

Session CCC 25 0900 18 Mar 80

SG1A

① V standing under a whole
interconnecting meshwork of wire/piping or something

③ it's very tall
looks like curved wall behind him goes straight up
thin steel rods or wire

⑧ inverted pan shape - circular dish shape
upside down beveled center piece to it.

F. describe

F - go to 200' above target

down on a 'T' shaped bldg rock & R.
~~It~~ may not be bldg - but shape of T
like erector set
lot of concrete in under it on
smooth stone.
corner of something like a grid ④

② light
metal
bars

F Surrounding area

low hills sparse trees a complex in a
valley like with roads that just go to clefts of V and
leaf shaped valley ^{crop}

F desc. size of complex

very large 4 x 6 miles

F. what portion are you perceiving
I don't know - lot of input

F. Concentrate a while and do not report

footsteps

⑤

Looking down on a pattern
looks like tops of towers
a bunch - don't know what they are
there's a lot of them yes, but round not square
type bldg not a bldg - an obj.
seeing a cylindrical shape ~~that is a~~

⑥

to left of "T" shape
elongated tube or end - along revetment
then into ground

⑤

spillway like a thing that drums water
next to it.

F where in complex is spillway
right in center of valley

white snow
covered bldg
complex

target is long - coordinates are only a
part of it.

large expanse of white, like concrete
man made corridors running thru it

You could drive a vehicle on target
then there - that

"spillway" is like a place where some-
thing slumps out of pipe or something

F. focus on activity at target area

seeing some kinda
people wearing funny head ~~gear~~ thing - its made out of
something. rubber or

⑨

They're loading trucks

power
plant
vicinity

"either digging or covering - moving dirt
and loading trucks
scrubbing something down - cleaning up
something funny on their head"

power
plant
vicinity

F. focus on an alternate activity

people underneath tops of tower shapes

What time of day - late evening i.e. 1030-1100 PM

"Nestled" amongst surrounding mountains, it is located along one side of a significant mountain range.

The elongated "leaf" pattern and veining of sketch 3 does bear

some resemblance to the general proportions of the target installation

(which is surrounded by slag piles) and the proliferation of RR spurs within the installation. The target building, of course, is merely one portion of the overall installation as stated by #1.

and associated verbage
b. Sketch #2: contain strong gestalt similarity to an aerial perspective of target building, which is the only structure within the facility having both massive proportions and a shape correlation combining a short stem and lengthy horizontal perpendicular to form a "+" shape resembling this sketch.

c. Sketch #3 and associated verbage contain some gestalt resemblance to the overall target area. Although the target environs are not

d. Sketch #4 and associated

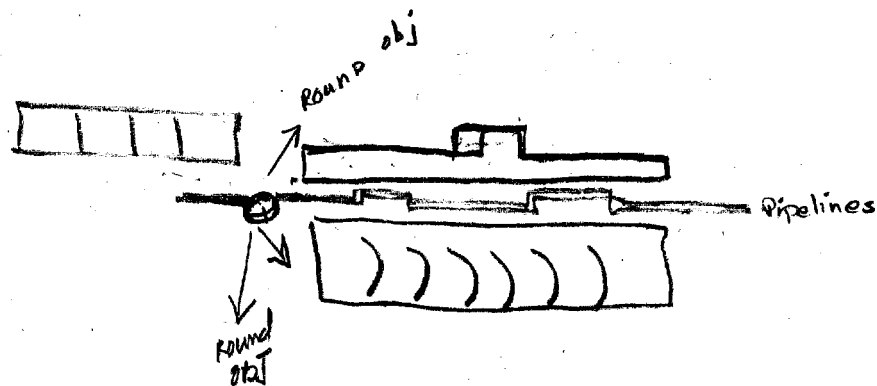

transcript : General correlation to
building construction style.

