SUMMARY ANALYSIS

REMOTE VIEWING (RV) SESSION DCC-37

1. (S/NOFORN) This report documents a remote viewing session conducted in compliance with a request for information on a target of interest.
2. (S/NOFORN) The remote viewer's impressions of the target are provided as raw intelligence data, and as such, have not been subjected to any intermediate analysis, evaluation or collation. Interpretation and use of the information provided is the responsibility of the requestor.
3. (S/NOFORN) The protocol used for this session is detailed in the document Grill Flame Protocol, AMSAA Applied Remote Viewing Protocol (S), undated.
4. (S/NOFORN) Following is a transcript of the viewer's impressions during the remote viewing session. At TAB A are drawings made by the remote viewer reference his impressions of the target site. At TAB B is target cuing information provided the remote viewer. *At TAB C are the analyst's comments.*

TRANSCRIPT

REMOTE VIEWING (RV) SESSION DCC-37

TIME

#66: This will be a remote viewing session for 0900 hours  
1 May 1981.

PAUSE

Relax now and concentrate on the target, concentrate on the  
target

SG1A [REDACTED] Focus on the target, locate your perceptions in  
time at noon, 12 o'clock, today, 1 May, 1981, focus at noon  
at the target, focus and, focus and describe the target area  
to me

SG1A

+02 #01: Ah...half covered, ah, rectangular object, brown, white edge  
....very large....triangular corner is below ground level.  
It's a overhang...hilltop...little vegetation.....zero...  
zero vehicular traffic...double set of asterisks on top of  
the rectangular form exposed portion...it's like a plant...  
get a feel for some kind of a medi-cal ceiling. There's  
some kind of sterility to it. Laboratory like.

#66: And your position of observation as you describe this to me?

#01: Dead center overhead 500 feet.

PAUSE

#01: Sandy brown. Don't see any green...for some reason. It's a  
big sand mound.

#66: From this center point let's work the compass. To the north  
of the center point describe this area.

#01: Get a semi-circle train moving away. It's not really a train.  
It's a pattern of movement...lights, windows...shaped in a  
left to right semi-circle.

#66: And now to the west?

#01: Black derrick, tall, even sides, four (phonetic) obliisk  
pattern with a six pointed star.

#66: To the south?

#01: Large, open area...different shade or different color....

~~SECRET~~

~~SECRET~~

- #66: To the west. I'm sorry. On around to the east.
- #01: Mountaineous area with a singular road. Very isolated feeling. Nothing there. Just road.
- #66: All right. Now, focus more intently at the target now, focusing more and more intently, more and more clearly, one specific time window, 12 noon, 1 May 1981, right there at the target 12 noon, 1 May 1981, describe the activity to me.

PAUSE

- +09 #01: Activity is non-human. It's automated, automechanical form of movement...something to do with acceleration in automechanical movement in a circular motion, clockwise, but, it's not a full circle. It's like elements of material moving.
- #66: And, your relative position of observation as you describe this?
- #01: It's overhead.
- #66: Okay. What's your altitude?
- #01: 500 feet.
- #66: Okay. Let's move up to 5,000 feet.

PAUSE

- +12 #01: See...only difference, I can't perceive...can't perceive movement from 5,000 feet. Only perceive reflection of something from square object under more square objects.. light reflection. They're off of mirrors... Rectangular mound object is...(mumble) connected ...box and fulcrum shape with the road running through the center to large clear areas. The sandy color rectangular is dead center in the upper right box. Still no green.
- #66: Okay. From this altitude I'm going to read the UTM coordinate again, and from this altitude let's see where you are attracted when I read the coordinate. Are you ready?
- #01: Okay.
- #66: [REDACTED] SG1A

~~SECRET~~

~~SECRET~~

#01: Apparent....I'm drawing backwards, like to higher altitude  
....drawing backwards, higher.

