**MEMORANDUM FOR THE RECORD**

**SUBJECT: Preparation for the SRI Remote Viewing  
Experiment Arrangements with NPIC and NED**

1. While preparing for a remote viewing experiment of a Soviet nuclear facility with SRI, NPIC and NED were contacted to solicit support in evaluating the data. The following describes those contacts.

SG11

2. [redacted] of NPIC was briefed on the experiment. It was explained that I was requesting accurate coordinates of the Soviet nuclear test facility and a briefing on available photographic information. After this information was supplied, I requested [redacted] aid in scoring the accuracy of any task which might come from the experiment. Since this particular target is [redacted] responsibility he is quite knowledgeable and willing to do a minor amount (few days) work without any formal request but would need a formal request for support from the imagery analysis service for any more extensive work.

3. [redacted] OSI/NED were briefed on the upcoming experiment. It was requested that provided we obtained sufficient confirmatory physical data about the chosen target (with the help of NPIC), we need help in determining what are the most important question we could ask our subject about the site. For purposes of discussion they were to assume access to a "janitor" who was technically unskilled but had free physical access. [redacted] express considerable doubt this technique would be useful but promised a minimal amount of support to provide questions and evaluate answers. [redacted] maintains a healthy skepticism and is reluctant to dissipate man hours on low probability projects. I think his approach will assure a thorough review and assessment of any data.
