February 26, 1976

SG11

Enclosed is a draft copy of an unsolicited proposal for carrying out a one-month EEG effort with F.P. The projected cost is less than \$10K--it could go for \$8K, depending on how much we want to do.

This is intended to constitute a straightforward study of subliminal detection of a distant EM source, physiologically registered.

Should this appear to be an appropriate vehicle for accomplishing something in a non-controversial area, please make any necessary changes or suggestions and we will submit it through channels.

With best regards,

H.E. Puthoff PhD
