D-46

~~SECRET/SENSITIVE~~

TARGET: 8031

VIEWERS: #11 and #10.5

SG1B

SG1B

SG1B

UTM Grid Reference [REDACTED] is the location of a major [REDACTED]. Thus neither one of the Viewers was close to a description of the activity taking place at this installation. Both Viewers indicated that it was a primitive area with a minimum of buildup of buildings and facilities and was in fact quite desolate. This is obviously not an accurate description of the activity taking place at this high-priority target. Viewer #11 did not locate the target geographically, and his description of it as being both mountainous and arid is a totally inaccurate description of the geographic area in question. In addition, his description of a boring operation is also totally incorrect.

SG1B

Viewer #10.5, while totally inaccurate in the description of the activity taking place at the target facility, did put it in a cold, mountainous area and indicated that it was similar to Siberia or Antarctica. In fact the target is located in [REDACTED]. However, there is nothing else in the Viewer's description of the target or the activity taking place that is an accurate reflection of the target installation.