#66: Okay. Say to yourself, say to your greater perceptual  
self, I want to see [REDACTED] SG1A

#01: ....tell if it's a sun or a large oval....fire oval.....  
keep overlaying it. I keep translating it to like rocket  
exhaust ports, but it looks different. It's a.....  
it's a form of airborne vehicle, but I can't identify it.  
I'm drawn to these....like....fire ovals. They kind of go  
like a (phonetic) wave form....sharp wave form.

#66: In your position of observation you look at these?

#01: Traveling with them.

#66: Okay. Let's try to gain a little bit of control. Let's  
return to their points of origin. Ask yourself for their  
points of origin and describe that area to me.

+17 #01: Get the starfish pattern again with the modified six points..  
...in some kind of a metallic rack or something with holes  
.....Seems to be a slide. I get the cur-, cur- the box train  
like structure with the windows and a light behind it the  
movement ...I get a sliding fashion. Large, metallic object  
of some kind and it's...point of origin....I saw a clockwise  
movement, but I don't.....can't expand that.

#66: Okay. I'm ready to move in time.

#01: Okay.

SG1A

+19 #66: All right. Again, coordinate [REDACTED] move to the  
coordinate target area forward in time to 8 May, noon on  
8 May 1981, and describe the activity to me.

PAUSE

#01: Impressions of many, many noises, sharp reports, clattering  
type noise. Have a....large...earth moving type vehicles  
present...

#66: Why do you call them earth moving type?

#01: Bulky, metallic, very wide track, yellow, color is yellow,  
for some reason.

#66: Okay.

#01: Also shifting dirt. Earth is being...wreathe...a fair  
amount of personnel present now.

#66: Describe.

~~SECRET~~

~~SECRET~~

- #01: Only organized in groups wearing like hard hats. Just continual movement in group. ... Don't seem to be organized for anything...particular..
- #66: Tell me again about these sounds that you heard.
- #01: Like metal banging on metal. (Mumble) ear clank clashing... like...noise envelopes folding in on themselves going from moderate to loud enough that they go beyond hearing range frequency wise ... static, static in duration....quick to moderately long in duration, not pleasant...
- #66: Okay. Describe for me the specific location of this activity in relationship to the overview.
- #01: Centered...between open edge and mountains in southeast corner of the overview far below the, the...large slow S shape road going from mountains across the...fulcrum square box areas. Would say it's 10 kilometers from dead center... my point of origin.
- #66: All right. Now, focus back on the activity, focus now back on the activity. I'm going to count now by days, I'm going to count forward in time by days. Watch the activity. I want you to tell me to go faster, to go slower or to stop. We want to find out what the result of this is. You ready?
- #01: Just a minute.....okay.
- #66: From the eighth of May, plus one, plus two, plus three, plus four, plus five, plus six, plus seven, plus eight.....
- #01: Just a minute. A Christmas tree form, ground pattern..... I have lack of earthen vehicles, lack of people.....observable people. I sense there are still people there. (Mumble) Christmas tree form, like ornaments on the ends.
- #66: Examine one of the ornaments.
- #01: Looks like a.....pocket, earthen pocket.
- #66: And in the pocket...
- #01: Still spike.
- #66: Relative position of observation as you look at this
- #01: Oblique (mumble) oblique. Looks like the pike, the old fashioned pike chrome tip on a flag pole. Sort of reminds you of a cupcake with a candle.

+28

~~SECRET~~

~~SECRET~~

#66: Move over the top of the pocket 500 feet and look down.

#01: Circle with a hole.

#66: Move to the south, on the ground, face it and describe it.

#01: Spike.

#66: Your perceptual distance from it?

#01: 400 feet maybe, 300.

#66: Give me 50 feet.

#01: An erector set, gears, hydraulics of some kind. Just had a glimpse of wheels. That may be overlay, though. A box sitting on wheels. That's overlay, I think.

#66: Just relax. You're facing it.....

#01: (mumble) feet.....that's all I get.....that's all I get. Had an impression of something that looked like a..... looking at an overly large, double edge razor standing on end.

