a representative, JOE COMBS, 5232 Devonshire Dr., Oxenhill, Maryland, Tel. 301-248-6123, in residence in Oxenhill. COMBS reportedly has the ability to determine on inspection of laundry marking tape as to whether or not this is type tape produced by his company and type of machine producing same.

// Request that Laboratory prior to conducting its examinations arrange for COMBS to view tape.

Q72 In addition, there is submitted herewith one ^{from} board which is part of a window sill in window of bathroom at 492 1/2 South Main, from which it appears that fatal shot was fired.

Laboratory requested to examine board to ascertain any possibility of breech powder burns or any other identifiable markings that may be made by weapon in question. Possibility that recoil marks may appear on board. Texture of board was such that no latents of significance could be developed. Suggest however that the Bureau reexamine for possibility latents might be developed by FBI.

In addition, there is submitted herewith five cards appropriately identified of various latents lifted by representatives of the Memphis PD. These latents should be examined against any latents developed in examinations conducted by FBI.

FBI File No. 44-38861

Lab. No. PC-A5524 BX

Specimens received 4-6-68

- Q72 .243 Winchester caliber Remington bolt-action rifle, Model 700, Serial Number 283749 from Aeromarine Supply Company
- Q73 Telescope sight mount from .243 Winchester caliber rifle
- Q74 Original invoice dated 3-29-68, Number 2251A, covering sale of rifle to Harvey Lowmeyer
- Q75 Copy of invoice, Number 2251A

ALSO SUBMITTED:

Factory box for .243 Winchester caliber rifle
Nine boxes of caliber .243 Winchester ammunition
Elimination major case prints of Donald F. Wood
and U. L. Mathew Baker

Results of examination:

Debris found on the face of the bolt of the Q72 rifle shows that this rifle has not been fired recently. The debris has been present for a considerable length of time and this weapon probably has not been fired since manufacture.

The Memphis Office submitted a .30-06 Springfield caliber Remington Model 760 rifle, Serial Number 461476, to the Laboratory in connection with this case. A Redfield telescope sight is mounted on this rifle. No marks were found on the telescope sight tube and, therefore, the telescope sight mount, Q73, cannot be associated with this sight tube on the basis of a toolmark examination. Therefore, it was not possible to determine whether or not the telescope sight was ever on the telescope mount.

As a result of investigation, the Birmingham Office advised that the .30-06 Remington rifle involved in this case was sold to a person giving the name Harvey Lowmeyer on 3-30-68 by the Aeromarine Supply Company, 5701 Airport Highway, Birmingham, Alabama. The purchaser originally bought a caliber .243 Winchester rifle on 3-29-68 upon which he had mounted a Redfield telescope sight. The purchaser returned this rifle the following day and exchanged it for the .30-06 caliber Remington rifle, Serial Number 461476, which was recovered in Memphis immediately following the shooting of Martin Luther King, Jr. Aeromarine Supply Company transferred the telescope sight to this rifle, using a new mount.

The Birmingham Office submitted the following material for Laboratory and latent examination:

- Q72 .243 Winchester caliber Remington bolt-action rifle, Model 700, Serial Number 283749 from Aeromarine Supply Company
- Q73 Telescope sight mount from .243 Winchester caliber rifle
- Q74 Original invoice dated 3-29-68, Number 2251A, covering sale of rifle to Harvey Lowmeyer

Memorandum to Mr. Conrad
Re: UNKNOWN SUBJECT, also

MARTIN LUTHER KING, JR. -
VICTIM; CIVIL RIGHTS

A/S Nine boxes of caliber .243 Winchester
ammunition

A/S Elimination major case prints of Donald F. Wood
and U. L. Mathew Baker

Birmingham requested the Laboratory determine whether
this .243 Winchester rifle had been fired. The Laboratory
determined it had not been fired.

Birmingham requested we determine whether we could
associate the telescope sight on the rifle recovered in
Memphis with the sight mount originally used with this sight
on the .243 Winchester rifle. The Laboratory determined there
were no marks left on the telescope sight by this mount and
therefore no association was possible.

A document examination is being made of the signature
appearing on the gun sale invoice and fingerprint examinations
are being made on all of the items listed above.

In this connection, the nine boxes of ammunition were
submitted since the Aeromarine Supply Company clerks stated
the purchaser of the rifle may have handled one or more of
these boxes.

Birmingham and Memphis will be advised of the results
of all examinations by teletype.

ACTION: For information.
