ITEMS FROM 1966 FORD MUSTANG:

Q89	Floor mat from right front floor
Q90	Floor mat from rear floor
Q91	Floor mat from left front floor
Q92	Floor mat from trunk
Q93	Air filter cartridge
Q94	Wheel jack from trunk
Q95	Dark blue short sleeve sweat shirt
Q96	One rubber ^{SANDAL} shoe, size 7-8 $\frac{1}{2}$
Q97	One white fitted sheet
Q98	One black and white shirt jacket
Q99	One pillowcase
Q100	One fitted sheet with yellow thread
Q101	One black sport shirt
Q102	One pair of size 34 walking shorts
Q103	Rug from trunk
Q104	Pillow from trunk
Q105	Styrofoam container from trunk
Q106	One pair of men's brown socks from trunk

factor
4/19/68
MSC:gam

through Q158, Q160 and Q161 are either too limited in amount or too mixed with miscellaneous debris to be of value for significant comparisons other than for elimination purposes.

The soils from the car were different from K30 and K44 through K59 in physical characteristics and composition and, therefore, did not come from the sources of K30 and K44 through K59.

No soil of value for significant comparison was found on Q89 through Q106 or in the vacuum sweepings, specimens Q114 through Q117. The mineral debris in Q114 through Q117 consists of typical car floor debris, a mixture of miscellaneous materials from numerous sources. No mineral debris of apparent significance was found in Q114 through Q117.

The scrapings from under the glove compartment, Q159, do not contain blood.

The Q162 liquid was identified as water. No traces of any alcohols such as used in windshield wash were identified in this specimen.

Specimen Q105 is a container for a Polaroid camera, possibly a model 230. No label was found on Q105.

Specimen Q106 is a pair of men's stretch socks with no label.

Other than the laundry tapes on Q97 and Q99, no visible laundry marks were found on any of the cloth items listed above. No invisible laundry marks were found on any of these items.

No buttons are missing from any of the garments listed above.

The Q107 hunting knife has a blade that measures 3/9/16" in length. The blade is rusty. The words "GESCO JAPAN" are imprinted on one side of the blade and the number "45" is imprinted on the other side. The word "GESCO" is stamped on the sheath.

Specimen Q110 is a flat-tipped Stanley brand screwdriver.

Specimen Q111 is an "ANCO" brand windshield wiper blade. Part of the rubber has been torn off.

Specimen Q112 is a "Personna" double-edge razor blade. No hairs were found on Q112.

The K30 and K44 through K59 soils from Memphis are different from the soil found on the previously submitted Q13 bedspread in physical characteristics and composition. Therefore, the soil from the bedspread did not come from the sources of K30 and K44 through K59.

No soil similar to the soil from the bedspread was found in Q113, Q143 through Q158, Q160 and Q161 or on the Q163 tire and wheel. None of these soils from the car originated from the source of the soil on the bedspread.

Although nothing was noted which would aid in the determination of the original sources of specimens Q113, Q143 through Q146, Q148, Q149, Q151, Q152, Q154 and the soil from Q163, they are suitable for comparison purposes. Specimens Q147, Q160, Q153, Q155

Specimen Q97 is a twin-bed size, fitted, white bed sheet. Specimen Q99 is a white pillowcase. A white laundry tape is present on Q97 and Q99. The following is printed in black on each tape: "2-OR-3" It was concluded that the marks on these tapes did not originate from the machine which prepared the laundry tapes on the Q69 shorts and the Q70 T shirt.

Specimen Q98 is a black and white shirt jacket. The following is present on the label of Q98:

" M RN19788 65% DACRON 35% COTTON
15-15 1/2 MONTICELLO SHIRT JACKET TAPERED"

Specimen Q100 is a twin-bed size, fitted, white bed sheet. The sheet is in two pieces. The two pieces are stitched together with yellow thread and white thread. Inquiry at a department store in Washington, D. C., developed the following information concerning Q100: It is a #3 grade irregular seamed sheet. Most such sheets even if manufactured in the United States are sold in other countries. If sold in this country, they are sold in low class "illegitimate stores." Such sheets do not bear the manufacturer's name.