#66: Okay. Now, you're fifty feet from it, and as you look at it you can see the other side to it. There it is in front of you and around the other side there's the other side, and over there is the rest of the thing cut out on the ground. Now, go over to the other side and look back and describe it to me.

PAUSE

#01: I can't. I'm starting to overlay it. I.....I'm drawing pictures now.

#66: All right. Now.....

#01: I'm starting to draw stack fins and everything.....

#66: Empty your impression on me and then we'll move.

#01: It's all right. I was creating in my mind a flat like table top tilted to one side with a row of stacked fins on it, and I feel like that's mostly creative so.....

#66: All right. Move now over the Christmas tree pattern, 500 feet again, over the Christmas pattern 500 feet. Now, remember we'll still plus eight days from 8 May, still plus eight days from 8 May.

#01: Okay.

~~SECRET~~

~~SECRET~~

#66: over the Christmas tree pattern. Now, look down.....  
when you went to one of the pockets tell me which one you  
went to.

#01: Second from the top, right.....

#66: Look to your left and count down four pockets.

#01: From the top?

#66: Yes. Go now to the fourth pocket and describe it to me.

+34 #01: Large crane . . . it's expanded, vertical to the ground....  
it's got tracks...it's multiple engine. That's all I got.

#66: All right. Move back now over the Christmas tree 500 feet.  
Remembering the pattern that you have seen in the Christmas  
tree.....looking carefully at it, I have no further  
questions about the target, but while you remain at 8 May,  
plus eight days, it is now time for you to comment as you  
see fit.

PAUSE

#01: I....I can't see the base the Christmas pattern.....  
Some may not be a base. That's all I got.

#66: All right. Calibrating then on 8 May, plus eight days,  
16 May, 16 May, maintaining your position over the  
Christmas tree, maintaining your position over the  
Christmas tree.....move....to one thousand over the  
Christmas tree. Now, focus on the Christmas tree, now  
.....very carefully.....close your eyes, close your  
eyes, and we are going to move to 16 June, 16 June.....

PAUSE

#66: Open your eyes 16 June, and describe the Christmas tree  
to me.

PAUSE

#01: I'm not getting anything.

PAUSE

#01: Not getting any input.

#66: All right. Focusing on 16 June, focusing now on 16 June,  
ask yourself one question, ask yourself one, and only one  
question 16 June.....ask yourself for the information,  
any changes in the Christmas tree.....

~~SECRET~~

~~SECRET~~

#01: The only response I get is a relocation, but there's no change in Christmas tree.

#66: All right..... Remembering clearly, perfectly and precisely all the imagery that you've seen, and all the perceptions that you have had, move now back through time to the present. Focus your attention on me, here in the room on the sound of my voice, move your arms now, move your legs and take a few deep breaths and prepare to draw the imagery you have perceived.

PAUSE

#66: Move your arms, move your legs.

PAUSE

#01: Okay. On page 1 I had the, I guess I should put an arrow to where I started from. I'll mark it start. Now, this dead center over the start, and what that is, is some kind of a very flattened, perimedial roof type shape that's half buried in the ground which acts as an overhang which you can go up under, and it's in the middle of a patterned area on the ground. It looks like two waded ends of a fulcrum. And, the fulcrum itself breaks across the center of the S shape road coming out of the hills in the right. To the left, or to the west there's an obelisk shape tower. I don't know what that is. But, to the rear of this designated area with this flattened triangular shape, there's a glass and metal squared tube like bit. Has an indication of motion which I called clockwise motion. Because I got a feeling of sweeping to the right, from left to right. I don't know what that is, but there's reflection off the glass there. And, then down on the bottom right shaped corner is the tree shape area, directly south, or to the bottom of the page is the open area. Marked as A in the tree shaped area is the pocket area on page 2, that I drew on page 2.

#66: Okay. Now this tree shaped area is where you first perceive some sort of earth moving equipment that you thought was in the area.

