SUMMARY ANALYSIS

REMOTE VIEWING (RV) SESSION DCC-52

1. (S/NOFORN) This report documents a remote viewing session conducted in compliance with a request for information on a target of interest.
2. (S/NOFORN) The protocol used for this session is detailed in the document Grill Flame Protocol, AMSAA Applied Remote Viewing Protocol (S), undated.
3. (S/NOFORN) At TAB A is a summary of the data presented by the remote viewer during the session. A complete transcript of the session is available upon request. At TAB B are drawings made by the remote viewer reference his impressions of the target site. At TAB C is target cuing information provided the remote viewer. At TAB D are analyst comments.
4. (S/NOFORN) The summary at TAB A represents the salient points provided by the remote viewer, and as such, has not been subjected to any intermediate analysis, evaluation or collation. Interpretation and use of the information provided is the responsibility of the requestor.
- %. (S/NOFORN) This remote viewing session was conducted concurrently with session DCC-51.

TRANSCRIPT SUMMARY

REMOTE VIEWING (RV) SESSION DCC-52

1. (S/NOFORN) Source #07 provided the following information regarding the vicinity of UTM coordinates [REDACTED] at 150830 May 1981 at the target.

SG1A

a. Source reported a low flat area having a mountain range to the northeast.

b. A very large circular shape was observed "dead center" in the low area.

c. A small tightly located complex of buildings or trailers having some sort of electronic purpose associated with antenna and a dish shape. Source believed this to comprise a remote site because not much else that was man made was observed in the area.

d. Source observed a verticle cylinder shape associated with metal structural shapes and "monstrous" pipe shapes.

e. Source observed a bright glow, fire, and flame such as would be associated with the launch of a rocket, and felt a bright heat. Source perceived that the ring shape (sketch #2) was associated with this activity in some undescribed manner.

f. After searching the area methodically, source reported seeing no other activity that would attract attention.

2. (S/NOFORN) On 291200 May 1981, Source #07 reported no activity, but rather a "decline in energy, like things being shut down; finished; complete."

a. Source reported a perception of noises subsiding, reduced responsibility, less tension. Source reported that "something (was) at least temporarily over with."

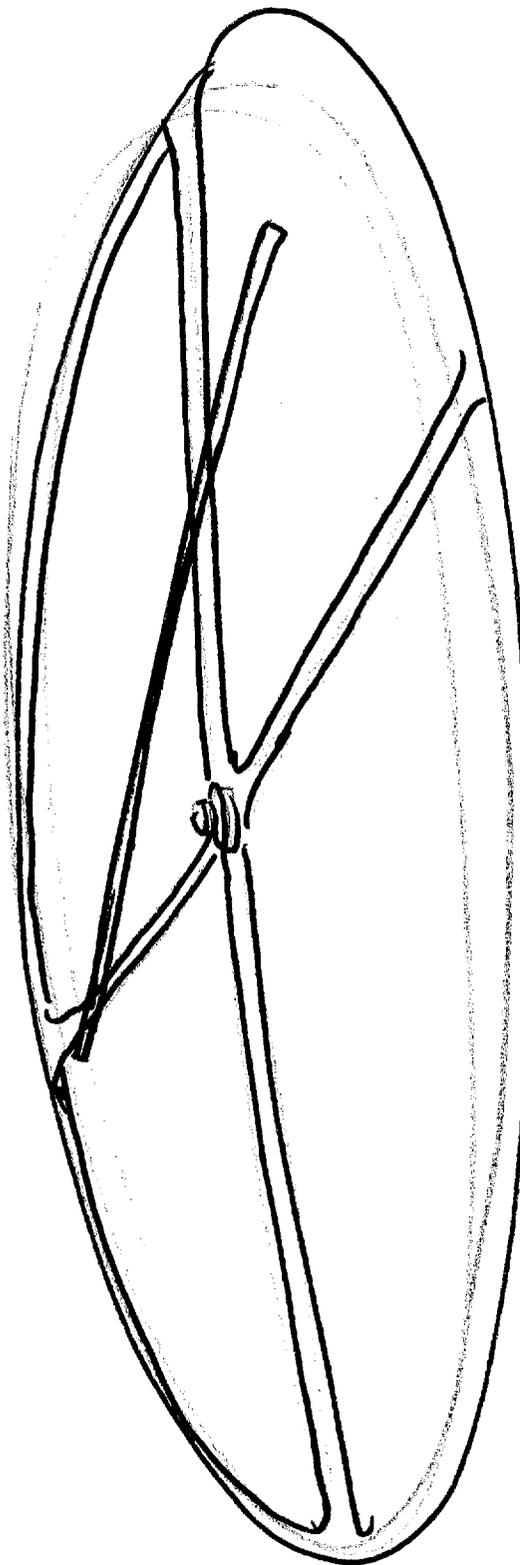

b. Source stated the site area (observed earlier) was "highly technical." Source did not see a lot of people associated with the site, but did see some people.

TARGET CUIING INFORMATION

REMOTE VIEWING (RV) SESSION DCC-52

1. (S/NOFORN) Information provided the remote viewer prior to the session is documented as a pre-session briefing and is included in the transcript.
2. (S/NOFORN) During the session the remote viewer was asked by the interviewer to elaborate on portions of his description of the target as directed by the control analyst.

ANALYST COMMENTS

REMOTE VIEWING (RV) SESSION DCC-52

SG1A 1. (S/NOFORN) Prior to the session, the analyst inclosed the UTM coordinates [REDACTED] on a sheet of paper in a manila envelope. This UTM coordinate was obtained from a target listing provided earlier by the ITAC, CRD analyst.

a. The sealed manila envelope was provided to interviewer #66 with directions to give it to #07 but not allow (him) to open the envelope.

b. Interviewer #66 was also provided a sheet of paper having the following written directions thereon:

(1) Targeting Briefing (for #66 and #07)

(a) Located in this sealed envelope is a piece of paper with a UTM grid coordinate on it.

(b) The UTM coordinate correlates to your target for today, one which you have not worked before.

(c) Access (the) target at 151200 May 1981 at the target.

(2) EEI: (For #66 only)

(a) Describe the general area of target.

(b) Ascertain level of military activity at the target.

(c) Move to 29 May 1981 and ascertain any perceived changes in activity.

2. (S/NOFORN) In-Session Guidance: The Control Analyst provided #66 the following direction during the session at the time(s) indicated:

(time unrecorded): "Have(#07) describe the source of the heat, light, and noise."
