FROM : Mr. I. W. Conrad

SUBJECT: MARTIN LUTHER KING, JR.

DATE: 4/5/68

Representatives of the Laboratory met the Memphis Agent at Dulles Airport at 3:55 a. m. this morning and brought the evidence immediately to the Laboratory where processing of the material was begun immediately by Laboratory experts and Latent Fingerprint experts. Over 60 different items of evidence were sent by Memphis, including the bullet removed from the body of King, the suspected rifle, and a variety of miscellaneous items.

As a result of examinations thus far, two latent fingerprints of value have been developed on the gun and a palm print of value appears on the carton in which the gun reportedly was found. The latent fingerprint examiners advised that the two latent fingerprints on the gun are not identical with the prints of suspect John Hubbard Willard, FBI #934,454C. No palm prints of Willard are available at this time.

Among the items of evidence were a pair of binoculars and a cardboard carton for these binoculars. The carton bore the inked price notation \$41.55. Also included was a cash register receipt from the York Arms Company, Memphis, in the amount \$41.55 dated April 4, which would appear to indicate that the binoculars were purchased on the day of the assassination.

Serial numbers which may be capable of tracing appear on the rifle, on the telescopic sight mounted on the rifle and on the cardboard carton in which the rifle reportedly was found, as well as on the binoculars. Representatives of the General Investigative Division have inspected the evidence and are being furnished information as it is developed.

Examination of the remaining items is proceeding expeditiously and you will be advised as information is developed.

SUBJECT: MURKIN (44-38861)

DATE: 4/8/68

In connection with above case, the murder of Martin Luther King, it was necessary to call in employees from the Photographic Unit on Saturday and Sunday, April 6 and 7, 1968, to photograph evidence received from Memphis and Birmingham relative to captioned matter.

The General Investigative Division requested that all evidence received in this case be photographed in color and that prints be expeditiously furnished for investigative purposes. Photographers Phillip D. Oyler, Jr. and Loran W. Dishman made the necessary exposures of the evidence and the exposed film was then given to Hinton G. Clabaugh, Photographer (Laboratory); Harry G. Bowers, Photographer (Laboratory) for processing and printing.

Sixteen negatives were made over this weekend and numerous prints of each negative were disseminated to the field. The employees enumerated above worked a total of 44 hours and 15 minutes. The comments received from the General Investigative Division were that these were prints of extremely high quality and they feel that some of the evidence photographed will aid materially in the apprehension of the subject of this case.

## RECOMMENDATION:

In view of the ability and devotion displayed by employees Hinton G. Clabaugh, Harry G. Bowers, Phillip D. Oyler, Jr. and Loran W. Dishman that they be given letters of commendation for their efforts over this past weekend.
