

IAFM-OPS-HU-SA

29 April 1980

MEMORANDUM FOR THE RECORD

SG1A

SUBJECT: Assessment of Unconfirmed Information Pertinent [REDACTED]

SG1A

1. (U) The following information applies:

a. (S) Source reports a heavy thick walled cement type of building located on the edge of gulley, on the side of a very craggy mountain.

b. (S) He reported that at the base of this precipice is a large rectangular black hole or entrance way. Further out from this opening is a body of water, salt water.

c. (S) Source states that while the entrance is above the water line, the interior of the opening extends below the water line.

d. (S) Construction is reported as fairly primitive, with some attempt at smoothing out the ceiling and installation of numerous lighting fixtures.

e. (S) The interior is described as looking very much like a dry dock by the subject source. He stated that it appeared large enough to handle approximately three or four large ships.

f. (S) Source also stated that the interior appeared to be flooded with water.

2. (S) Request the above information be evaluated and comments be provided to the undersigned no later than 14 May 1980, this will permit an evaluation of the source for accuracy and information value provided.
