psychiatrists give drugs to our sick patients but we do not get nutrients & added help such as vitamins & thiamine. Many nervously ill patients need extra help with fortified yeast & minerals which National Assistance rates do not allow us to ^{buy} ~~buy~~. I do think more thought should be given by all Doctors as to whether a patient diet is correct & sufficient. Truly our doctors need re-education to take them from the Communist backed plan in training them to hand out, willy nilly millions of pounds worth of synthetic drugs with harmful side effects. I am willing to elaborate on this nutrients theory; if you ask me.

People are bored & I think that if mass

10th April, 1968.

Dear Robert,

I want say at first that I loved your late brother very much, more than his wife ever could or did, she just is not capable of any deep emotion since she has not the innate breeding which comes from a long line of people, she has glass and flash but nothing inwardly to sustain these outward glosses. Still you seem to prefer to spend time and money on her rather than on one who is of much more use in the world. I deplore your attitude towards me and am deeply hurt that you consult psychiatrists and turn my letters over to them, I do think that you should have been able to read them your self albeit we speak English differently. I regret that I have not had the respect and affection from your family that I deserve. I do wish too that you would call off any watch dogs interfering in my letters. You must know by now that most of what I say is intrinsically true and that I can help turn the tide of Communist subversive activity in this Country.

I was very upset that the Labour Party got in and we would have to work hard to turn Mr Wilsons trends to the technological futuristic world that he is being urged to perigrate on us. I can only think that if President Johnson help us financially then he can tell Mr Wilson when he is going too much towards the left. You may know that I believe that the Russians intend to take us over within fifteen years say so, this is not madness on my part, why all this emphasis upon the young ones? It is they who are being brainwashed to a certain standard of life.

The lot is basically in our Training Colleges, N.E. Teachers Schools at Birmingham, Police Training School at Hendon B.M.A. Medical Training Schools. I can see all which is wrong in their approach to us the long suffering public. It will take many letters for me to explain the ins and outs of this training and its applied psychology.

My main concern in this letter is about food, as you may guess, in my opinion, our food has been interfered with by the Jews and this is part of the plan to bring us low.

For a start I suggest that we abolish all improvers in bread as our bread is poisonous containing impurities and agents.

I think bread should be whole meal or whole wheat. It may even be responsible for mass mental deterioration!

I satisfy the ~~can~~ Law. —

I suspect all small chickens in plastic bags as containing cancerous hormones with resultant inferior eggs. "Walls" sausages etc contain preservatives & I deplore preservatives in food. All food eats quickly & should be eaten fresh, it is wrong to preserve the life of foods, merely for shelf keeping purposes. I think the Food & Drugs Act people must be asleep, we soon will all be.

poor, undernourished & denervolized

plots & allotments were made available to us all then we could lose freedom, impair our health & grow compost soil vegetables for our own use. All our vegetables & fruit farms are under subversive activity with chemical sprays & insecticides. The Lord above knows whether Russian agents have taken over many of our farms? my mind is very disturbed at our food & its deterioration.

Manufacturers get away with dying & perverting food under the guise of being clean & hygienic; actually the goodness is taken out of the food & then it is sold in hygienic wrappings to attract customers

ation Plea Aiken Says

cluded. In fact the war may just as well as the Viet Cong guerrillas of the North Vietnamese Communist forces, he declared.

At the height of the Vietnam crisis, Senate Democratic leader Mike Mansfield of Montana introduced a bill to "end . . . the war."

Two months ago, Sen. Aiken was leading critics of the conduct of the war, even though it was his party's policy to support it. John F. Kennedy, then Aiken faced escalation in the point of involving the United States in a war with Communist China, or even the Soviet Union, and possibly at the nuclear weapons level.

Today, he feels somewhat confident the fighting can be confined to its present geographical limits. When he returned from Vietnam last year, Sen. Aiken said in an interview today, there was "an open-ended possibility of war. Nobody knew where it might go. It might even go to a nuclear war. I was afraid that the pressures on the administration were such that they would extend the war into other countries. I suspect it."

Kennedy Dixie Trip: Story of Dimes

By Arthur J. Cass

TUNICA, Miss., March 26.—The first confrontation between Sen. Robert Kennedy, D., N.Y., and the students of Alabama and Mississippi might be called "The Story of Two Dimes."

One dime was used by Nicholas (Nick) Katzenbach, the justice attorney general, to telephone President John F. Kennedy from a pay station on the campus of the University of Mississippi after an elaborate military communications system broke down on the night of Sept. 2, 1962.

As a result of that call, the President ordered 14,000 federal troops and National Guardsmen to the Ole Miss campus before dawn to quell a bloody confrontation riot precipitated by the entrance of the first Negro student, James Meredith.

Sen. Kennedy, then attorney general, was at the brother's side in the White House cabinet room while the son in the Oxford room was laid out on a table. By morning, the son was dead and
