SUMMARY ANALYSIS

REMOTE VIEWING (RV) SESSION D-97

1. (S/NOFORN) This report documents a remote viewing session conducted in compliance with a request for information on a target of interest. The mission was to provide information concerning a U.S. Embassy (in an unknown country).
2. (S/NOFORN) The protocol used for this session is detailed in the document Grill Flame Protocol, AMSAA Applied Remote Viewing Protocol (S), undated.
3. (S/NOFORN) At TAB A is a summary of the data presented by the remote viewer during the session. At TAB B are drawings made by the remote viewer reference his impressions of the target site. At TAB C is target cuing information provided the remote viewer.
4. (S/NOFORN) The summary at TAB A represents the salient points provided by the remote viewer and as such has not been subjected to any intermediate analysis, evaluation or collation. Interpretation and use of the information is the responsibility of the requestor.

TRANSCRIPT SUMMARY

REMOTE VIEWING (RV) SESSION D-97

1. (S/NOFORN) The following information was obtained at 0900 hours, 30 October 80. Source #08.

a. (S/NOFORN) Source had been briefed that we wanted to know if the "firewall" connecting the U.S. Embassy (see photos TAB C) to the adjacent building contained anything that would be on concern to USI.

b. (S/NOFORN) Source reported that a portion of the wall on the second floor was part of a steel plated vault. He had the impression of someone trying to see through it.

c. (S/NOFORN) Source reported street floor was clean.

d. (S/NOFORN) Source reported finding two "black dots" in wall on second floor (see drawing #1), felt that there was a black line on the opposite wall that runs from the rear to the front of the building. When questioned, the source stated that the black dots were listening devices, but that there were no wires to them.

e. (S/NOFORN) Source reported that lighting fixture in center of room on second floor should be looked at very carefully.

f. (S/NOFORN) Source felt that these listening devices may have been in place or started about 6 years ago.

g. (S/NOFORN) When questioned as to where this input to the listening devices is picked up, source reported that there was a room in the basement of the corner building where everything was recorded on a large reel. Usually this place was manned by 1 individual, although at times there were 2 people present. Source reported first individual as being about 40-42 years of age, about 6 feet tall, and balding. Felt he looked like Giscard d'Estaing. Source reported that individual spoke Slavic language. Finally, source reported that material was picked up by someone driving old black van.

2. (S/NOFORN) Request the above information, once evaluated, be returned with comments to this office (ATTN: IAOPS-H-S). Comments should be in writing. This will permit a full evaluation of the source of information by this office. A detailed transcript can be provided concerning the above project sessions if necessary.

TARGET CUING INFORMATION

REMOTE VIEWING (RV) SESSION D-97

1. (S/NOFORN) At the time of the session the viewer was shown the attached photographs. He was told, by the interviewer, that these photos were of a U.S. Embassy somewhere in the world.
2. (S/NOFORN) The viewer was asked to go to this Embassy and examine the fire-wall between the Embassy and the adjacent building. He was asked to identify anything about this firewall that is of concern to security. It was stressed by the interviewer that this firewall extended from the basement to the attic of the Embassy building.
3. (S/NOFORN) Following is a list of directions given to the interviewer, by the project analyst, during this session.
 - a. Have him focus on "black dots" that he has described and give their function.
 - b. Have him move forward/backward in time and describe who is using these devices.
 - c. What language does this guy speak?