e. Sketch #5 and associated

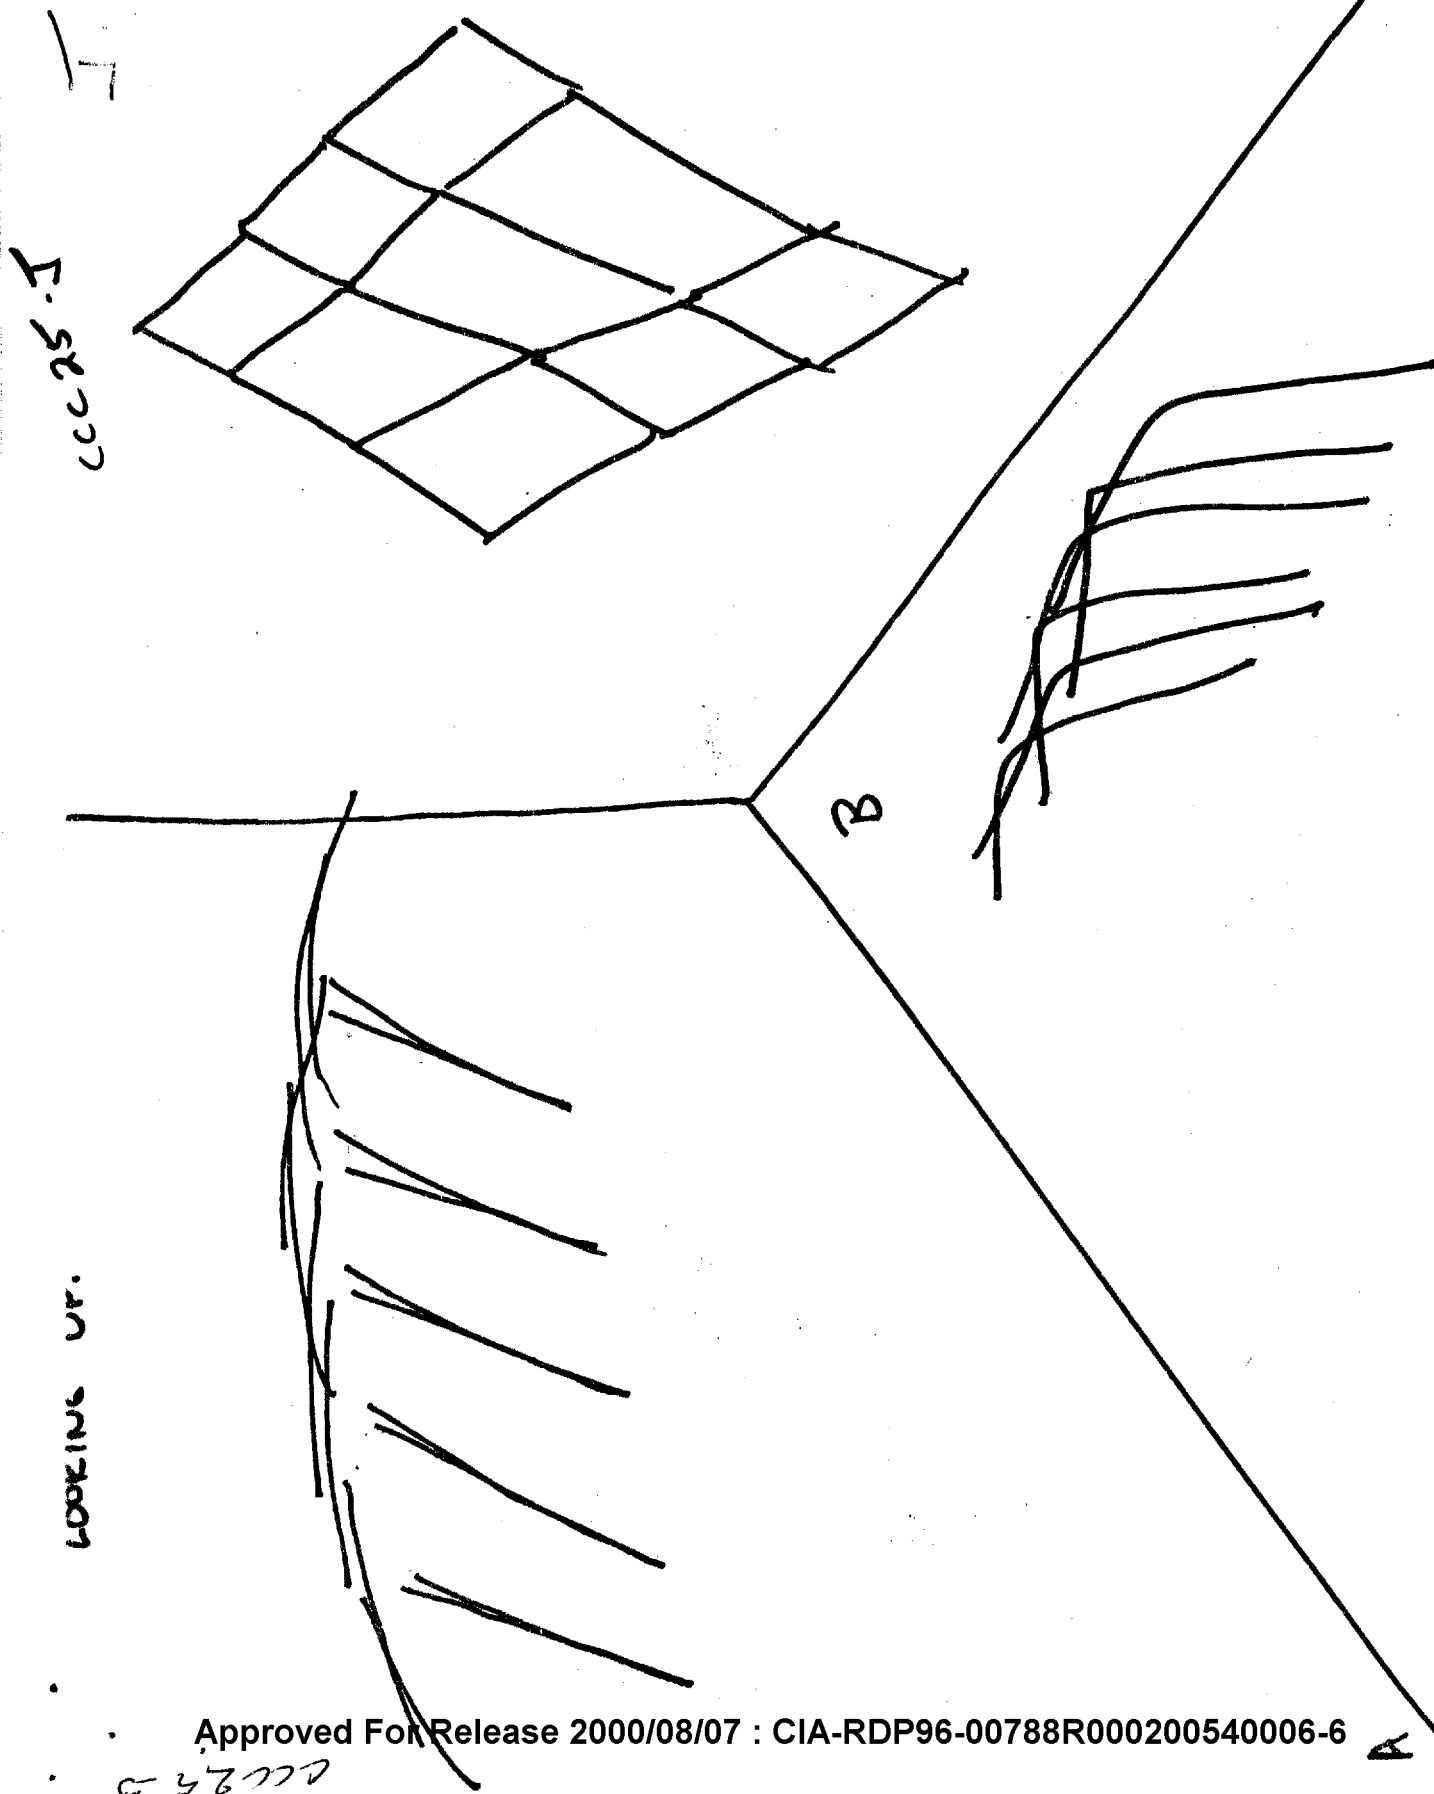

transcript : Imagery search required.
General correlation to ^{expected} building
structure