Specimen Q101 is a black short-sleeved shirt. The following is present on the label of Q101:

"ARTURO ROSETTI CUSTOM TAILORED -L- 100% COTTON
MADE IN U.S.A. RN15722"

Specimen Q102 is a pair of olive green walking shorts. The following is present on the label of Q102:

"HONG KONG DIPLOMAT CUSTOM TAILORED 65% POLYESTER FIBRE
35% SUPER FINE COTTON WAIST 34"

Specimen Q103 is a light pink, looped pile cotton rug that measures 24" by 56 1/2". No labels were found on Q103.

Specimen Q104 is a feather pillow that measures about 19" by 24". The pillow has a specification label. The back of the label is stamped "9 1967."

Results of examination:

The previously submitted bedspread, specimen Q13, is composed of brown cotton fibers, green cotton fibers and green rayon fibers. Brown cotton fibers, green cotton fibers and green rayon fibers that could have come from the Q13 bedspread were found on Q96, Q97 through Q104 and Q106 and in the Q117 sweepings. No such fibers were found on Q89 through Q92 or in the Q114 through Q116 sweepings.

Caucasian head hairs like the hairs previously found on the Q13 bedspread, in the Q15 zipper bag, on the Q26 towel, on the Q29 and Q30 socks and on the Q38 hairbrush were found on Q95, Q97, Q99, Q100 and Q103. These hairs could have come from the same person. It is pointed out that hairs do not possess enough individual microscopic characteristics to be positively identified as originating from a particular person. Caucasian head hairs were also found in the Q114 through Q117 vacuum sweepings. Some of these hairs are like the Q13, Q15, Q26, Q29, Q30 and Q38 hairs and could have come from the same person. Some of the hairs from Q114 through Q117 are different from the Q13, Q15, Q26, Q29, Q30 and Q38 hairs and did not come from the same person. No hairs were found on Q89 through Q92, Q98, Q101, Q102, Q104 or Q106.

The Q89 through Q91 floor mats are composed of translucent red plastic. No brand names are indicated on the mats. The letters "HIS" are hand printed on the back of each mat, apparently with a felt tip marker. The significance of the letters is not known.

Specimen Q92 is a black and gray plaid rubber mat. No marks were found on Q92.

Specimens Q94, Q108 and Q109 are standard items furnished with Mustangs.

Specimen Q95 is a dark blue short-sleeved sweat shirt of medium size. No labels or laundry marks were found on Q95.

Specimen Q96 is a black and white rubber sandal for the left foot. A label on the bottom bears the following: "MEN'S - M. SHOE SIZE 7-8 1/2 JAPAN"

Specimens received 4/12/68 when personally delivered by

CERTIFICATE
24 October 1966

We certify that this is a report of psychiatric examination pursuant to the provisions of Section 552.020 RSMo 1963, as ordered by the Circuit Court of Cole County, Cause No. 6303, in the case of JAMES EARL RAY, a 38 year old, single, Caucasian male, who was admitted to Fulton State Hospital on 8 September 1966.

I. PERTINENT HISTORY

Reason for Admission: Pre-trial examination pursuant to Section 552.020 by Circuit Court Order of Cole County alleged to be charged with the crime of attempted escape.

Legal Status: Subject was transferred to this hospital for pre-trial evaluation from the Missouri State Penitentiary, where he was serving a sentence of twenty years, having been convicted of the crimes of first degree robbery and two charges of operating a motor vehicle without the permission of the owner. In addition to the sentence, he is serving, he now has a charge against him of attempted escape.

Pertinent Social History: According to accompanying information received from the Missouri State Penitentiary, at or about 9:00 p.m. on 11 March 1966, the subject attempted to escape and actually had hidden out inside the penitentiary walls until: was discovered at approximately 12:10 a.m. on 13 March 1966 attempting to make his way to the roof from which he apparently planned to scale the prison wall. He had placed a dummy in his bed to cover up for his absence at the 9:00 a.m. count on 11 March and had taken a 14 foot iron rod with a metal hook on the end with which he was able to scale several feet of one of the walls inside the penitentiary. He had cut a hole through a security screen on a window and had been hiding out from search parties on various areas of the roof.