#01: Right, right. They were just pushing all kinds of dirt up and all that sort of stuff, and.....I'll mark B, is actually the first place I went in that tree shape area. That's where I had the metal spike.....with the.....looked like the tip of a flag pole. Okay. The one I drew is the more complicated one which is area A on page one. It's on page 2, and essentially that's what it looks like. I don't know what it is, but it's metallic, and.....that's it. That's all I can say about it, really. I don't know what to tell you.

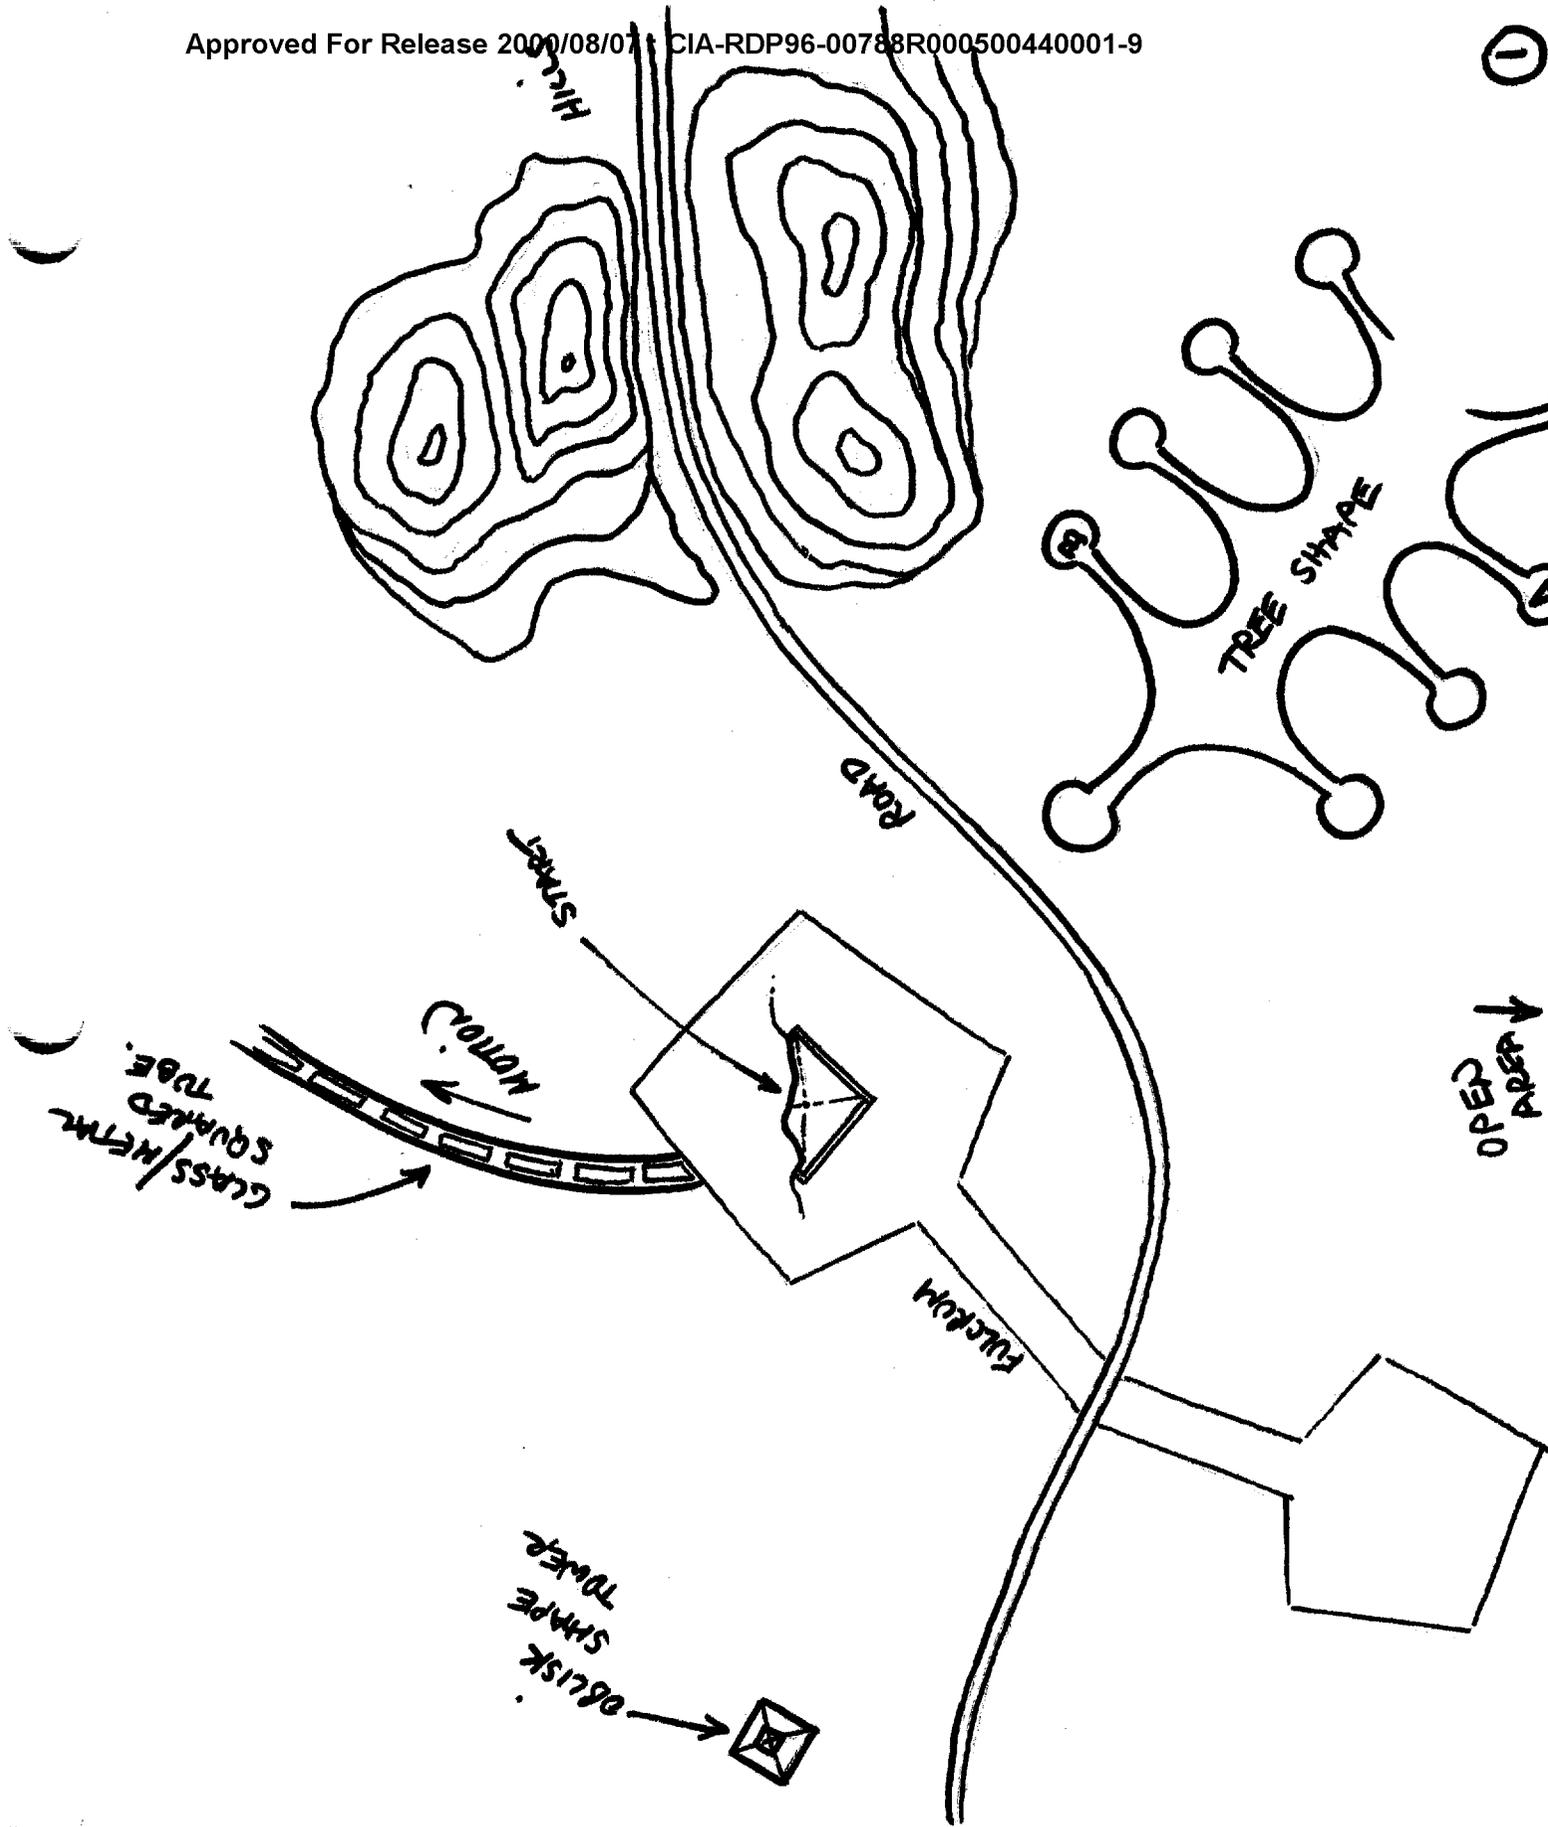

~~SECRET~~

~~SECRET~~

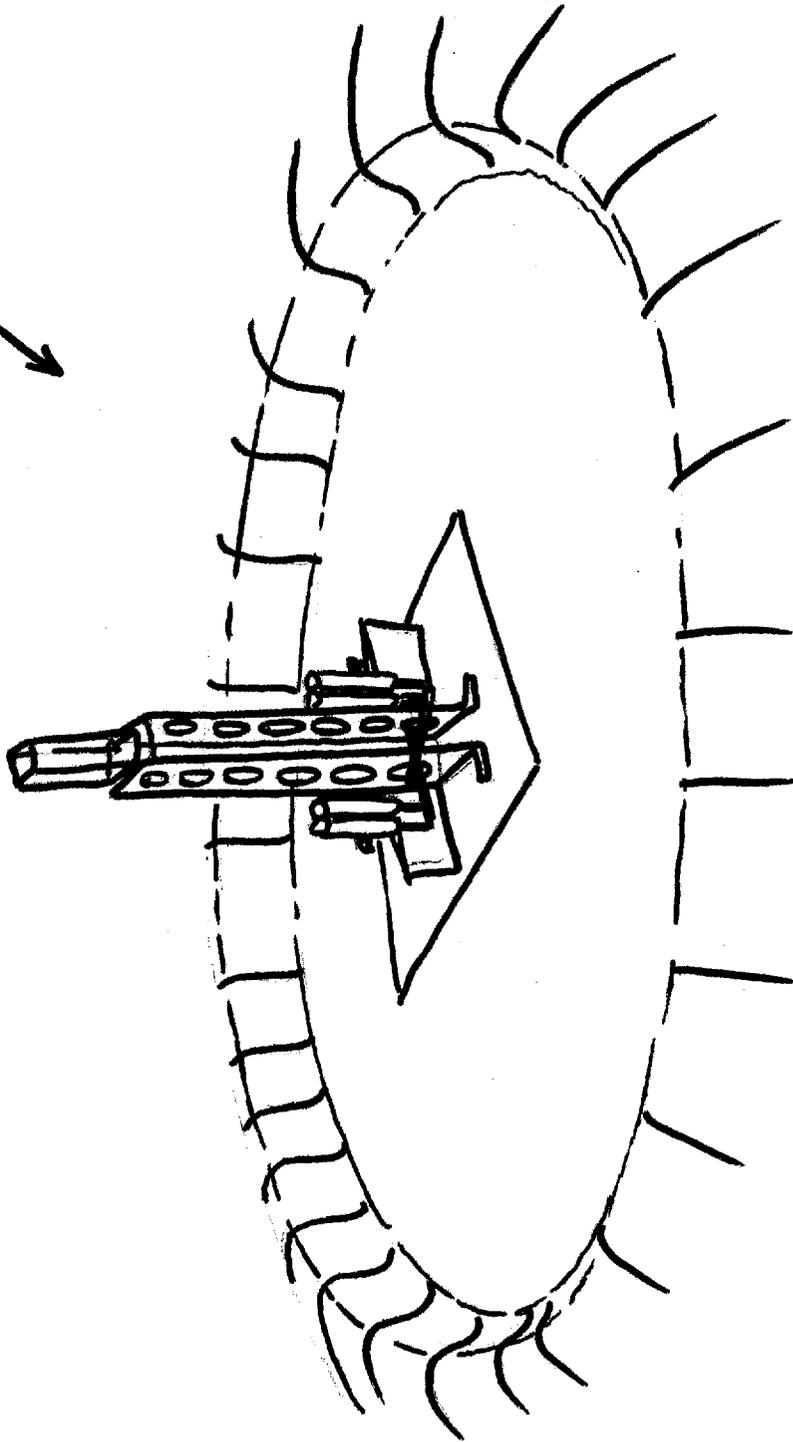

- #66: How did you feel about this session, the imagery you had?
- #01: Weird. Oh, the imagery is good, but.....it's just a weird session. I don't know....I don't have the foggiest of what I was targeted against or anything.
