19 May 1980

MEMORANDUM FOR THE RECORD

SG1A

SG1A

SUBJECT: Assessment of Unconfirmed Information Pertinent to [REDACTED]

TAC ASSESSMENT

1. (U) The following information applies:

a. (S) The first source reported a very large rectangular building at the above coordinates. This structure is located on a rise of ground which is not very high, but approached by a curved road leading up the rise. The building is reported to have blank walls with no windows. Collocated with the above building are five or six loaf shaped buildings very close together with peaked roofs, also having no windows, but with horizontal slot type openings at each end. Source stated that there is expected to be no activity occurring at the site approximately 0800 hours on 22 May 1980. He stated that the structures are not fully occupied because there were no people present, the hallways are empty, and very little activity.

VISIBLE DESCRIPTION OF SITE

VALID

b. (S) The second source reported a large cleared area (rocky and bleak looking) surrounded by a double apron chain link fence. In the center he reported a very small T-shaped building with a large pole next to it. He reported no windows in the building, and stated that it appeared the structure was constructed to hold and/or hide something. He described the general condition of the structure as looking like a construction job which had not been finished, although it still appeared fully operational. The Source stated that it was completely deserted, there was no on-going activity, there were no people present or apparent at the site.

*PLAUSIBLE
NO ACTY IS
ACCURATE*

2. (S) Request the above information be evaluated and comments be provided to the undersigned no later than 30 May 1980, this will permit an evaluation of the source(s) for accuracy and information value provided.