Mr. James Ray was born on [redacted] in Illinois. The record indicates that he completed ten grades of school and entered the Army in February 1946, where he served until December 1948, at which time he was discharged because of a lack of adaptability. His FBI record comprises one and one half pages and shows numerous arrests for a variety of charges. He has served sentences in various penal institutions on conviction of such charges as robbery, forgery of postal money orders, and car theft. He has been incarcerated in one or another penal institution a good part of his adult life.

II. PHYSICAL STATUS

There is no physical disease or defect which requires treatment at this time.

Laboratory Data: 9 Sep 66: Urinalysis essentially negative. Hematology within normal limits. Serum bromides negative. Blood sugar and blood urea nitrogen were within normal limits. VDRL nonreactive.
13 Sep 66: Chest x-ray reported as negative.

II. MENTAL STATUS

Orientation: He is oriented for time, place and person.

Memory: His memory is unimpaired for both recent and remote events.

Speech and Mental Activity: He is coherent, alert, relevant and there are no hallucinations or delusions.

Mood and Affect: He appeared to be somewhat tense and anxious and at times showed some mild depression but not of psychotic proportions.

Insight and Judgment: He has a good verbal assessment of reality but in the past he has used poor judgment.

Psychological Testing: Psychological tests indicate that he has an IQ of 105 which places him within the average range of intellectual functioning. Tests also showed some degree of depression. The psychological tests showed no evidence of a psychosis.

IV. COURSE IN HOSPITAL

He has made a good hospital adjustment and has not been a management problem.

V. CONDITION AT PRESENT

Unchanged.

VI. DIAGNOSIS

Sociopathic Personality, Antisocial Type with anxiety and depressive features.

VII. DISCUSSION

Patient has been observed, studied and tested. No symptoms or signs indicating a mental disease or defect could be found. Although he showed signs of anxiety and depression, these could not be considered of psychotic proportions.

VIII. FINDINGS

- 1) That the accused has no mental disease or defect within the meaning of Section 552.010.
- 2) That the accused has the capacity to understand the proceedings against him and can assist in his own defense.
- 3) That the accused did know and appreciate the nature, quality and wrongfulness of his conduct.

IX. RECOMMENDATION

It is recommended that he be returned to the Missouri State Penitentiary.

MURKIN

Reference is made to my memo 9/24/68 advising that three representatives of the Attorney General's office in Memphis would be arriving at the Bureau to go over the evidence in this case on Wednesday, 9/25/68.

Yesterday Mr. Robert K. Dwyer, Special Assistant to the Attorney General; Mr. James Beasley, Assistant District Attorney, and Mr. John Carlyle, Investigator for the District Attorney's office came to the Laboratory to discuss evidence connected with and expert testimony believed to be necessary at the forthcoming trial of James Earl Ray. Supervisor Richard E. Long of the General Investigative Division participated in the discussions.

In the Physics and Chemistry Section detailed discussions were had concerning firearms aspects of the case with SA R. A. Frazier and the hairs and fibers evidence with SA M. S. Clark. In the Document Section they discussed possible document testimony with SA James H. Mortimer. Section Chief Roy H. Jevons participated in all of the conferences concerning Physics and Chemistry testimony and I was present during the discussions concerning documentary evidence and document testimony.

The gentlemen from the Attorney General's office in Memphis advised in detail the specific physical evidence that would be introduced at the trial and the expert testimony concerning this evidence as represented by Laboratory reports previously submitted and made available to the local prosecutor. They did not ask for any evidence but simply reviewed that which was available along with the pertinent testimony. Attached is a list setting forth the Laboratory number and description of each item of physical evidence of pertinence to the forthcoming trial.

They advised that additional evidence will be submitted in all probability. Included in such possible additional evidence will be letters which Ray has written to the Memphis Judge, to the Sheriff and local court officials in connection with his current incarceration. These letters may be useful as known

Memorandum to Mr. Conrad

Re: MURKIN

standards in connection with document testimony and may simplify the problem of authenticating known writing. In this particular connection, at their request, we will prepare a report directed to the local prosecutor setting forth results of our follow-up examinations and comparisons. They also anticipate submitting clothing which was found in Ray's suitcase at the time he was arrested for purpose of comparing certain brown sewing thread with thread discovered on clothing found in a canvas bag recovered at the scene of the shooting.

RECOMMENDATION: None. For information.