- #66: Okay. Any other comments?
- #01: Which means it's probably it's pretty good.
- #66: Any other comments?
- #01: That's all I've got.
- #66: Before we close down then, you've drawn another drawing here....number 3 which was kind of an expansion of your start point that you indicated in drawing number 1. Tell me a little bit about this drawing number 3.
- #01: Okay. What this essentially is, is a very flat permiddle form...four-sided perimid with an edge around it, and it's constructed very geometrically and it's kind of imbedded back into a dirt mound, and there's an opening on one end, and an overhang area like with an opening, and coming out of the back of the dirt mound and going off clockwise into the distance is this, this box like conveyor or tube or whatever that's got some movement in it. And, has glass of some form affixed to it. That essentially is it.
- #66: Okay.

TARGET CUING INFORMATION

REMOTE VIEWING (RV) SESSION DCC-37

1. (S/NOFORN) Prior to the session the remote viewer was told only that he would be provided a UTM coordinate and two time windows at the target.
2. (S/NOFORN) During the session the remote viewer was directed to elaborate on portions of his descriptions as advised by the control monitor.
3. Target Designate:

[REDACTED]

SG1A

011200 May 81 at the site

081200 May 81 at the site.

CONTROL ANALYSTS COMMENTS

REMOTE VIEWING (RV) SESSION DCC-37

1. (S/NOFORN) Prior to the session, #66 was provided a piece of paper with the following targeting information thereon:

[REDACTED]

SG1A

Also contained on the piece of paper were the directions/EEI:

- a. Describe the general area of the target.
  - b. Describe activity at the target.
2. (S/NOFORN) In-session guidance: During the session, the Control Analyst provided the following guidance/direction to the interviewer at the times indicated:
- a. +20 min: "Where is this area in relation to the overall area?"
  - b. +21 min: "Move (#27.5) forward to final completion, and describe what is being done."
  - c. +25 min: "Have (#27.5) get into the pocket and describe it."
  - d. +28 min: "Have (#27.5) visit the other pockets and look in."
  - e. +32 min: "Have (#27.5) move ahead in time one month to see any changes, try to determine if it's completed yet."
  - f. +35 min: "Come right up front and ask (#27.5) if there are any changes in the Christmas tree."
