Mr. WOOD advised he left work at approximately 5:00 p.m., on April 4, 1968, and walked alone to Jim's Grill, located at 418 South Main Street, Memphis. He said he walked down Huling Street to South Main and crossed South Main diagonally toward Jim's Grill. He said he would estimate it was approximately 5:05 p.m., when he walked in front of a Mustang automobile which was parked close to Jim's Grill. He explained there is a fire plug on the east side of South Main Street very close to the entrance of Jim's Grill. He stated immediately to the north of the fire plug was parked a white Cadillac that is owned by the owner of Jim's Grill. He said immediately in front of this Cadillac, which would be the second space north of the fire plug, was parked a Mustang. He stated he is familiar with Mustangs and knows this was a Mustang automobile. He said he felt that this was a white car that appeared to be dirty and not recently washed. He said this car did not have hubcaps, had black tires, but he did not notice the interior of the car. He said he did not look at the license, but glanced down and there was no front license plate. He said also he noticed in the window there was no city of Memphis sticker in this window. He said he does not recall that anything else was hanging from hangers or the rear view mirror of this car.

Mr. WOOD stated he entered Jim's Grill and began playing shuffle board and pinball machine located inside the grill. WOOD explained the shuffle board is located in the northwest corner of this building and that it is close to the front window of Jim's Grill. He stated, however, he was interested in playing shuffle board and the pinball machine and did not look out the window while he was playing either machine. He added, however, it is possible he may have looked out the window, but stated he does not recall seeing any activity in the street nor did he see anyone in the Mustang or drive away in the Mustang.

because of the massive defect in the wound and no respiration a tracheotomy was started. Dr. Barrasso came in at 6:22 p.m. and completed the tracheotomy and a cuffed endotracheal tube was inserted. Assisted respiration was then carried out on this patient. Following the re-establishment of an airway on this patient, the heart was again auscultated and very little tone could be heard. An EKG was immediately ordered by Dr. Galyon and Dr. Barrasso and the strip showed very poor to no function. Intracardiac Adrenalin was immediately injected and closed chest cardiac massage begun.

"In the meantime, exploration of the neck was carried out by Drs. Barrasso and Galyon who found that the jugular vein on the right was severed. A large artery, which was felt to be probably subclavian, was shredded and sticking up into the wound with very little bleeding at this time. In addition, there was much bubbling and a portion of the right apex of the lung was bulging through the wound.

"On further exploration a defect in the vertebral bodies of C7 to T2 was present with complete loss of spinal cord substance. Dr. Fred Gioia was then called to confirm this diagnosis and attempts to secure closure of the chest cavity by packing and clamping of the vessels was done. A right closed thoracotomy tube was inserted in an attempt to drain the blood from the right chest and re-expand the lung. Immediately on insertion of the tube 1000 cc. of blood was obtained from the right chest cavity. At the time Dr. Gioia confirmed the diagnosis of loss of spinal cord substance. This patient's pupils were massively dilated with no reaction.

"Dr. Joe Wilhite, a chest surgeon, was also called in attendance and consultation. Dr. Julian Fleming came to the Emergency room at our request and an EKG strip was done which showed no function. The cardiac massage was continued with all resuscitative efforts being continued for approximately 50 minutes, during which time we had had no response of any kind of vital signs and patient was pronounced dead at 7:05 p.m. by Dr. Barrasso.

"Post mortem X-rays of cervical area were done.

"Final presumptive diagnosis:

Gunshot wound of right side of face and neck with compound fracture rt. mandible, severance of right jugular vein and probable severance right subclavian artery, defect right pleural apex with hemopneumothorax, defect in C7 - T2 vertebral bodies on right with loss of spinal cord substance."