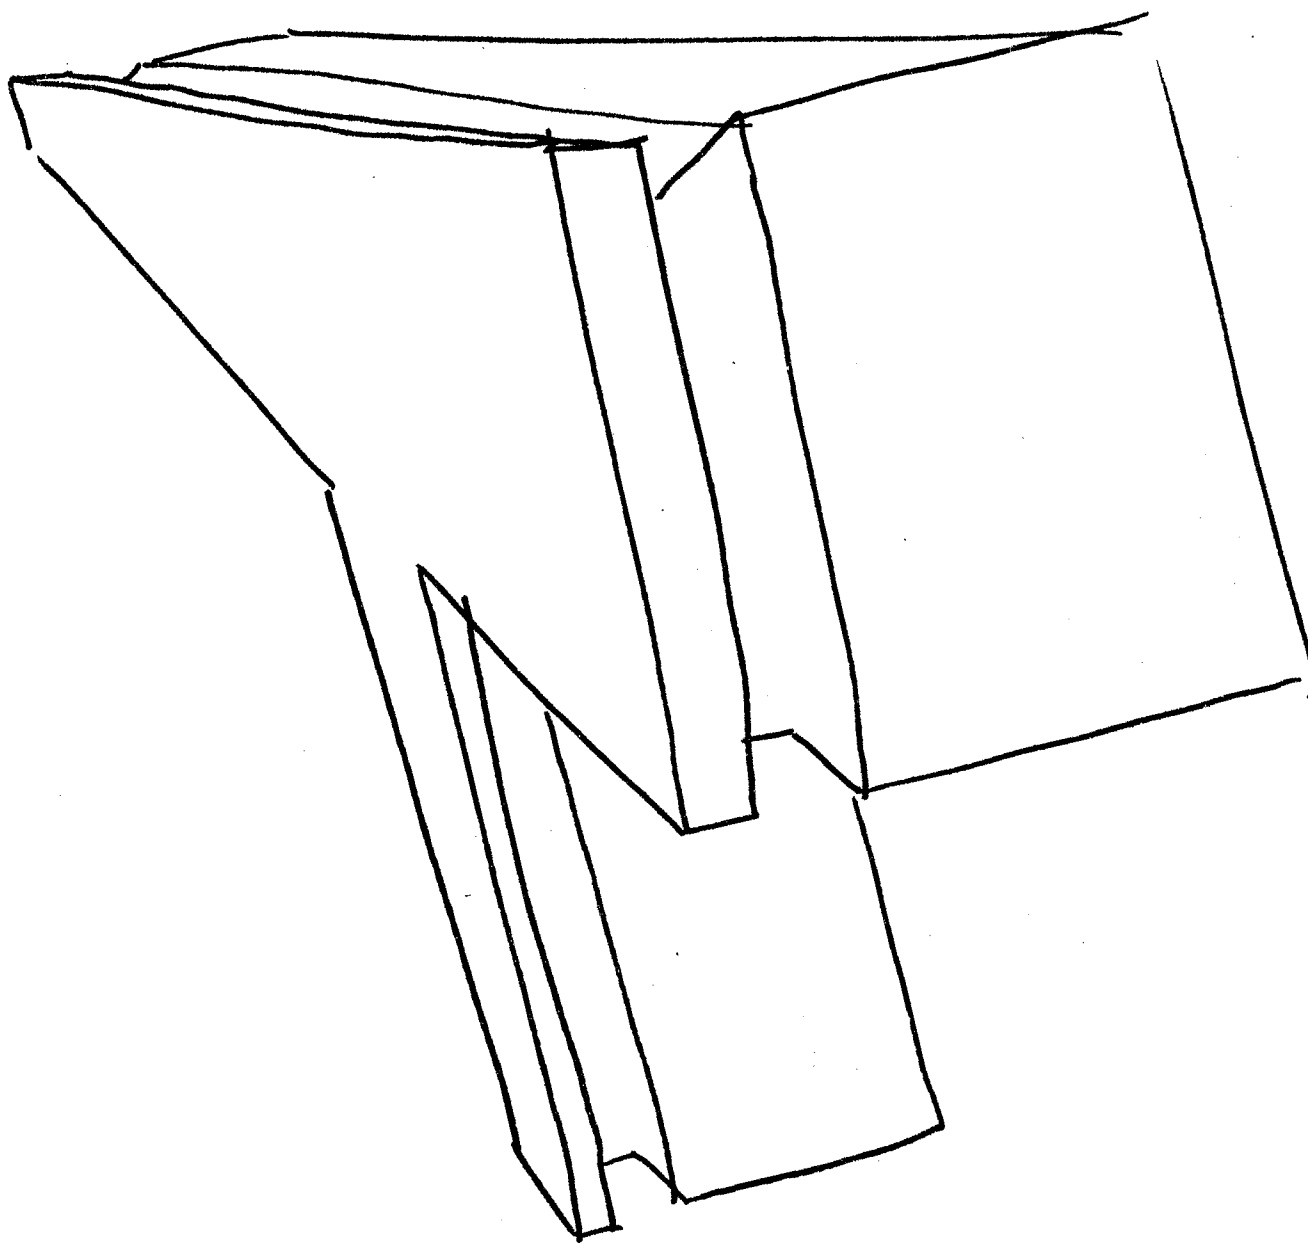

EXTRA NOTES - REVIEW OF