SUMMARY ANALYSIS

REMOTE VIEWING (RV) SESSION DC-02

1. (S) This report documents a remote viewing session conducted in compliance with a request for information on a target of interest to INSCOM ITAC CRD. The purpose of this session was to describe a designated target area and report activity during specific time windows, given only a geographic coordinate.
2. (S) The protocol used for this session is detailed in the document, Grill Flame Protocol, AMSAA Applied Remote Viewing Protocol (S), undated.
3. (S) Attached is a summary of the data presented by the remote viewer during the session. A complete transcript of the session is available upon request. At TAB A are drawings made by the remote viewer reference his impressions of the target site. At TAB B is targeting data provided the remote viewer. At TAB C is Control Analyst comments.
4. (S) The summary attached represents the salient points provided by the remote viewer and as such has not been subjected to any intermediate analysis, evaluation or collation. Interpretation and use of the information provided is the responsibility of the requestor.

TRANSCRIPT SUMMARY

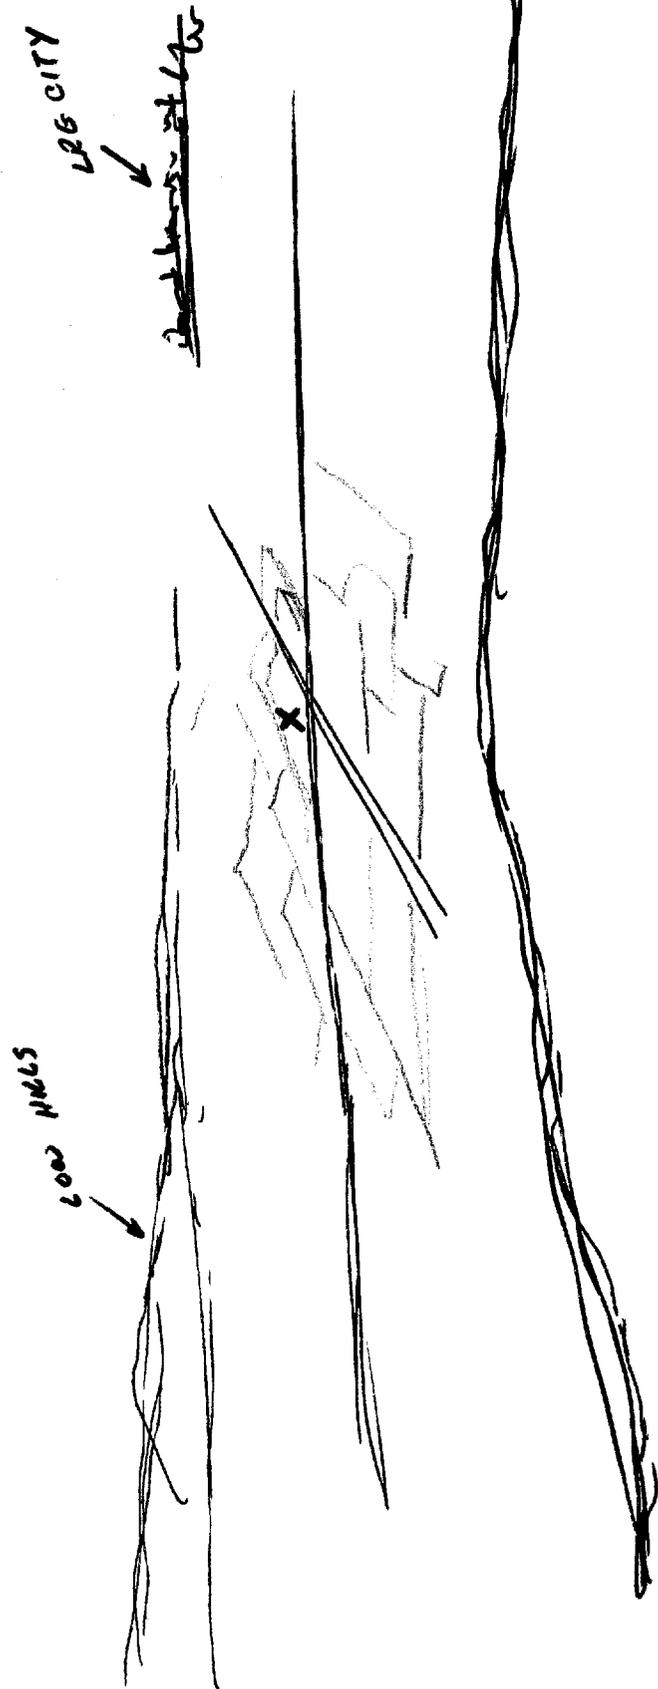

REMOTE VIEWING (RV) SESSION DC-02

1. (S/NOFORN) Source #11 reported presence at the designated coordinate of an area consisting of a plain or valley comprising an access route. Hills were observed in the distance which overlooked the valley or plain. A large city was observed in the distance. In the (apparent) center of the valley or plain was observed a crossroad type intersection of two hard surfaced roads.
2. (S/NOFORN) Debriefing cancelled after 10 minutes duration.

TARGETING DATA

REMOTE VIEWING (RV) SESSION DC-02

1. (S/NOFORN) Prior to the session the viewer was told that he would be provided with a geographic coordinate and specific time windows to the target. He was told that his job would be to describe the target area and report on target area activity during the designated time windows.
2. (S/NOFORN) At the beginning of the session the remote viewer was provided the following space/time coordinate:  
SG1A [REDACTED]  
021400 November 1980 (local target time)
3. (S/NOFORN) During the session the viewer was asked to elaborate on his descriptions as directed by the Control Analyst.

CONTROL ANALYST COMMENTS

1. (S/NOFORN) Prior to the session, the interviewer was provided the following information for targeting of #11.

a. (S/NOFORN) Targeting Data SG1A

(1) Move to geo. coordinates: [REDACTED]

(2) Access the target area at 021400 Nov 80, local target time.

(3) At the target, move in time increments of 3 days each from:

(a) 021400 Nov 80

(b) 051400 Nov 80

(c) 081400 Nov 80

(d) 111400 Nov 80

(e) 141400 Nov 80

(f) 171400 Nov 80

b. (S/NOFORN) EEI:

(1) Acquire general target description.

(2) Determine/describe activity level changes in target area.

2. (S/NOFORN) The interviewer provided the viewer only the geographic coordinates and start time coordinate at the beginning of the session. The remainder of the above data was for the purpose of in-session guidance of the viewer by the interviewer.

3. (S/NOFORN) Session DC-02 was cancelled based on the remote viewer's desires expressed after session start. The remote viewer stated having heavy overlay from a preceeding session which had been interviewed by (#11). Although #11 was, during this session, being targeted against a different geographic coordinate, the similarity in targeting method, and (#11)'s knowledge of the ID of the Control Analyst caused (#11) severe analytical problems after receipt of the geographic coordinates from the interviewer. Based on #11's expressed desire, the session was terminated after 10 minutes duration.

4. (S/NOFORN) In-session targeting: At +10 minutes after session start, the Control Analyst communicated the following to the interviewer. "Okay, we can stop the session."