NEW ORLEANS, LOUISIANA,  
FOR THE PERIOD  
JANUARY 1964 - AUGUST 1965

## FEDERAL BUREAU OF INVESTIGATION

1

Date 4/20/68

CHARLIE HARTZELL, Manager, Dance Club International, 3355 Poplar Avenue, Memphis, furnished the following information:

He stated that he managed the Continental Dance Studio, New Orleans, Louisiana, owned by MARLIN MEYERS, from January, 1964, through August, 1965. He advised that he knew all students who attended Continental Dance Studio during his tenure, and stated he did not recall anyone by the name of ERIC STARVO GALT, HARVEY LOWMEYER, or JOHN WILLARD attending his school at New Orleans.

He advised that his job was to collect weekly payments of students enrolled in dance courses, and advised he felt sure that if GALT did attend any classes at New Orleans, he would certainly recall his name.

He stated that MARLIN MEYERS had numerous photos of students taken at each weekly function and if GALT did attend the studio, MEYERS would most likely have a picture of GALT at the dance studio in New Orleans.

HARTZELL advised that Continental Dance Studio carried its own notes and did not discount or sell the papers to another agency. In view of this he stated if GALT did attend dance lessons at New Orleans, MEYERS should have a copy of his contract.

HARTZELL stated that the following individuals were dance instructors at the Continental Dance Studio during his tenure there:

FRANK DE SIMONE,  
1242 Elysian Fields,  
New Orleans, Louisiana;

CORBET DUKON  
Address Unknown;

Results of examination:

FIREARMS - TOOLMARKS EXAMINATIONS

The serial number on the black rifle box, Q1, was determined to be 4744Z5. This box originally contained a .243 Winchester caliber Browning rifle.

The Q3 cartridge case was identified as having been fired in the Q2 rifle. The only marks found on Q3, other than marks made during manufacturing procedures, were one extractor mark which was identified as having been made by the extractor of the Q2 rifle and the marks left on Q3 by the Q2 rifle when Q3 was fired.

The bullet, Q64, from the victim, is a .30 caliber metal-jacketed "soft-point" sporting type bullet of Remington-Peters manufacture which was fired from a barrel rifled with six lands and grooves, right twist. Based on the physical characteristics of the general rifling impressions, the Q64 bullet could have been fired from the Remington rifle, Q2. The Q64 bullet has been distorted due to mutilation and insufficient marks of value for identification remain on this bullet. Therefore, it was not possible to determine whether or not Q64 was fired from the Q2 rifle.

The Q64 bullet is identical in all remaining observable physical characteristics to the 150 grain bullets in the five loaded .30-06 Springfield caliber Remington-Peters cartridges, Q4 through Q8.

Based on physical characteristics, specimen Q64 and the cartridge case, Q3, could originally have been portions of the same cartridge, which would be the same as the Q4 through Q8 cartridges. No marks are present on Q64 of the type which would permit determining positively whether or not the Q64 bullet was originally a portion of the cartridge represented by Q3.

The five cartridges, Q4 through Q8, conform in description to the type of cartridges packaged by the manufacturer in the Peters cartridge box in which they were submitted. Because of the manner in which cartridges are boxed at the factory, it is not possible to determine whether or not the cartridge represented by Q3 or any of the

Q4 through Q8 cartridges were packaged in the same box by the manufacturer.

The Peters cartridge box in which Q4 through Q8, were submitted also contained four U. S. Military cartridges, containing full-metal jacketed 150 grain bullets, different from Q64. The manufacturer's headstamp on these cartridges is "R A 55." The "R A" indicates that these cartridges were manufactured by Remington Arms Company, Incorporated, Bridgeport, Connecticut. Cartridges bearing "55" are those normally manufactured in 1955.

Examination of the four cartridges, Q9 through Q12, revealed no marks indicating these cartridges had ever been loaded into a weapon. The only marks on these cartridges appear to be marks produced by the manufacturer's machines and marks of the type produced by metal-link ammunition belts of the type used with machine guns. The link belt marks on Q9 through Q12 are suitable for comparison with the metal links from which the cartridges were withdrawn. In metal-link belts, each cartridge serves to hold adjacent links together. As each cartridge is withdrawn, a link (which is expendable) separates from the rest of the belt.

No aluminum, screen-type scratches, paint, wood or other foreign material was found on the muzzle or side of the barrel of the Q2 rifle.