CCCRS Tape on
20 MAR 80

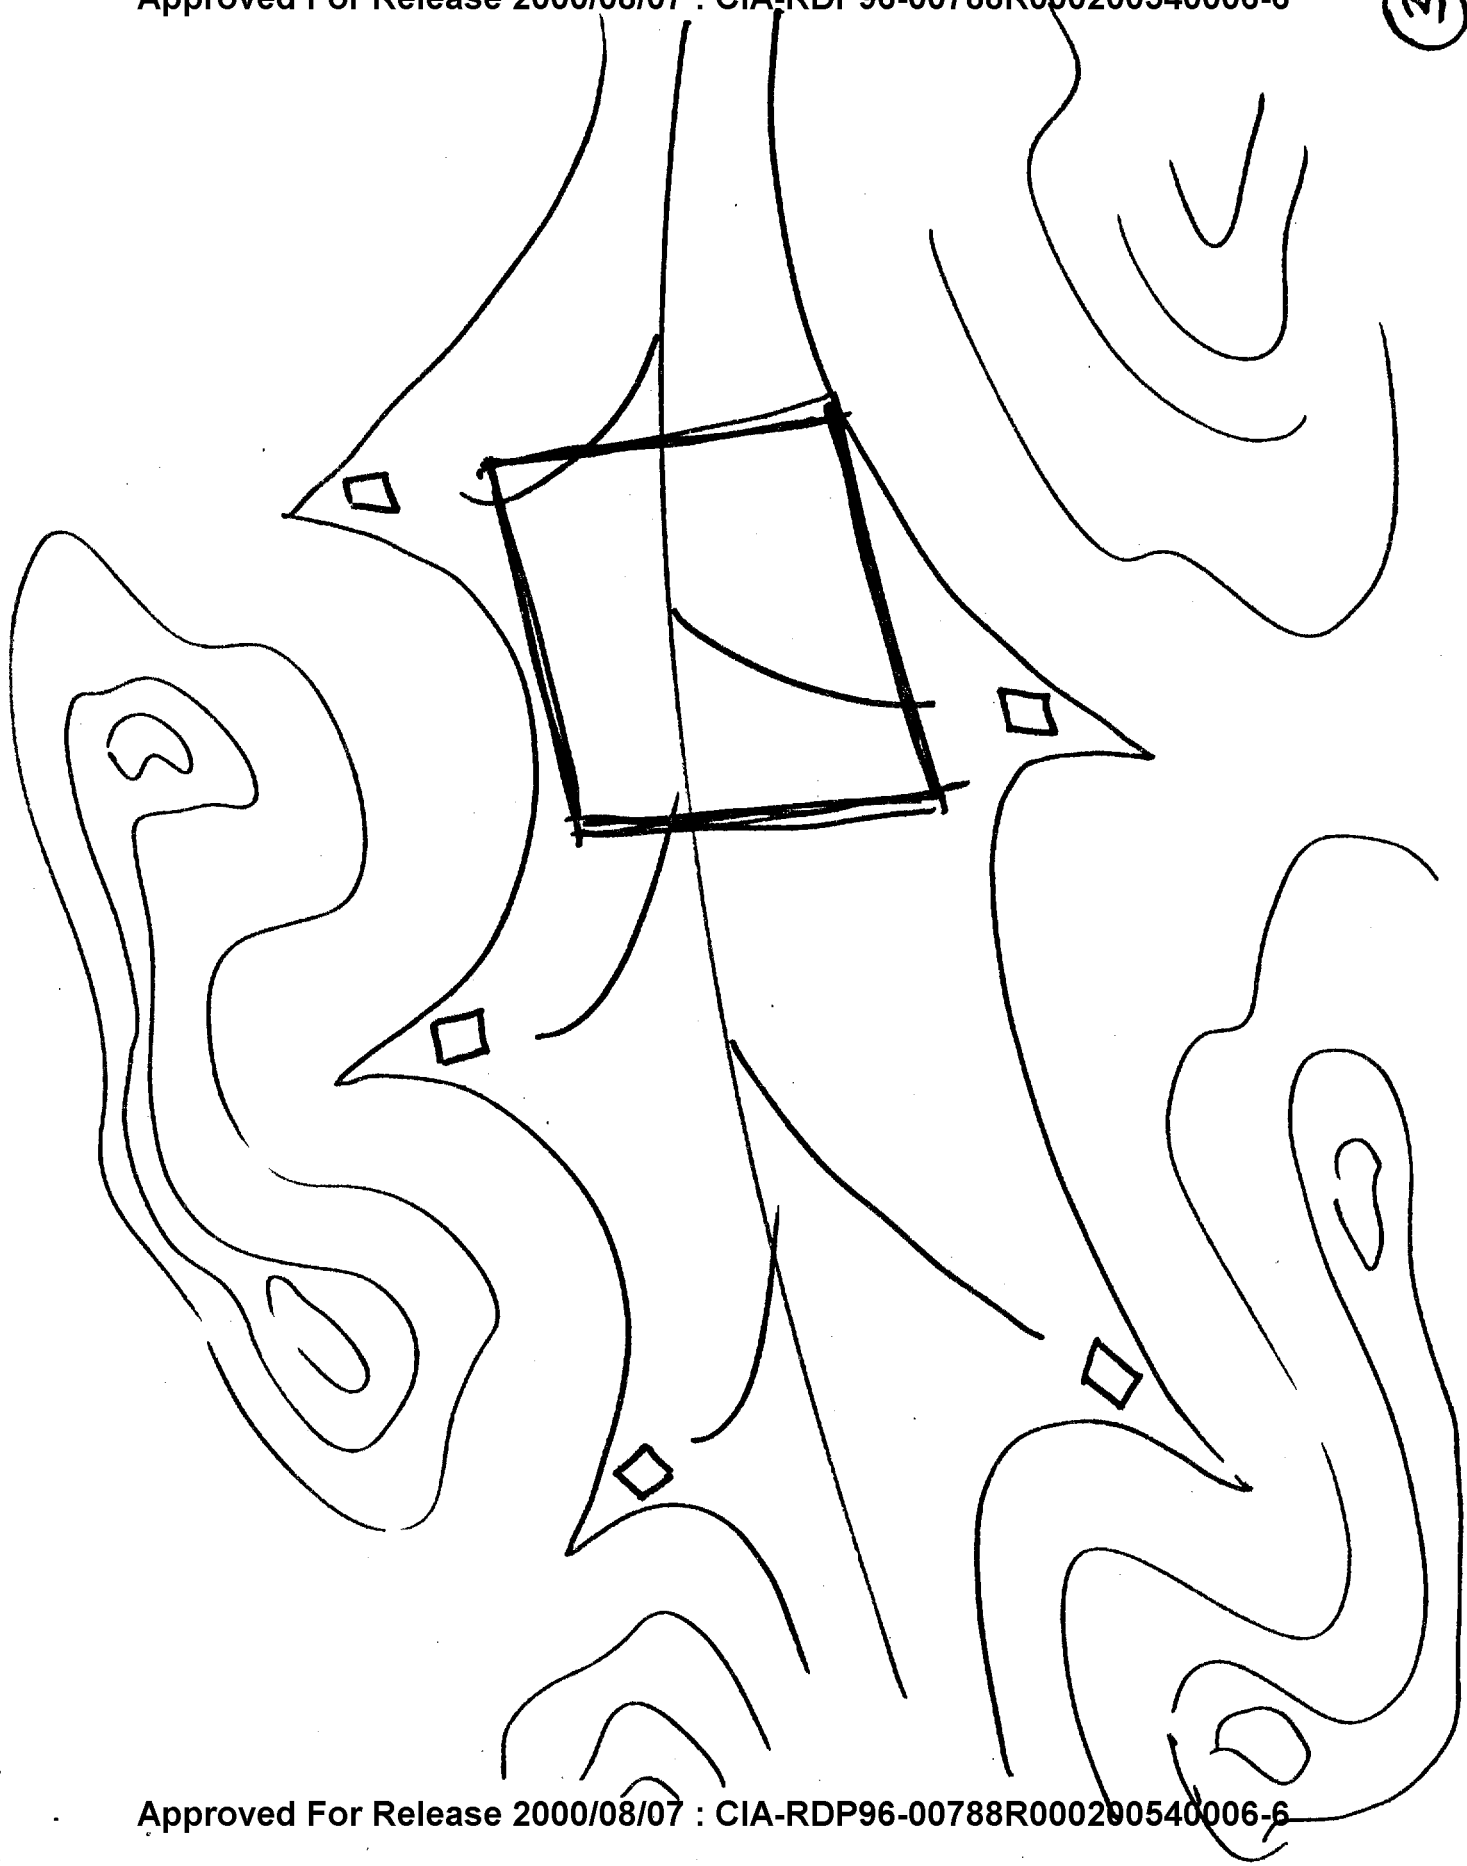

rods over head and behind me
the ground upside dish is to Left.
