MEMORANDUM FOR THE RECORD

SUBJECT: Unconfirmed Source Information, Provided for/and per-
taining to Area Coordinates: [REDACTED] (S)

SG1A

1. (U) The following information applies:

a. (S) The source described the coordinates as falling within a very large valley, surrounded with mountains.

b. (S) He reported a very large military exercise (maneuvers) and many bunkered facilities. The most predominant being a very large Command Post Center, well bunkered and permanently installed in the approximate center of the valley. He stated that he thought it was only utilized during the exercises, the rest of the time it would be empty.

c. (S) Source stated that he could see zig-zag trenches coming from the command post bunker installation, as well as anti-tank traps at the forward edge of the valley.

d. (S) Source reported seeing approximately 3 Regiments of troops and Armor at first, but later expanded this estimate to approximately 5 Regiments.

e. (S) He reported a rocket type launcher on a ridge line near the front of the valley, which was well bunkered and had underground munitions storage associated with it. He stated that he could clearly see three rockets which appeared to be very much like the Hawk type of rocket.

f. (S) Source reports that there are many temporary military positions within the valley and units are continually moving as in a full scale exercise or maneuver situation. All units are utilizing a lot of Armor.

2. (S) Request the above information be evaluated and comments be provided to the undersigned no later than 25 April 1980, this will permit a full evaluation of the source's information for accuracy and intelligence value.

MEMORANDUM FOR THE RECORD

SG1A

SG1A

SUBJECT: Unconfirmed Source Information, Provided for/and per-
taining to Area Coordinates: [REDACTED] (S)

1. (U) The following information applies:

a. (S) Source reports a very large underground complex in vicinity of the coordinates against which he was targeted. Source stated that the underground facility was located on the edge of a very large hill or mountain face, and associated with a sandy or light colored type of building structure directly over it.

b. (S) Source stated that the interior of the underground facility appears to be a combination of large room like areas which are roughly cut from stone (sort of a salt mine, or quarry type of room), with inter connecting corridors smooth walled and well lit.

c. (S) The primary use of this underground facility is reported as being for storage purposes. It was reported by the source that the facility is very modern, with high grade equipment, and that things are stored here in clean areas.

d. (S) Objects which are stored in the facility are reported as being cylindrical in shape, about the size of a coffee thermos, shaped like old type radio tubes. They have a liquid inside of them, and are striped around the bottom edge with a yellow color. These objects are stored laying on their sides on metal shelving. When transported, they are packed into cases (12 to 16 per case).

e. (S) Source states that activity when he was inside the area consisted of removing these cylinders from the shelves and taking them to another area in order to do "lot tests."

f. (S) In addition to the above, source stated that there was at least on observation room overlooking a corridor in the underground facility.

2. (S) Request the above information be evaluated and comments be provided