No record was located in the National Stolen Property Index or the National Crime Information Center for a Browning rifle, Serial Number 4744Z5, as originally contained in Q1; for the Q2 rifle; for a Redfield 2X-7X variable telescope sight, Serial Number A17350 (which is mounted on Q2), or for the Bushnell binocular, Q14, Serial Number DQ408664.

No serial number which would facilitate tracing was found on the Weaver telescope sight mount and base on Q2. The screws used to secure the sight tube to the mount were "finger" tight. No tool was required to loosen them and no toolmarks of value for comparison are present.

Page 6  
PC-A5498 BX

(continued on next page)

The magnification setting of the telescope sight tube was "6 $\frac{1}{2}$ x" when the Q2 rifle was received. Therefore, objects viewed would be enlarged to approximately 6 $\frac{1}{2}$  times normal size.

#### HAIR EXAMINATION

Numerous brown head hairs of Caucasian origin were found on or in specimens Q13, Q15, Q26, Q29, Q30 and Q38. Numerous dark brown to black beard fragments of Caucasian origin were removed from the Q24 and Q46 razors. All of these hairs and beard fragments have been mounted on glass slides for comparisons with any suspects you may develop.

No Negroid hairs were found on or in any of the above-listed evidence.

#### FIBER EXAMINATION

Brown cotton fibers, green cotton fibers and lustrous green viscose fibers like those composing the Q13 bedspread were found on the Q2 rifle and in the debris removed from the Q1 box. These fibers could have originated from Q13.

#### MISCELLANEOUS EXAMINATIONS

Specimen Q1 is a black cardboard box measuring 6  $\frac{3}{4}$ " x 2 $\frac{1}{2}$ " x 44 $\frac{1}{4}$ ". Printing on the box indicates it contained a Browning Mauser rifle, "SAFARI" grade. The number "130712" is printed on the end of the box and "4744Z5" has been hand printed on the same end.

Specimen Q13 is a large green and brown bedspread. It is composed of approximately 50% brown cotton, 25% green cotton and 25% lustrous green viscose fibers. It measures 106 $\frac{1}{4}$ " x 85 $\frac{1}{4}$ " and has a herringbone design. The ribs of the herringbone have a 40° angle and each rib is  $\frac{3}{4}$ " in width. No visible, invisible or manufacturer's markings were found on Q13. It exhibits above-average wear and is of the type sometimes found in hotels or motels.

The Bushnell Q14 binocular was manufactured in Japan. Bushnell binoculars are distributed by Bushnell and Company, Incorporated, 639 Bushnell Building, Pasadena, California. Specimen Q14 bears number "DQ408664." A paper

label on the center post indicates Q14 was passed by the "Japan Telescopes Inspection Institute."

The Q15 zipper bag measures 15" x 20" x 5 1/4" and is an inexpensive bag of Japanese manufacture. The bag is a "Tel-Star" model that retails for about six to seven dollars. This model bag comes in six different sizes, 16", 18", 20", 22", 24" and 26". The importer or jobber for "Tel-Star" luggage is the United Products Corporation, 2500 Genessee, Kansas City, Missouri 64141.

The Q16 duck-bill pliers are 7 3/4" in length and the jaws are 1 3/8" long. A price tag on one handle bears "ROMPAGE HARDWARE \$1.98." Just above the word "Rompag" are three characters printed in blue. Two characters on the left appear to be "10." The single character on the right appears to be "O." No other data was noted on the label.

Also in Q16 is a small tack hammer with a metal head 4 1/8" long. Imprinted on the wooden handle is "MAGNETIC". The handle is painted white with a blue band around the end of the handle. The U. S. Patent Office has no record of the trademark on this hammer.

The Q17 metal "BAND-AID" box contains twenty-one regular adhesive bandages and ten "JUNIOR" adhesive bandages. The number of bandages in the box agrees with the count printed on the box. A small round price tag on top of Q17 has the numerals ".57."

