- Q254 Envelope postmarked "Little Falls, N.J., Apr.-10'68" with enclosed "Lesson #9" of the Locksmithing Institute, bearing typewritten name and address for Eric S. Galt**

Result of examination:

It was concluded that the questioned hand printing appearing on Q248, Q249, Q250 and Q251 was prepared by the individual responsible for preparing other hand printing on specimens in this case attributed to Eric S. Galt.

The typewritten impressions appearing on Q252, Q253 and Q254 are similar in style to those appearing on other items received in this matter believed to have emanated from Eric S. Galt, but the lack of identifying defects precluded a definite determination as to whether the same typewriter was used to prepare all of these items; however, no significant differences were noted.

The submitted evidence has been retained.

FBI File No. 44-38861

Lab. No. PC-A5744 IZ GH
PC-A5764 IZ BX
D-561140 JK

Specimens received 4/18/68 (PC-A5744 IZ GH)

Q229-Q232 Four coat hangers
Q233-Q234 Two cardboard inserts for coat hangers
Q235 Handkerchief
Q236-Q237 Pair of socks

Specimens received 4/18/68 (PC-A5764 IZ BX; D-561140 JK)

ITEMS FROM ROOM 2, 113 14TH STREET, NORTHEAST, ATLANTA, GEORGIA

Q240 Large key blank
Q241 Small key blank
Q242 Piece of black thread
Q243 Piece of brown thread with needle
Q244 Metal strip, $\frac{1}{2}$ " by 2"
Q245 Business card for "HANEY'S SHEET METAL"

Results of examination:

Specimen Q243 is an 11" piece of brown cotton sewing thread which is threaded through a needle. The Q243 thread is like the thread used to repair the previously submitted Q69 undershorts in all observable characteristics and could be from the same source.

Specimen Q242 is a piece of black cotton sewing thread which measures 3 $\frac{3}{8}$ " in length. Specimen Q242 could not be associated with any previously submitted item.

The Q240 and Q241 key blanks are flat steel blanks of the type used to make keys for lever tumbler locks such as are used on some cabinets and desks. Q240 is uncut. Q241 has two square notches cut in one side and the tip of the blank has been filed slightly. The presence of smoke residue in one of the notches and what appears to be heat discoloration on the blank suggests an attempt may have been made to fit this key to a lock by the "impression" method. The "impression" fitting method is used by locksmiths to make a key for a lock for which no key is available.

Q244 appears to be a gage for checking to determine whether the proper angle has been cut in a key blank or other object. One end of Q244 has been formed into a "V" shape having an angle of approximately 100 degrees which corresponds to the angle of cuts formed in key blanks by some key machine milling cutters. Q240, Q241 and Q244 are consistent with the type of materials furnished students taking correspondence locksmithing courses.

Although some differences were noted between the questioned writings on the Q245 business card and the writings received in this matter which have been attributed to Eric S. Galt, the limited nature of the questioned material and the lack of comparable writings precluded a definite opinion as to whether Galt prepared this questioned writing.

Specimens Q236 and Q237 constitute a pair of men's soiled stretch socks. The socks are white with a blue and red diamond design on each side. No labels or visible or invisible laundry marks were found on Q236 and Q237. Several brown limb hairs of Caucasian origin were found on Q236 and Q237. These hairs possess too few individual microscopic characteristics to be of value for association with a particular person.

No fibers were found on Q235, Q236 or Q237 that could be associated with the Q13 bedspread or other previously submitted cloth items.

The coat hanger designated as Q229 bears advertising for the "HAI PING Laundry & Cleaners 1162 Peachtree St, N.E., Atlanta 9, Ga." No markings were noted on the other coat hangers.

The cardboard coat hanger insert designated Q233 bears the following: "L. M. Leathers' Sons Paper Division P.O. Box 1198, Athens, Georgia" No markings were noted on the other insert.

Specimen Q235 is a man's white cotton handkerchief that has been used to apply shoe polish. No label or visible or invisible laundry marks were found on Q235. No hairs were found on Q235

The brown stain on the Q235 handkerchief is similar in color and composition to the brown polish of Q41 and could have come from a source such as represented by the brown "KIWI" polish of specimen Q41.

MURKIN

PC-A 5694

Submitted herewith are the following items:

- (1) One pillow and pillow case
- (2) One green sofa pillow
- (3) One bed sheet.
- (4) Second bed sheet.
- (5) One black leather strap, $\frac{1}{4}$ " wide
- (6) One black leather strap, $\frac{1}{2}$ " wide
- (7) Several strands of grass-like material.
- (8) One towel, white with blue and green stripes.
- (9) One plastic-type red, white, and blue decorative pin

dfps

The green pillow, bedding, and towel all came from Room 5-B, which was occupied by suspect in instant case. It is not known whether suspect lay down on, touched, or in any way had contact with this material; however, the Laboratory is requested to examine all material for the possibility that there

are hairs or fibers that may be suitable for comparison with other material submitted by the Memphis Division.

11
In addition, of possible interest are the two black leather straps submitted herewith. Possibility exists that they may have connection with binoculars submitted and/or rifle in instant case. The Laboratory should examine binoculars, binocular case, and/or rifles to see whether or not possibility exists markings may help associate these items.

efr
In addition, the necessary examination for latent prints should be made on both leather belts.

Memphis does not know at this time whether in examination of automobile conducted by Atlanta any grassy materials recovered. In the event such was submitted, the grass submitted by Memphis should be compared if such is possible.

Markings on material submitted disclosed the initials "ELH" which represent those of E. LARRY HUTCHINSON, Investigator, Attorney General's Office, Shelby County, Memphis, Tennessee. The other initials "OVJ" are those of the Agent receiving the material from E. LARRY HUTCHINSON. In one instance, the striped towel was received by SA CYRIL F. BUSCH from Inspector N. E. ZACHARY, Memphis PD.

The plastic red, white, and blue decorative pin was located by Lt. GLENN KING, Memphis PD, and turned over to Special Agents.

All the above evidence should be returned to the Memphis Division upon completion of the requested examinations.

Results of examination:

Numerous hairs were found on the Q164 and Q165 bed sheets. The hairs include brown to black head, pubic and limb hairs of Caucasian origin. Also, one dark brown head hair of Negroid origin was found on Q165. The range of characteristics exhibited by the Caucasian hairs suggests that they are from more than one person. Some of the hairs are deteriorated and dirty, similar to hairs from floor debris.

A few of the Caucasian head hairs from Q164 and Q165 are similar in some microscopic characteristics to hairs previously found on items from the Mustang and Memphis scene but do not match in all microscopic characteristics. The possibility that these hairs originated from the same source could not be eliminated.

No fibers were found on Q164 or Q165 that could be associated with the Q13 bedspread or with other cloth items previously submitted from the Memphis scene or from the Mustang.

The Q171 keyhole saw is old. The brand or source of Q171 could not be determined.

Some similarities were noted between the handwritten word "florida" and other variations of this word appearing on Q167 when compared with available writings attributable to Eric S. Galt. The limited nature of the writings on Q167 precluded a more definite opinion.

The hand printing on Q170 (Jimmy Owen) is upper- and lower-case, while previous hand printing on items received has been upper-case letters. For this reason, it could not be determined whether this name was prepared by Galt; however, differences were noted.

The printed words "P_ETTED" and either "PUNCH" or "BUNCH" were faintly inscribed on the newspaper designated Q169. Any significance of this is not known.

No previous road maps similar to Q166 have been received.

Specimens Q166 through Q170 and Q172 were all examined for indented impressions and other markings, but except for the above, nothing of significance was noted.