Nothing of significance was noted concerning the partial role of toilet paper, Q21.

Specimen Q22 is a black binocular case for a Bushnell binocular. Inside Q22 was found an instruction booklet, lens cloth and guarantee card.

Specimen Q23 is a cardboard box for a Bushnell binocular. A price tag on Q23 has the numerals "11-67" and "\$39.95" printed on it. Also on this box was hand printed:

"3995  
160  
4155"

Specimen Q24 is a travel kit manufactured by Gillette. It is clear plastic and contains the following:

- 1 - Safety razor with double-edge blade
- 2 - Package of "Gillette" stainless steel double-edge blades
- 3 - 1.3 ounce can of "foamy" shaving cream
- 4 - 1 ounce can "RIGHT GUARD" deodorant
- 5 -  $\frac{1}{2}$  ounce bottle "Sun Up" after shave lotion
- 6 -  $\frac{3}{8}$  ounce tube "HEADS UP" hair dressing

A price tag on the top of Q24 has the following printed on it: "OLIVER REXALL," "WHITEHAVEN PHONE 397-2301," "\$1.89," "E" and "00."

The Q25 gray paper bag has the name and address of the "YORK ARMS CO." of Memphis printed on it. Inside this bag was found a cash register receipt dated "APR 4" in the amount of "\$041.55 CBH." The numerals "083" also appear on the receipt.

The Q26 white and yellow checkered towel is 26" x 15". No labels or visible or invisible markings were found on Q26.

Specimen Q27 is an inexpensive common man's handkerchief measuring  $14\frac{1}{2}$ " x 15". No labels or markings were found on Q27.

Specimen Q28 is a partial tube of "Colgate" toothpaste, 3.25 ounce size.

The Q29 and Q30 socks are a pair of black knee length synthetic stretch socks. No markings or labels were found on these socks.

The Q31 can of "RIGHT GUARD" deodorant is a 7 ounce size. "M313" is printed in black on the bottom of the can.

Specimen Q32 is a Channel Master radio receiver. A label affixed to the inside of the rear cover indicates that the receiver is Model 6502, 6 transistor, super hetrodyne, with a frequency range of 535-1605 Kc/s and operates

on a 9-volt battery supply. The words "CHANNEL MASTER CORP." are imprinted on the bottom of the label. The words "HONG KONG" are molded on the outside of the light-colored plastic cover; however, some components are marked "JAPAN." A 9-volt Eveready battery, #216, was connected inside the case. The front of the case is made of polished or plated metal and is stamped "6 TRANSISTOR CHANNEL MASTER." The remainder of the case, about one-third down each side, is maroon-colored plastic. The case measures approximately 4" x 2 3/8" x 1 1/4".

Radio products bearing the Channel Master name are very common.

When received, the dial indicated approximately "10" and was turned to approximately 1020 Kc/s. The tuning range of the receiver is approximately 530 Kc/s to 1660 Kc/s, which covers the regular broadcast band. The receiver was operational when received.

The Q32 radio bears scratches on one end interpreted to read "00416."

The Q33 plastic "BUFFERIN" bottle is a 60-tablet size and contained 10 whole tablets and 2 partial tablets, all bearing the letter "B."

Specimen Q49 is a small bar of "Cashmere Bouquet" soap, a product of Colgate-Palmolive Company, New York. A shield with "Member Friendship Inns" has been printed on the wrapper.

The Q50 and Q51 bobby pins are light brown colored, common pins.

Specimens Q52 and Q53 are full cans of Schlitz beer. "MISSISSIPPI TAX PAID 4 CENTS" has been printed in black on the bottom of each can. "03" has been stamped into the  
158"

metal in the bottom of each can. Both cans are alike. These cans were found attached to the Q54 carrying device in the Q55 paper bag.

Nothing of apparent significance was noted about the 4" x 6" brown paper Q56 bag.

The Q57 key fits the lock on the Q15 zipper bag and probably belongs to this bag.

Specimen Q58 is a common, round, used toothpick.

The metal split ring, Q59, has overlapping ends. It appears to be the type of ring that new keys are attached to.

Nothing of significance was noted about the Q60 and Q61 coat hangers.

Specimen Q62 is a two-link portion of an "ADJUST-O" silver-colored watchband. The links may be compared with the watchband should same be recovered.

#### SOIL EXAMINATION

Fine smears and deposits of brown silty soil having the appearance of being deposited while wet were found on Q13. The soil in these smears and deposits is suitable for comparison purposes. The specific origin of the soil cannot be determined by a Laboratory examination.

#### DOCUMENT EXAMINATION

Specimens Q18, Q19, Q20, Q23, Q25, Q55 and Q56 were examined for writings and pertinent indented impressions, but nothing of significance was noted.

The Q55 bag is imprinted "HOMESTEAD" "STUBBY." Information available in the Laboratory shows that the "HOMESTEAD" brand name is registered to the Graham Paper Company, 1014 Spruce Street, St. Louis, Missouri 63102, while "STUBBY" refers to the type of bag.

Q69 Undershorts  
Q70 T shirt  
Q71 Board from windowsill in bathroom

## Results of examination:

The undershorts and the T shirt each bears a laundry tag with what appears to be the characters "02B-6." Only a portion of the first character is present on each tag. The Laboratory does not maintain a file of visible laundry marks. No invisible laundry marks were found on the undershorts or T shirt.

The pair of undershorts is small in size while the T shirt is large.

The pair of undershorts does not have a brand label. The T shirt has a "JOCKEY" brand label.

The T shirt label is held flat with a folded piece of 3/4" wide cellophane tape. The piece of tape is about 1" long. One end has been cut, and the other end has been torn.

The crotch seams of the undershorts have been repaired in two places with brown thread. The repaired areas are hand stitched.

No hairs were found on the undershorts or T shirt.

The Q71 board bears a recent dent which could have been produced by a light blow from the muzzle of a weapon such as the Remington rifle, Serial Number 461476

97

previously submitted in this case. The dent contains microscopic marks of the type which could be produced by the side of the barrel at the muzzle but insufficient marks for identification were left on the board due to the physical nature of the wood. The microscopic marks present are different from the type which would be produced by the duck-bill pliers or tack hammer which were in the blue zipper bag previously submitted. No other marks were found on the board.

No gunpowder or gunpowder residues were found on the Q71 board.

No wood, paint, aluminum or other foreign material was found on the rifle barrel nor were any significant marks found on the rifle barrel.

CLOTHING FROM MARTIN LUTHER KING, JR.

Q76 Shirt  
Q77 Necktie  
Q78 Suit coat  
Q79 Trousers  
Q80-Q81 Pair of socks  
Q82 Undershorts  
Q83 Undershirt  
Q84-Q85 Pair of shoes

Results of examination:

There is a large hole in the right front portion of the collar of the Q76 shirt. The Q77 necktie has been forcibly torn apart in the right front neck portion also. The object or objects causing the damage were larger than a bullet of .30 caliber size and irregular in shape as all of the yarns were broken, not cut. One or more segments of bone could not be eliminated as the cause of the damage.

The right lapel of the Q78 coat has three damaged areas on the surface of the fabric. These areas have been torn by some object or objects, but the damage does not extend through the lapel. The torn areas vary from  $\frac{1}{4}$ " to 1" in length and the condition of the yarn indicates the object or objects struck the coat from above and probably glanced off the coat.

Due to the sizes and ragged edges of the damaged areas of the Q76 shirt, Q77 necktie and Q78 suit coat, it was not possible to recognize any bullet holes or to

determine from visual examination whether or not a bullet or any bullet fragments had passed through or struck these items.

No bullet holes were found in Q79 through Q85.

The edges of the hole torn in the Q76 shirt collar, the edges of the three tears on the collar of the Q78 suit coat and the material near the ends of the Q77 necktie were contaminated with traces of lead which could have come from a bullet or from bullet fragments. The lead contamination of these items could not be associated with a particular bullet or lead source.
